NUMBER 15

OLIVER TUELLER BADLY HURT WHEN AUTO TURNS OVER

Bones of His Right Wrist Mashed and Otherwise Injured—Fiver Other Occupants of Car Escaped with Minor Injuries.

Wednesday evening Arnold Tueller wife and two children, Clarence Tueller and Oliver Tueller, the latter at the wheel, started out for a pleasure ride in Rudolph Tueller's Chandler car. They were speeding along on the Paris road at about 25 miles an hour and in making the turn just west of the slough bridge, the car veered too close to the edge of the grade. Oliver gave the car a quick turn to get back into the road. This caused the left rear wheel to slip off the grade and the car turned over twice.

Arnold Tueller and family were in the back seat. The wife and two children escaped without a scratch, while Arnold sustained only slight bruises on his right hip and leg.

Clarence was pinned under the car and it was at first thought he was seriously injured, but when removed from beneath the wreck it was learned that the weight of the car had not injured his chest. However, his left leg was badly bruised and cut and his right ankle slightly cut.

Oliver was more unfortunate than the rest as he received a bad gash on the left leg, just above the knee, and every bone in his right wrist was broken and the tendons lacerated.

The injured were brought to the Montpelier hospital and their injuries given prompt attention. At this writing, Thursday morning, Dr. Ashley stated that he thought it would be possible to save Oliver's hand, although the bones are so badly broken right at the wrist joint that amputation may be necessary. Oliver, it will be remembered,

barely escaped death on the battlefield in France. He was wounded in the leg by an explosive machine gun bullet on the 28th of last July and laid where he fell for five hours and then crawled a half mile before being picked up by stretcher bearers.

The injuries he received Wednesday night are very likely to result more seriously to him than the wound received in battle.

The car was badly wrecked—the wind shield smashed, steering wheel broken into splinters, the top demolished and other parts of the car broken.

After the above was placed in type we learned that Oliver had brought his father and mother—Mr. and Mrs. Rudolph Tueller—in from Geneva Wednesday afternoon, and that they were to leave yesterday morning for San Francisco, in response to a message stating that their son Charlie was very low in a government hospital. Charlie had served nearly a year in Siberia. He was operated on for appendicitis last winter and afterwards contracted pneumonia.

As soon as he was able to make the trip he was sent to San Francisco, arriving there June 16. His mother had received one letter from him since he arrived, in which he stated he was very weak but was receiving splendid care and thought he would soon be able to come home. The message yesterday saying he was very low was a great shock to his parents.

Mrs. Tueller left for San Francisco yesterday morning but Mr. Tueller remained to help care for Oliver.

Conflicting Thoughts

PIONEERING ON BEAR LAKE AS TOLD BY LATE J. B. DUNN

The following from the pen of the late John B. Dunn was published in the Paris Post some two years ago. In view of the fact that his death has taken from our midst another one of the few remaining pioneers of this valley, we feel that the article will be read with interest at this time by both old and young:

"The 10th day of April, 1864, two families, Mrs. Meranda Campbell, her two sons, David and Warren, and Mr. and Mrs. John Dunn and their three daughters, Charlotte Ann, Harriet Amelia and Permelia, and their nephew, James Dunn, started from Providence, Utah, with one wagon and two yoke of oxen each, and a few stock cattle. They traveled by way of Gentile valley, Soda Springs, crossing Bear river on John Cozzen's ferry boat near the mouth of the outlet. These families were the first to settle in Bloomington, which was on the 18th day of April, 1864. Subsequently, under the supervision of President Charles C. Rich, Horacio Merrill, William Bell and John Dunn located Main street, north and south through Bloomington, using the north star as a guide.

"In June President Young and company came over the mountain by way of Immigration canyon, the road being very nearly impassable. They traveled as far south as Elm Haven and held meetings in Paris.

"The first house built in Bloomington was erected by John Dunn. The finishing lumber was manufactured by the use of a whip saw in the hands of John Long and James Nelson.

"During the months of January, February and March of '65 no teams passed over the road between Paris and Bloomington owing to the drifting snows which averaged from four to six feet deep.

"President James H. Hart and Geo. Osmond taught the first school in Bloomington, in a log building with a dirt roof, and a wagon cover for a partition.

"Hezekiah Duffin and David Kimball built the first ball room in the valley on the island south of Paris. The dancing was executed according to the rules adopted by the national association of teachers of dancing, viz: All single figures of square, contra dances, and round dances requiring eight measures of time to perform them in four measures for each movement.

"The last of March, 1865, Miss Mary Ann Rich, who was then in her girlhood, in company with her father General Charles C. Rich, came over the mountain from Franklin to Bloomington on snow shoes. Later Miss Rich became the bride of Dr. Pomeroy of Paris. They are now located in the state of Washington.

"My fishing and hunting experience commenced in 1864 by taking a thirteen pound trout from Bloomington creek. When fishing on the lake I used 140 seine and a boat. In May, 80 large trout, and a few other fish, were removed from the seine at one landing, near the mouth of Swan creek. During this time I was sending fish to Cache valley, Brigham City, Plain City and Salt Lake City.

"Beaver were so numerous that a trapper could average four every day, but four head of elk was the most I ever killed in one day, and I remember of killing nine head of deer in one day. In the fore part of the winter of 1886 I bagged 56 deer. And on one occasion I happened to

MOURITSEN BROS. BUY THE MONTPELIER MILL

Frank Miles closed the deal this week for the sale of all the interests of the Montpelier Milling Company to Victor, Olean and Dave Mouritsen. The young men have all had considerable experience in the milling business, one of them having been connected with Mr. Miles in the operation of the mill for the past year or more. They are straightforward young men and will operate the mill on a strictly business basis. The Examiner trusts that they will meet with the success which they deserve.

STUPENDOUS UNDERTAKING FOR AN IDAHO INSTITUTION

BOISE, July 1.—The most stupendous job ever undertaken by an organization in Idaho confronts the Mountain States Telephone & Telegraph company. Within four months from about the first of August it will have to make a complete inventory of all its property, not only in Idaho but in several other states in which the institution operates.

This is required as the means of establishing rates. Both branches of congress unanimously recognized the justice of the claim of the company for increased rates, which, until Postmaster General Burleson made his order raising them, had remained stationary, notwithstanding the enormous increase in the cost of materials and in wages developing during the war and still in force.

The only difference between the senate and the house was as to the duration of time for continuance of the Burleson rates. The senate said three months, the house said six months. The disagreement was finally settled in conference on the basis of four months.

Now every item of the company's property—every pole, every insulator, every bit of wire, every phone, all the innumerable pieces of mechanism in and out of the exchanges, will have to be inventoried and itemized. When this work shall be completed the state commission of Idaho will use the facts to establish rates.

When it is considered that the items run into the millions for the territory of the Mountain States company, and that each item must be recorded, the scope of the undertaking becomes better visualized.

get three at one shot. Any hunter seldom came into camp without having meat both in the hand and in the bush.

"This would be too slow however for bear hunting. I have captured and killed in my time 109 bear, 58 while residing at North Ogden, Utah, and 51 since living in the valley here. It has been five years since I trapped a Silver Tip in Georgetown canyon, the hide measured 10 feet in length. Twenty-three gallon of oil was taken from this animal.

"I am now past 80 years of age and Mrs. Dunn says the reason that I am not bald headed is because I have used so much bear oil on my hair. We often have doughnuts fried in bear oil and find it useful in many other ways. I never happened to get mixed up in a bear fight, being always too cowardly. Before removing the hide I was always quite sure that the bear was dead."

REPUBLICANS IN CONGRESS KEEP ECONOMY PLEDGE

Floor Leader Mondell Issues List Showing Some of the Things Already Accomplished at the Special Session.

Washington, June 30.—The Republican floor leader of the House, Representative Frank Mondell, of Wyoming, has issued the following review of the accomplishments of the House during the first months of its session:

"The special session of the Sixty-sixth Congress has been in session one month. During that time the House of Representatives has considered and passed the six general supply bills and the railroad deficiency and general deficiency bills which failed in the closing hours of the last Congress at the end of a three months session.

"In the consideration and passage of these bills the House has effected a saving of approximately a billion dollars in the amounts carried in the same bills which failed in the session that expired March 4th last.

"These savings were in the main on three bills, though there were some reductions on all, and on these three bills, the army, navy and sundry civil; the reductions were in round figures approximately as follows:

"On the army appropriation bill, \$400,000,000.

"On the naval appropriation bill, \$225,000,000.

"On the Sundry Civil appropriation bill, \$385,000,000.

"In addition to these reductions the bill to supply deficiencies in railway revenues as it passed the House carried \$750,000,000 instead of \$1,200,000,000 as estimated by the Railroad Administration—a reduction of \$450,000,000.

"These savings taken altogether total nearly one and one-half billions of dollars as the approximate net reduction on appropriations by this first session of the Republican Congress below the proposed appropriations of the closing session of the Democratic Congress and the estimates.

"Not only has the House made an unprecedented record during the thirty days of the session in dispos-

ing of the appropriation bills but the bills have received careful and business like consideration, both in committee and on the floor. The reductions have not been made recklessly, but after due consideration.

"Notwithstanding the very great savings that have been accomplished in the appropriations, it can be said without fear of successful contradiction that no legitimate, essential or useful public service has been injuriously curtailed by the reductions that have been made. The Army and the Navy, and the civil services of the Nation will all be adequately cared for, and provided for under the appropriations that have been made by the House.

"At the beginning of the session the Republican majority in the House in conference promised speedy action on these appropriation bills and also prompt consideration of the program of legislation and investigation. There can be no question but what this pledge has been splendidly kept as far as appropriations are concerned, and in the matter of legislation the House has considered and passed the Woman Suffrage Resolution, the Daylight Saving Repeal, and the bill returning the wires to their owners. And the various committees of the House are actively engaged in the consideration of other important legislation.

"A committee has been constituted to make an audit and study of the expenditures of the War Department during the period of the war, totaling \$16,000,000,000. This committee has organized, sub-divided into sub-committees and is prepared for work.

"The temper and attendance of the House has been good and the membership is evidencing a disposition to earnestly and carefully consider the problems before them. The record up to date is unsurpassed and the outlook for the future bright, promising results useful and helpful to the public interest."

COUNCILMEN DAVIS AND FERGUSON HAVE RESIGNED

The city council is short two members at present, due to the resignations of Joe Davis from the Third ward and R. H. Ferguson from the Second. Their resignations were filed with the city clerk Wednesday afternoon, and were accepted by the council at its meeting that night. Neither of the gentlemen gave any reasons for their actions. Their resignations and the removal of L. G. French from the city, makes three changes in the council since the new administration took charge the first of May.

At a special meeting of the council, held on Thursday night of last week, John W. Jones was appointed to fill the vacancy caused by the removal of L. G. French from the city.

Robt. Birch finally agreed to accept the office of city engineer and his appointment was confirmed at Thursday night's meeting.

The question of creating proposed sewer district No. 2 has been discussed pro and con by the council and citizens at the several meetings held the past week.

Engineer Reilly came in from Idaho Falls Tuesday and met with the council in special session that night. The question was gone over in detail and Mr. Reilly explained several points on which the council was in doubt. He has also talked to a number of the large property owners in the proposed district, which has resulted in removing much of the opposition which prevailed against the creation of the district.

As soon as the vacancies on the council are filled it is likely that a resolution will be passed proposing to create the district.

Robert Ray was given the contract for digging and back-filling the trenches on Jefferson and Washington streets for the new water mains

MANY ATTEND FUNERAL OF LATE JOHN B. DUNN

The funeral services of the late John B. Dunn were held in the Bennington meeting house Friday afternoon, June 27, with Bishop Hulme presiding. Prayer was offered by Jared Parker, after which the choir sang "I Need Thee Every Hour." The speakers were D. Burbank, Alvaro Dunn, M. Mouritsen, W. W. Clark and President Ed. C. Rich, all of whom paid a high tribute to the life and character of the deceased, the interest he had always shown in his children and the young people in general. The impressive song, "Beautiful Isle of Somewhere," was sung by the choir and Mrs. Edward Grosjean sang "Dry Those Tears." Benediction was said by President H. H. Hoff.

The large attendance and many beautiful floral offerings reflected the high esteem in which Mr. Dunn was held.

His remains were laid to rest in the Bennington cemetery, where a son and a number of grand children are buried.

Those in attendance from a distance were, Mrs. D. E. Lindsay, a daughter, of Lovell, Wyo.; Mrs. C. A. Jensen of Riverside, Cal. and Mrs. Janie Hauck of Nampa, Idaho, granddaughters and Mrs. Menerva Shaw and son of Ogden.

which are to be put in. His bid on the work was 69 cents per cubic yard. The new pipe, which was ordered two months ago, arrived Monday, and the work of installing it will begin next week.

Alfred Blaser submitted figures at Wednesday night's meeting for constructing two concrete bridges across Montpelier creek—one on Jefferson street and the other one near the W. W. Clark residence. His figures for bridges 20 feet wide were \$350 each. To bridge the creek the entire width of Jefferson street would cost \$390. The matter was laid over for consideration at the next meeting of the council.

CAMELS TRIM MINERS IN TWO GOOD GAMES

Standing of Teams.	W	L
Rock Springs	7	3
Green River	7	3
Kemmerer	3	7
Montpelier	3	7

The Camels have started to climb out of "the cellar" and they are not going to stop until they reach the top. They took the Rock Springs Miners down the line last Saturday and Sunday and they propose to do the same to Kemmerer today and tomorrow.

The writer was unable to witness last Saturday's game with Rock Springs, but the fans all say it was one of the best games ever played on the local diamond. The score was 4 to 3 in favor of the Camels, and the Miners made two of their three runs on an error by one of the local men.

Fred Framback of Rupert, shot the sphere for the Camels and the manner in which he operated on the mound brought joy and pep to the heart of every Camel as well as to the big crowd of spectators. He sent nine Miners to the bench via the strikeout route. He not only pitches great ball but he is in the game all of the time and fields his position well.

Saturday's score—

Montpelier.	AB	R	H	E
Garrison, cf	4	2	0	0
Lynch, 3b	4	0	0	1
Schoper, 2b	4	0	3	0
McCurdy, ss	4	0	1	1

Cope, c	1	0	0	0
Downey, p	3	0	0	0
Gardner, c	3	0	0	0
Total	35	3	4	2

Sunday's contest was a little on the ragged order, but the Camels had

the best of it right from the start. Mulica occupied the box for the locals for four innings, when he was replaced by Framback.

Oliver heaved the sphere for the Miners for six innings, when he gave way to Marietta.

The Camels took the lead in the first inning and kept it throughout the game. At only one time—in the fifth—did the game look at all serious for the Camels, but in the sixth they sent three men across home plate, which gave them a safe lead, and practically cinched the game.

Aside from a dispute over one decision Sunday, both games were devoid of the wrangling that has prevailed at the other games here this season.

The Miners are a clean bunch of ball players and they took their defeat in the best of spirits. They come back to Montpelier for two games on August 9 and 10.

Sunday's Score—

Montpelier.	AB	R	H	E
Garrison, cf	6	2	3	0

Results. Saturday—Green River 4, Kemmerer 2; Montpelier 4, Rock Springs 2. Sunday—Kemmerer 6, Green River 5, ten innings; Montpelier 11, Rock Springs 7.

The issue of the Nampa Leader-Herald of June 27 was in the form of a "Home-Coming Edition," welcoming the boys of Battery B, for which Nampa furnished 87 men. The citizens of Nampa gave the boys a most hearty greeting upon their arrival home last Friday night. The celebration in honor of their return was held last Tuesday.
