The light fall of snow Sunday morning served one purpose at least—it sent the hearts of the kiddies bounding and their hopes soaring as visions of snow balls, snow forts, fox-and-geese—and Santa Claus with his reindeer—yes, many a delightful vision played in their imaginations. But unless Mother Huldah shakes her feather bed a little more vigorously their hopes must fall.

One of the big stories being told these days is to the effect that when peace is finally declared it will take two years to bring our soldiers back to this country. Army officers are credited with saying with the shortage of ships it will require that length of time to transport them. While this particular reporter has no authentic information on the subject, he is confident this is just wild talk. In less than a year after hostilities have ended, all the American soldiers will be back home with the possible exception of a force of regulars kept there for the purpose of enforcing the terms of peace.

A letter from C. P. Kar, now in government service at Washington, D. C., contains the following information of interest to Emmett people: "Our son Percy has been 'over there' since about July 1st and we have had a number of letters from him since his arrival overseas. Alvin is anxious to go, but too young, although he has the size and physical development of the average man of 19 or 20. When he came to Washington and sought to get some work it was necessary to get a permit from the school authorities on account of his age, at that time less than 16, and to get this he had to be examined by the school physician. When I brought him up to the doctor and he stood about two inches taller than the doctor himself, the latter turned to me with a smile and said: 'It is a joke to call a fellow like this a child.'"

Theodore Roosevelt, who recently celebrated his sixtieth birthday, is seven years younger than General Foch. He is twenty years younger than Gladstone was when he did his best fighting and thirty years younger than Pope Leo when he was managing the affairs of a great organization, attending to business every day and writing excellent verse in Latin. Clemenceau, the fighting tiger of France, is twenty years older than Roosevelt. British statesman, says Arthur Brisbane, are not considered really seasoned for important work until they reach the age of 60. Americans are considered ready for the graveyard at about 58. That ought to be changed, continues Brisbane. The war has taught us victory is won by brain, not mere muscle, and that the brain continues to grow in power fifty years after the muscles decline.

Complimenting Miss Florence Anderson, who is at home on vacation from her school work at Rexburg, a dozen of her friends indulged in a dinner at the Liberty Cafe Tuesday evening. About 9:30 the guests arrived and were ushered into the booth, where the table was laid for the un-superstitious thirteen. Centering the table was a large bowl containing the favors and from this extended streamers, which when drawn out, presented each guest with a jaunty paper cap—these in yellow and orange suggestive of the season's colorings. Dainty place cards of Puritan maids, pumpkins and turkeys were used, and with attendant good spirits the guests enjoyed the three course Thanksgiving menu prepared by Chef Nelson. "Oh its always fair weather, when good fellows get together" applies equally to "the girls", as was amply demonstrated by the jolly hours of this occasion. A ukelele added zest to the chorus as the girls gave vent to spirits long pent up by the closing ban. The guests were the Misses Florence Anderson, Mary Quinn, Clara Peterson, Edna Landers, Frances Landers-Payne Lucy Kieldson, Minnie Allen, Ethel Hazelton, Vera Shaver, Dora Brown, Hazel Brown, Mary Gamage and Maude Burt.

Wholesale grocers believe there will be no general or permanent decline of prices as a result of the arrival of peace, on account of the general food shortage in the world which America is expected to meet. Ocean trade routes are now open, and a hungry world is now crying to the United States for food. This country has been called upon to feed both friends and former enemies. In addition, there will be as many American mouths in Europe to feed for at least a year as there are now.
