The membership committee is very proud of the record made in the Christmas Roll Call, which was 1108 members—208 more than last year.

As we start on a new year the sewing committee would like to have everything finished up to date. We have a number of refugee garments to be finished in thirty days, or they will not fill the purpose they were made for—to keep the little ones warm this winter.

HER PRISONER

By AGNES G. BROGAN.

When Aunt Hyeacynth answered an advertisement, renting for the summer a furnished country home, Caro had rebelled at the prospect. But her rebellion had ended as usual in an unselfish desire to make the best of the situation.

Caro's eyes opened wide at the grandeur of the mahogany, while her pretty brows drew together at the dustiness of the heavy draperies. "Lots of work for you, Nora!" she said.

It was pleasant to lie in the great four-poster bed, the sweet scents of the garden coming through her open window, and moonlight filtering over all.

Her heart pounding wildly, she managed to draw a kimono from the bedpost and find with feeling feet her slippers, just as a man's capped head appeared unmistakably above the balcony railing.

She edged along the floor in the darkness, as the man boldly stepped over the rail. At sight of her open window he paused as though surprised, then evidently decided to enter the house that way, but the locked window screen caused him to change his purpose, and he turned, apparently sure that the house was deserted, moving to an unsecured window farther on.

Upon the outside of that same bedroom door she had noticed a key in its lock. She would fly across the passage, turn the key and make the man prisoner. The high window to that room faced no balcony; escape would be impossible.

But before you do it give us a chance and be sure you are right. We never regret the customer we lose by honest competition; that is our fault. It is the business we lose because we never have a chance at it that hurts.

HAY MAKING COSTS REDUCED

System and Efficiency in This Important Operation Increase Quality and Quantity.
(Prepared by the United States Department of Agriculture.)
The hay crop causes more worry, anxiety, and disappointment than any other crop. It is the most widely grown crop on farms devoted to general agriculture; the time for harvesting is comparatively short and hay-making cannot be postponed without a consequent loss of quality and quantity.

Annual Value of Hay Crop in United States Is Over One Billion Dollars.

the weather to be reckoned with, a factor that has a very important bearing upon quality and one over which the farmer has no control.
Hay has been quite steadily increasing in acreage for a number of years, until at the present time it occupies about one-fifth of the tilled area on farms in the United States, and has an annual value on the farm, unbaled, of over \$1,000,000,000. There are no statistics on the actual cost of producing the total annual crop, but it has been roughly estimated that it costs \$125,000,000 or more to harvest this enormous tonnage.
