**ELDORADO HEIGHTS**

Will C. Smith, son-in-law of C. A. Varnum, was recently discharged from the navy at San Francisco and has joined his wife at Portland. She has been visiting there for the past month with Mr. Smith's parents. Charles Kays and wife, and D. W. Salladay are all ill with influenza at the Salladay home. Mrs. Edna Roe, a sister of Mr. Kays, is acting as nurse and housekeeper.  
D. F. Tooley and Ed Bentler are sick with the "flu."  
Dale Atwood, who has been spending the holidays with his parents will return this week to his school work at Corvallis, Oregon.  
James Fulkerson is doing some carpenter work at the Block farm near the canyon. This farm is leased by his brother Charles.  
H. M. Hall, 2nd, and his wife are ill with the "flu."  
Frank Brickner left Sunday for Jefferson, Pa., to visit his aged parents. He has received word that his father was in a precarious state of health.

**APPLETON**

J. G. Sayer left Sunday for Portland to spend Christmas with his daughter and son, after a four months' visit at the home of his daughter, Mrs. E. K. Smith.  
J. J. Rorers has rented his farm and will go to Pendleton, Ore., where he expects to work at his trade as a mechanic. Mrs. Rorers preceded him leaving last Monday to visit relatives there.  
A well is being drilled on the Rorer farm and also one on the Hoffman place, occupied by Wm. Beasley.  
Lester DeBoard sold the farm he bought last fall of Mr. Trueblood and has rented a farm northwest of Jerome, where he will move in the spring. An addition has been completed to the house he now occupies and his father is living there.  
Walter Kelly, Mr. Robinson and Percy Powers are under quarantine for the "flu." Walter Kelly has nearly recovered and is doing chores for Mr. Robinson, who was quite sick, but is improving.  
W. C. Kennedy spent several days this week at his place. Friday, with the help of neighbors, they worked all day to find a frozen pipe which leads from the well to the cistern, where water is stored for the neighborhood. This is our community well.  
A frame house has been erected on the Senator Lewis place.

**ORCHARD VALLEY**

Mrs. Bishop, of Jerome, was a visitor at the Nilson home recently.  
Mr. E. V. Gifford and family spent Christmas with Mr. Gifford's father and sister at Filer.  
The Riley family spent Christmas in Twin Falls.  
Miss Daphne Shulsen, who is teaching north of Bliss, was home Christmas week.  
Our school opened Monday, after eleven weeks' vacation.  
The Pettits and Bartons were dinner guests at the McCoy home in Wendell Christmas.  
Mrs. S. Nilson and Roy went to Jerome Friday afternoon and returned Saturday.  
Mr. and Mrs. D. M. Risley and family, Mrs. Clara Barnum and her daughter-in-law, Mrs. Harle Barnum and children of Emmett, were Sunday visitors at the Pettit home.  
Mr. and Mrs. Ed McLaughlin and Mrs. Taylor were Christmas guests at the Howdle home.  
Roy Nilson came home from the training school the Saturday before Christmas and surprised his family. He is looking fine and glad to be home again.  
This community was saddened last week by the death of little Helen Lundquist, daughter of Mr. and Mrs. Lundquist, on the S. & S. orchard place. The mother was going to clean a bottle with lye water Christmas day and after pouring the lye in the bottle set it on the table an instant while she turned to fix the fire. While she was tending the fire the child drank the contents of the bottle. Everything that could be done by doctors and friends was done but death released her from suffering about four o'clock Saturday after-

noon. Helen was two and a half years old and an unusually bright, active child and the sympathy of everyone goes to the grief stricken parents. The funeral was held Wednesday and the remains taken to Jerome for burial.

They can conquer who believe they can. Courage consists in equality to the problem before us.—Emerson.  
It is right to be contented with what we have; never with what we are.—James Mackintosh.

**HELPFUL HINTS.**

Save all vegetable liquors in which vegetables are cooked to add to various foods. Potato water may be used in yeast, bread, gravies and griddle cakes. As the mineral salts are largely dissolved in the water while cooking the vegetables it is economy to save every bit and use it in the food in some way. A tablespoonful of condensed milk added to a bowl of cream that has been whipped, stirring it in well, adds to its flavor and increases the amount that much.  
A small flashlight is a great convenience around closets or cupboards that are dark. They are useful also in looking into cupboards and drawers.  
When food scorches and spoils a good dish, do not scrape it, but add a tablespoonful of soda and enough cold water to cover the bottom of the dish, boil up and then set it back to soften.  
A glassful of hot milk will help many to remedy sleeplessness, taken in sips just before retiring.  
For tired and aching feet a tablespoonful of formaldehyde in a bowl of hot water, allowing the feet to soak 10 or 15 minutes, will greatly relieve them. To rub them with alcohol or vinegar, will be found soothing.  
Add a cupful of cooked rice to a meat loaf. It will make the meat go much farther.  
A Turkish towel wrung out of hot water and applied to the back of the neck will often relieve a sick headache.  
Lubricate your meat chopper with glycerine. It will not flavor the food or become rancid.  
A teaspoonful of glycerine added to grape jelly will keep the crystals from forming in it, which are so objectionable.  
If a little cold water is added to butter and sugar when creaming it will cream twice as quickly.  
Do no season steak until it is ready to put upon the platter.  
When putting a cake into the tin, push the batter up on the sides if a layer tin, or from the center if a loaf. It will bake with a more even surface, avoiding the hump in the middle which is so unsightly.

**REDUCTION OF FIRE LOSSES**

Lightning Does Damage in United States to Extent of About \$8,000,000 Yearly.

(Prepared by the United States Department of Agriculture.)  
Lightning, especially in rural districts, is a source of great danger and is responsible for the loss of valuable property. The annual fire loss due to lightning in the United States averages about \$8,000,000, and by far the greatest part of this loss is in rural districts. The only protection against it is the lightning rod. Many people hold the opinion that lightning rods do not protect a building at all, and that they actually increase the danger if they are not properly installed. But it is now definitely known that they afford some protection in almost every case, and if they are installed properly and intelligently they reduce the risk of loss from lightning to an almost negligible quantity. From such statistics as are available regarding damage from lightning in parts of the United States and Canada where thunder storms are frequent, it has been found that properly installed rods reduce the probability of a barn being destroyed by lightning by something like 99 per cent, and of a house by as much as 90 or 99 per cent.  
Farmers' mutual fire insurance companies in some instances take cognizance of the protection afforded by lightning rods and make substantial reductions on the premiums charged on rodged buildings, while others only insure buildings which are rodged in a manner satisfactory to them. Such reductions will soon pay for the cost of installation of the proper rods. In view of the fact that lightning is one of the greatest causes of fires in the rural districts, all companies which insure farm property against fire should make a considerable reduction of premiums in favor of buildings

which are protected by a satisfactory system of lightning rods, and the owners of such buildings should be careful to select a company which grants such reductions.

**APPEARANCE OF NEW WEEDS**

Report Should Be Made to Take Necessary Precautions to Prevent Their Dissemination.

(Prepared by the United States Department of Agriculture.)

If the first appearance in this country of weeds, such as Russian thistle, field hawk-weed, and Canada thistles, had been reported, much of the loss and trouble which they are causing might have been avoided. It is important to report the appearance of new weeds and to take precautions to prevent their dissemination.

**CLASSIFIED LOCALS**

**THE YEAR 1919**

A good resolution for everyone to make on the threshold of a NEW YEAR.  
LAST YEAR IS GONE;—FORGET IT.  
Let us build, however, upon the ashes of a dead past a more permanent foundation for future success.  
THE NEW YEAR finds us better prepared than ever to handle our ever increasing business. The manufacturing end is running like clockwork; our distributing yards are marvels of efficiency as purveyors of building material to a critical public; last, but not least, our architectural department has been developed to a high point of artistic and practical perfection of which we are justly proud.  
THIS ARCHITECTURAL SERVICE IS FREE—INVESTIGATE IT.—MAKE USE OF IT.

**BOISE PAYETTE LUMBER COMPANY**

"This year I will live as becomes a man"  
"I will be filled with good-cheer and courage."
