

ARCADIA VALLEY

Trance Ryan and family leave this week for Arkansas, where they expect to make their home. Mr. Ryan is to work for his father. The ill health of Mr. Ryan is the cause of their leaving here.

Mr. Wilcox has purchased a team of work horses of Mr. Witty. Tony Haberman and Mr. Morris visited Buhl Monday. Where was Mrs. Haberman?

The Jones family of Falls City came to the Valley to visit the Goemmer family last Sunday, but found them absent.

The Graham family was down with the flu last week. Mrs. L. L. Graham recovered rapidly, but Mrs. Dan Graham is not strong as yet. Lige has pneumonia, but we trust he will soon be able to be about. Mrs. Godfrey was with them several days.

Mrs. Harry has been under the weather the past week with a lame shoulder.

Little Kenneth Boyd died last Wednesday. The family has our kind thoughts in the loss of the baby.

Mr. Roberts spent last Wednesday in Twin Falls.

Mr. Morris sold a horse last week and said his wife had gone to town to spend the money. The ladies of Arcadia are wishing that more of the men would sell horses and give the returns to their wives.

J. R. Webster went home last Saturday. The whole family will no doubt appreciate being in good health again.

The ice crop has been harvested and the men have little or nothing to do except the chores.

Mr. Albee writes that he has been acting as nurse for eight people. He ought to be entitled to a certificate soon.

Mr. and Mrs. Betty are ill but are rapidly improving. Mrs. Welch has been assisting at the home.

The Goemmers were afternoon callers at the Harry's last Sunday.

Mrs. Oliver was a visitor at the Roberts' home in Jerome last week.

APPLETON

The farm loan association met at the school Tuesday evening to elect officers for the ensuing year. G. H. Erdman was elected president and Walter Kelley secretary.

The Farm Bureau held a meeting Wednesday afternoon at the school house. O. J. Ellsworth spoke on the destruction done by the sparrow. It is estimated that a sparrow eats six pounds of wheat a year. Officers were elected for the coming year as follows: J. H. Silbaugh, chairman; Walter Kelley, secretary; G. H. Erdman, committee on poisons for jack-rabbits, squirrels, sparrows and insects; J. J. Rohers, committee on farm markets.

NORTH APPLETON

There have been no fatalities in this locality from influenza, although a number have been, and are, ill. Mr. Frank Patheal is up and around and also Mrs. Weigle. Some of the Carson family are still very ill. Marie and Kenneth having been taken to the Wendell hospital last week, suffering with pneumonia.

Word comes to relatives of the recent marriage of Orville W. Everett, son of William Everett, at San Antonio, Texas, where Orville has been in military service since last April, in the motorcycle corps.

J. Irving sold seven head of cattle to Tom Callan last week. Chas. E. Everett sold a shorthorn steer to the same party.

The Mullins young people, Lydia Mae Everett and Lewis Griffin went to Thompson lake Sunday to skate, but the recent "thaw" interfered, and there was not skating.

The Weigles, Mullins and Mr. Youngblood are starting the season's work by ridding and grubbing sage brush on their respective places, preparatory to cultivation of more raw land.

HIGH SCHOOL NOTES

Last week and this week the school items are those of the students of the high school, though shortened, and even combined in some cases.

"To chalk and talk" is one of the many difficult propositions some members of the geometry are contending with.

The domestic science class took up the making of bread last week under the instruction of Miss Walkington.

Nel Deck and Frank Graham have returned to school. This makes the entire senior class in school again.

Among perhaps others the following named students have recently returned to their school work: Hester Kleinau, Robert Walling, Elsie Gill, Kenneth Witt, Helen Johnson, Vernon Pearce, Ora Deck and Bernice Graham.

There will probably be no lunches served in the domestic science room after this week, as many of the girls have dropped domestic science.

The freshmen history class are studying destruction of the Athenian empire and the end of the power of the Greeks and are finding it unusually interesting under the able instruction of Mrs. Archer.

The members of the high school wish to express their appreciation for the good will of the newspapers of Jerome, as well as for the space allowed each week.

One of the freshmen girls has a new and cheap way of making apple dumplings and best of all they are delicious.

A little freshman girl thinks that the seniors forget sometimes that they were once "freshies."

Life would be pleasanter if we could feel more of the heat and see less of mice.

Some of the school wagon routes have been changed to make the routes of other wagons shorter and to lighten the loads.

The principal says that if we do not work harder we cannot pass, so I guess this means work.—A studious sophomore.

It will not be such an easy matter for pupils starting to school now to make up back work and get daily lessons too. I've tried it.—A freshman who is sticking out.

The Jerome correspondent of a Boise newspaper must have a grudge against Jerome, in reporting only such items as have been printed lately. There has been much sickness in and around Jerome but many other news of interest are available.

Teacher: Why does water run off a duck's back? Student: Because

it slants. Men may come and men may go, but girls talk on forever.

First student: What is weighing on your mind? Second one: Do you think my brain is a pair of scales? The first: Why no, to be precise, for scales are evenly balanced.

The senior class started with forty-five members three years ago last September but has been reduced to sixteen. Still this is better than the average.

Miss Stephens was called home last Friday on account of the severe illness of her mother. Miss Stewart is teaching her classes. Mr. Massey is still substituting for Mr. Snodgrass and Miss Avant for Miss Nagel.

There is a shortage of books in high school as some of the students have taken books home and have failed to return them.

A BANKRUPT SYSTEM

The methods for regulating the railways and utilities of the country have gone into bankruptcy, and congress has again taken up the question of relief just where it left off nearly two years ago.

War and McAdoo have put some starch into the situation, for war made an emergency, and Mr. McAdoo has been big and broad enough to apply practical remedies. But all Mr. McAdoo could do was to put a patch on the bankrupt system of regulation.

The chances are that the railroads will be returned to their owners within a few months, and before that is done there is need for new laws that will meet new conditions.

Mr. McAdoo had the power to shoot up the rates and wages, and his authority to lower them was just as broad. He proved that elasticity is needed in the handling of railway affairs, and he applied common sense methods to the task. It is possible that a new government director of transportation may be created, who will become a member of the cabinet, and deal directly with the president and the administration, thereby getting quicker results than under the old bankrupt plan of appealing to the Interstate Commerce Commission, congress and other very slow-moving bodies.

CASUALTIES INCLUDE FEW CASES OF BLINDNESS

While the number of casualties in the American Army as a result of the war is much larger than was

generally supposed when the armistice was signed it is gratifying to note the fact that, according to Dr. J. E. Hendrickson, of Newport News, Va., who recently conferred with the Surgeon General of the Army, relative to the disposition and care of blinded soldiers, the American Expeditionary Forces had less than fifty men blinded as a result of the war. Of this number it appears that all have returned to the United States except eight men, who are still in France.

SON OF EX-KAISER GOES TO WORK

It is interesting to note that at least one of the ex-Kaiser's sons seems to be taking a practical view of the present situation, it being reported that former Prince August William has gone to work in a German automobile factory.

ITALY AND THE PRESIDENT

President Wilson's trip through Italy proved to be one continuous ovation. At Rome, Genoa, Milan, Turin and elsewhere he was greeted with an enthusiasm which seems to have surpassed even the wonderful demonstrations in France and England.

The cordiality of the Italian people is said to have been especially appreciated by the President because it was evidently based largely on the fact that he is regarded as the world's chief exponent of the prevention of future wars.

The KITCHEN CABINET

Life, I repeat, is energy of love. Divine or human; exercised in pain; if so approved and sanctified, we pass, through shades and silent rest, to endless joy.

BLACK AND WHITE AND RED CURRANTS.

Currants are a favorite fruit with nearly everybody. The red currant is most commonly used for jellies, although many use the combination of red and white, making a light colored jelly.

The black currant is not as common as it once was, but makes a most delicious jam for those who are sufficiently old-fashioned not to have forgotten grandmother's garden where the dear old black currants were always found.

The delicious bar le due currants may be prepared at home, using the large cherry currants, carefully removing the seeds with a large needle.

For jelly making currants as well as other fruit should not be too ripe, nor picked after a heavy rain. Pick over the currants but do not remove the stems. Wash and drain and mash in a preserving kettle with a wooden potato masher, adding more until there is enough to cook in the receptacle. Cook until the currants have a white appearance, strain through a colander, or put into a jelly bag at once. Measure the juice and boil five minutes, then add an equal measure of heated sugar unless one wishes a sour jelly. Boil three minutes. Try a little in a cold saucer; if a thin skin forms, pour at once into the glasses. Jelly should be firm enough to keep its shape when turned from the glass, clear, of good flavor, and when cut leave sharp edges. Store in a cool, dry place for winter.

Red currant and red raspberry makes a most deliciously flavored jelly.

For farm loans see the Jerome National Bank. Quick service. 47-48

Advertise in our columns. It pays to use them.

The education of men, like that of dogs, is a slow and painstaking process. No one college president in a short lifetime ever filled a whole state with scholarly men. No one missionary ever changed a heathen province into a model Christian commonwealth, says Minneapolis Journal. Dreams of China or of Russia becoming as fine a republic as America overnight are flimsy foolishness. And even if these swift and extensive metamorphoses could be brought about, they could not be sustained. This war will hammer a few rough world truths into the thick skulls of dense mortals; but it will not make peasants in our generation into enlightened, self-governing citizens, nor keep them thus.

CLASSIFIED LOCALS

Rates—5 lines or less, 25 cents per line per issue; over 5 lines, 5 cents per line per issue. All readers in the classified columns to be paid in advance.
