NEW TANLAC PLANT IS NOW COMPLETED

Magnificent New Laboratory Has Daily Capacity of 36,000 Bottles

What is said to be one of the largest pharmaceutical laboratories in the United States has been completed at Dayton, Ohio, for the manufacture of Tanlac, the well-known medicine, which according to recent reports is now having the largest sale of any medicine of its kind in the world.

The erection of the new plant was made necessary by the rapid growth of the business, as the older plant was found to be wholly inadequate to supply the ever-increasing demand which at the present rate of sale will amount to more than five million bottles for the present year alone.

By the erection of this plant the manufacturers of Tanlac are giving to the world just one more evidence of the remarkable growth and expansion of their business, and of their absolute confidence in its future.

This announcement will be read with interest not only by the many thousands of Tanlac agents scattered throughout every state of the Union and throughout Canada, but to the millions who have used it beneficially as well.

The new building occupies 60,000 square feet of floor space. It is six stories in height, practically fire-proof throughout, and is of striking architectural design. It also has private railway facilities.

This beautiful new structure now stands in striking contrast beside the older building where Tanlac was first made.

Visitors to the laboratories are strongly impressed with the extremely modern character of the equipment. Everything is provided and splendidly arranged to promote systematic and rapid production. The very latest machinery and devices known to invention and pharmaceutical science are here used.

The interior throughout is finished in spotless white, and all of the large force of employees wear white uniforms, which they are required to change daily. The main offices on the first floor are all finished in Cararra marble and mahogany.

The entire process of manufacture is conducted under absolutely sanitary conditions. Even the bottles made expressly to contain Tanlac are washed and sterilized electrically by the ultra violet ray process. They are then filled by automatic machinery and the finished product is therefore never touched by human hands. When Tanlac was introduced into Canada history repeated itself, and the demand which had been created in the United States was quickly duplicated in the Dominion Provinces. As a result, it was recently found necessary to establish another Tanlac laboratory at Windsor, Canada, which is on a somewhat smaller scale than the plant at Dayton, but is no less modernly equipped.

These new facilities give a daily capacity of 36,000 bottles, but as Tanlac is rapidly being introduced into foreign countries, it is probably only a question of a few years before even larger facilities will become necessary.

While the manufacturers are necessarily working for capacity production, it is a fundamental rule of the Tanlac Laboratories that the quality of the medicine shall never be sacrificed to secure quantity output.

Uniform quality is guaranteed by a series of careful inspections by expert chemists, from the time the roots, herbs, and barks are received in their rough state from all parts of the globe until their medicinal properties have been extracted by the most approved processes. The finished medicine is then bottled, labeled, and shipped out to the tens of thousands of druggists throughout the United States and Canada, to supply a demand never before equalled for this or any other medicine.

The executive sales offices are located in Atlanta, Georgia, and occupy almost an entire floor of the Fourth National Bank Building of that city.

Tanlac is sold in Montpelier by the Modern Drug Co. Adv.

WILSON WILL FIGHT FOR LEAGUE OF NATIONS

Washington, D. C., June 17.—President Wilson plans to open his fight for the peace treaty and league of nations in Belgium during his visit there.

Assuming the Germans will sign the treaty on schedule he now expects to leave France for home June 24 or 25.

This means he should be back at his desk in Washington July 4 or 5. It was officially announced today that after he has delivered his treaty message to congress he will start out on his tour of the country within two or three days and the tour will continue for approximately three weeks.

Get Your Electric Range NOW!

For a Cooler, Easier Summer

Electric cooking is not a new method—you don't have to learn to cook all over again. It simply makes your recipes "turn out" better, and your work easier.

Electric ranges are sure. A turn of the switch gives you a definite heat. If you want to change the heat, turn the switch again. You need never worry about "building up" the fire—you need never fuss with coal, wood, flame or draughts.

Electric ranges save food. Meats, roasted electrically, shrink less—sometimes saving as much as 30 per cent. Vegetables and fruits retain all their natural flavor and juices and are neither burned, scorched, nor undercooked.

And electric cooking is clean, safe and cool. All the heat goes to cooking the food and there's no flame, smoke, ashes, fuel or odor to grime walls and kettles.

Let us demonstrate an electric range to you. There are sizes to fit all purses and needs and you can pay the moderate cost on our gradual payment plan.

MUST TEST CATTLE BEFORE SHIPPING OUT OF STATE

Beginning July 1, 1919, the shipment of cattle interstate without having them properly tuberculin tested will be prohibited—with a few exceptions—by a regulation issued by the Secretary of Agriculture. The enforcement of this new regulation will, it is believed, be of great assistance in preventing the further spread of tuberculosis among live stock, and having the work practically under State and Federal supervision at all times will serve to bring about uniformity.

The Department of Agriculture, through its Bureau of Animal Industry, is now actively cooperating with the State live stock sanitary officials and cattle owners of 42 states in the eradication of tuberculosis from live stock.

Recent legislation in several of the states has made it possible to proceed with the work where heretofore it has been impossible to do so. Federal funds available for the work are insufficient to meet present demands, and now that the cattle owners are finding the work to be of such advantage and importance the demands will increase rapidly.

Most activities are in the "accredited-herd" work with the owners and breeders of pure-bred herds of cattle who wish to free their herds from tuberculosis and have them placed on the list as "accredited."

Some "area work" is being conducted. Under this plan a community or county or some other unit decides to have all the cattle in the area tuberculin tested with a view of completely eradicating the disease as soon as possible. In order that the "area work" may be successfully carried on, the fullest cooperation of the cattle owners in the territory must be obtained, and any attempt to proceed with the work without the good will and hearty cooperation of the people will fail.

Appropriations by the states for the coming fiscal year for live stock tuberculosis eradication aggregate about \$2,000,000. Part of this sum will be used to indemnify partially the owners of cattle found to be tuberculous. Most of the states now have laws permitting the payment of indemnity and the Federal department also pays some indemnity when funds are available, with the exception of valuable breeding animals. It is found most advisable to consign the tuberculous cattle for slaughter and thereby dispose of them to the best advantage. In the greater portion of "reactors" the disease is found to exist to but a slight extent, making the meat fit for food—thereby causing a great saving. The carcasses of such cattle, after being passed for food by trained inspectors, usually bring about the market price, which sum, deducted from the appraised value of the live animal, leaves the amount of loss. Under the more recent laws, this loss is divided between the owner, the state, and the United States—each standing one-third—except that in most cases the state is limited in the

amount that it can pay and the United States is always limited to the payment of \$50 for a pure-bred animal and \$25 for a grade.

SUSPECT YOUR KIDNEYS

Too Many Montpelier People Neglect Early Symptoms of Kidney Trouble.

If your back is lame—if you feel dull, tired and all-worn-out—
If you have hard headaches, back-aches and dizzy spells—
If the kidney secretions are discolored—

Suspect your kidneys and "take a stitch in time."

Use Doan's Kidney Pills the time-tried, home-endorsed kidney remedy. It may save you from some serious kidney trouble.

Make use of the experience of Mrs. Parley P. George, Third St. She says: "Just this last spring I was down with a bad attack of kidney trouble. Part of the time, I was unable to keep up with my back. I had inflammation of the bladder and my back was so lame and sore I could hardly stand the sharp pains through me. I was dizzy; my sight was blurred and I had frequent, nervous headaches. As another of the family had used Doan's Kidney Pills with good results, I tried them and it only took a few boxes to cure me. I have never had any kidney trouble since."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. George had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Cut This Out and Take It With You.

A man often forgets the exact name of the article he wishes to purchase, and as a last resort takes something else instead. That is always disappointing and unsatisfactory. The safe way is to cut this out and take it with you so as to make sure of getting Chamberlain's Tablets. You will find nothing quite so satisfactory for constipation and indigestion.

RAILROAD MEN WILL OBSERVE "NO ACCIDENT WEEK"

By the afternoon of June 21st approximately 305,000 railroad men in the Central Western Region will have signed a pledge to go seven days, if possible, without sustaining a personal injury.

The week beginning June 21st has been designated by the Regional Director of Railroads as "No Accident Week" and according to a statement issued today by Mr. H. A. Adams, Regional Supervisor of Safety of the Central Western Region, the lines under his jurisdiction approximately total 52,000 miles, with 305,000 men and women on the payroll.

Back of this army of industrial workers who have decided to eliminate personal injuries are 400 Safety Committees, composed of both officers and employees, working under regulations prescribed by the United States Railroad Administration.

According to the employees themselves, who are taking a keen interest in it, says Mr. Adams, "No-Accident Week" is bound to give a big impetus to their safety work. The test is something concrete, something which they may attain definitely as a result of their efforts. This is causing considerable rivalry among the roads and the men say that the psychological effect upon the rank and file of employees of being thus placed upon their metal, together with the knowledge that even for a week they may prevent actual suffering or grief to any number of employees or their families, makes "No-Accident Week" well worth while.

Daily reports will be compiled by telegraph of progress made on every railroad in the Central Western Region so that every employee will be advised as to what is being accomplished.

WILL NOT REPEAL WAR TIME PROHIBITION

Washington, D. C., June 17.—Repeal of war time prohibition as it affects light wines and beer was voted down, ten to three, by the house judiciary committee today.

Efforts were made by Representative Igoe, Missouri, to insert in the prohibition enforcement act now being considered by the committee an amendment exempting light wines and beer and it was upon this that the committee voted.

The action today indicated that the committee will table resolutions specifying repealing the act.

Mr. Wisler Cured of Indigestion.

"Sometime in 1900 when I had an attack of indigestion and everything looked gloomy to me, I received a free sample of Chamberlain's Tablets by mail. I gave them a trial and they were such a help to me that I bought a package, and I can truthfully say that I have not had a similar attack since." writes Wm. B. Wisler, Douglasville, Pa.
