

Eruptions

The only way to get rid of pimples and other eruptions is to cleanse the blood, improve the digestion, stimulate the kidneys, liver and skin. The medicine to take is Hood's Sarsaparilla Which has cured thousands.

ECUADOR IN REBEL HANDS.

Overthrow of the Ministry After a Bloody Riot. Guayaquil.—General Alfaro has occupied Quito. A junta of notable persons met in the government palace here at 4 p. m. and formed a new government.

Vice President Moreno assumed the executive power, establishing the capital here and appointing a new ministry. Rioting followed. The people during the afternoon attacked the prisons, liberating the political prisoners, and afterward captured the police barracks, where the rioters obtained possession of a number of rifles and some cannon. Rifle shots were heard in all parts of the city, and the rioters became so bold that they attacked a cordon of military. Many persons were killed or wounded on both sides during the fighting.

The newly appointed ministry, however, only lasted one hour. The people rejected the election of Moreno and proclaimed as president General Alfaro, the former president, and leader of the revolution, and in his absence Dr. Emilio Arrivilo assumed the civil and military authority. A great panic prevailed here during the evening, and in the midst of the disorder, General Plaza, minister of Ecuador to the United States, who arrived here January 18 and assumed chief command of the army in its operations against the rebels, escaped from the city and embarked on board the Chilean steamer Loa, which leaves here tomorrow for Panama. Later in the evening quiet was restored.

How Many Birthdays?

You must have had sixty at least! What? Only forty? Then it must be your gray hair. Ayer's Hair Vigor stops these frequent birthdays. It gives all the early, deep, rich color to gray hair, and checks falling hair. And it keeps the scalp clean and healthy.

It was greatly troubled with dandruff which produced a most disagreeable itching of the scalp. I tried Ayer's Hair Vigor and the dandruff soon disappeared. My hair also stopped falling out and now I have a splendid head of hair.—DAVID C. KIRK, Fairfield, Conn.

Czar to Review Sentence.

St. Petersburg.—The sentence of Alexis Alexievitch Souverin, editor of the Russ, to a year's imprisonment in a fortress for incitation of the people to high treason by publishing proclamations and statements designated to instigate riot, sedition and armed revolt, and tending to cause the bankruptcy of the state, is the general topic of conversation in the capital. As Mr. Souverin is a member of the nobility his case must be reviewed by the emperor. The court has decided with a view to mitigation to recommend a commutation of the sentence to three months. Conviction and a sentence, however, is a heavy blow to an editor of M. Souverin's standing.

Science AND Invention

About three hundred species of mosquitoes have been described, and it is estimated that two hundred more exist. Giles recognizes only thirty-six species in the whole of North America, but Florida alone claims twenty-two species.

Poisoning from gas inhalation is now added to the recognized dangers of ballooning. The hydrogen—itsself non-poisonous—is often contaminated with arsenic, selenium and antimony, and fourteen cases of ill effects have been reported to the French Academy of Medicine. In one of the two forms of poisoning death results in two or three days.

Blowing wells, sometimes known as breathing wells, are now being investigated by the United States Geological Survey. The best known examples of this type of well are found throughout Nebraska. The force of the air current in one of the Louisiana wells is sufficient to keep a man's hat suspended above it. Such phenomena are mainly due to changes in atmospheric pressure.

Some anxiety is being caused in Germany by the decline of the birth rate. In 1904 the birth rate was 30.5 in each 1,000 inhabitants, against 30.9 in 1903, 32.1 in 1902, 33.4 in 1901, and 33.7 in 1900. The decrease, therefore, is continuous. Lung disease, not only in towns but in the country as well, is decreasing. It is claimed that this result is owing to the systematic and scientific war which the authorities are conducting against this scourge.

The prosperity of Japan depends very largely upon the sea. A thousand varieties of fish—including the shark—are eaten by the inhabitants, the annual yield of the fisheries being three million tons, or three times the consumption in the United States. The value of this product is \$30,000,000. The coasts also supply an edible spongia known as laver, and other sea weeds from which food gelatine is extracted, together with large quantities of salt. From Japan, moreover, comes a large quantity of the world's coral and pearls.

Luther Burbank, of California, who has probably produced more new varieties of fruits, flowers and plants than any other living man, said recently to a friend that he was accustomed, when selecting for color among newly created flowers, to submit the choice to a lady of his acquaintance noted for her exquisite taste. Mr. Burbank's own judgment, however, in the matter of color and form is highly trained, and is exercised with surprising quickness and sureness of decision. Among his latest productions is a daisy, in which he has striven especially to obtain a graceful carriage of the stem and flower.

Postal authorities in Milan, Italy, use an automobile wagon in which to collect part of the mail. The car runs between the central postoffice and the branch offices and boxes in the different districts of the city. The automobile is of large size, on the style of an omnibus, and is fitted out so that the mail can be sorted by one clerk while the car is running. The car stops at each letter box to collect the mail, and between the boxes the clerk sorts and stamps the letters and passes them in packages to a second man who puts them in a series of compartments corresponding to each carrier's route. This car covers a route fourteen miles long and collects the mail from all boxes in an hour and a half.

The influence of occupations upon the eyesight is strikingly illustrated by statistics collected among the schools of Germany and France. In Germany it has been shown that 50 per cent of those engaged in the so-called liberal professions suffer more or less from myopia, or shortness of sight, whereas among laborers the percentage drops to 4, and among peasants to only a half of 1 per cent. The remarkable growth of myopia with increase of attention demanded by school work is indicated by the fact that the eyes of only 6 per cent of the scholars in the primary schools of France are affected, but those of more than 20 per cent in the secondary schools. In the College Rollin 15 per cent of the scholars have myopia in the lower grade, 32 per cent in the third grade, and 55 per cent in the courses in philosophy.

Reasoning from Experience.

A little East Side boy was having his first country outing, says the New York Tribune. He lay on the grass in a peach orchard, making a chain of saucers and buttercups. Across the blue sky a line of swallows dipped. "Look up, look up, Johnny! See the pretty birds flying through the air," said his hostess.

Jimmy looked up quickly. "Poor little fellows!" he exclaimed, pityingly. "They ain't got no cages, have they?"

Followed Instructions.

"Why didn't you put this watermelon in the ice box, as I told you?" asked the mistress of the maid. Then, says the Cleveland Plain Dealer, Maggie, the maid, grew indignant.

"I did, mum."

"But it isn't cold."

"No, mum. How could it be? I had to take the ice out to get it in."

If the woman who throws a shawl over her head to run into a neighbor's had time to pass a looking glass, her reason for going would be scared out of her head and she would remain at home.

Kill Saloon Man; Rob Till. Omaha, Neb., Jan. 22.—Sunday morning two men entered the saloon of Nels Lausten and one of them drew a pistol and shot Lausten through the head, killing him instantly. Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

RHEUMATISM BODY RACKED WITH PAIN

No other bodily suffering is equal to that produced by the pain of Rheumatism. When the poisons and acids, which cause this disease, become entrenched in the blood there is hardly any part of the body that is not affected. The muscles become sore and drawn, the nerves twitch and sting, the joints inflame and swell, the bones ache, every movement is one of agony, and the entire body is racked with pain. Rheumatism is brought on by indigestion, stomach troubles, torpid Liver, weak Kidneys and a general inactive state of the system. The refuse matter instead of passing off through nature's avenues is left to sour and form uric acid, and other acid poisons which are absorbed into the blood. Rheumatism does not affect all alike. In some cases it takes a wandering form; it may be in the arms or legs one day and in the shoulders, feet, hands, back or other parts of the body the next. Others suffer more seriously, and are never free from pain. The uric acid and other irritating substances find lodgement in the muscles and joints and as these deposits increase the muscles become stiff and the joints locked and immovable. It matters not in what form the disease may be the cause is always the same—a sour, acid condition of the blood. This vital stream has lost its purity and freshness, and instead of nourishing and feeding the different parts with health-giving properties, it fills them with the acids and salts of this painful and far-reaching disease. The cold and dampness of Winter always intensify the pains of Rheumatism, and the sufferer to get relief from the agony, rubs the affected parts with liniments, oils, lotions, etc., or uses plasters and other home remedies. These are desirable because they give temporary ease and comfort but have no effect on the real trouble which is in the blood and beyond the reach of such treatment. S. S. S. is the best remedy for Rheumatism. It goes into the blood and attacks the disease at its head, and by neutralizing and driving out the acids and building up the thin, sour blood it cures the disease permanently. While cleansing the blood S. S. S. tones up the stomach, digestion and every other part of the system, soothes the excited nerves, reduces the inflammation, dissolves the deposits in the joints, relieves all pain and completely cures this distressing disease. S. S. S. is a certain cure for Rheumatism in any form; Muscular, Inflammatory, Articular or Sciatic. Special book on the disease and any medical advice, without charge, to all who write. About fifteen years ago I had a severe attack of Rheumatism and could not work with any satisfaction. My legs were badly swollen and I was unable to walk. I tried many remedies but could get no relief. I was finally recommended to try S. S. S. and it soon cured me sound and well. I am now 74 years old and have never had any return of the trouble.

CALVE TAKES SONGSTRESS.

Lois Feurt of Seattle to Be Given Education in Paris by the Famous Artist.

Seattle, Wash.—Madame Calve, the celebrated prima donna, who sang here in concert, has discovered a young girl contralto, Lois Feurt, for whom she predicts great things. The girl, who is but 17 years of age, was given an audience by Mme. Calve in the Lincoln hotel, and sang with such exquisite charm that the great prima donna, with tears in her eyes, clasped the girl to her breast, saying, "You have the voice, you have the temperament, you have the physique, you will be great." The other members of Mme. Calve's company were also amazed at the girl's marvelous voice, and predict a future for her. After singing Gounod's "Oh, that We Two Were Mating," Mme. Calve told Miss Feurt that she would formally adopt her and give her a thorough training in Paris.

WHAT JOY THEY BRING TO EVERY HOME

as with joyous hearts and smiling faces they romp and play—when in health—and how conducive to health the games in which they indulge, the outdoor life they enjoy, the cleanly, regular habits they should be taught to form and the wholesome diet of which they should partake. How tenderly their health should be preserved, not by constant medication, but by careful avoidance of every medicine of an injurious or objectionable nature and if at any time a remedial agent is required, to assist nature, only those of known excellence should be used; remedies which are pure and wholesome and truly beneficial in effect, like the pleasant laxative remedy, Syrup of Figs, manufactured by the California Fig Syrup Co. Syrup of Figs has come into general favor in many millions of well informed families, whose estimate of its quality and excellence is based upon personal knowledge and use.

Syrup of Figs has also met with the approval of physicians generally, because they know it is wholesome, simple and gentle in its action. We inform all reputable physicians as to the medicinal principles of Syrup of Figs, obtained, by an original method, from certain plants known to them to act most beneficially and presented in an agreeable syrup in which the wholesome Californian blue figs are used to promote the pleasant taste; therefore it is not a secret remedy and hence we are free to refer to all well informed physicians, who do not approve of patent medicines and never favor indiscriminate self-medication.

Please to remember and teach your children also that the genuine Syrup of Figs always has the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package and that it is for sale in bottles of one size only. If any dealer offers any other than the regular Fifty cent size, or having printed thereon the name of any other company, do not accept it. If you fail to get the genuine you will not get its beneficial effects. Every family should always have a bottle on hand, as it is equally beneficial for the parents and the children, whenever a laxative remedy is required.
