

### Why Dread Old Age?

It doesn't matter how old you are, if you keep well and active. Lots of folks are younger at 70 than others are at 60. Lame, bent backs; stiff, achy, rheumatic joints; bad eyesight and deafness are too often due to neglected kidney trouble and not to advancing years. Don't let weak kidneys age you. Use Doan's Kidney Pills. They have made life more comfortable for thousands of elderly folks.

I suffered with aches and pains and aches across my back. Doan's Kidney Pills were recommended and I began taking them. I hadn't taken Doan's long before I was cured."

## CALL TO EMPLOYERS

### Paramount Duty to Aid Work of Selective Boards.

Can Perform Great Service to Country by Helping Work of Classifying Registrants Under the Selective Service Act.

Provost Marshal General Crowder has made public a communication addressed to employers of labor and other representatives of industry throughout the country concerning their share of responsibility in the classification of the new registrants under the selective service act.

General Crowder says: I have noticed, in the general expressions of the public attitude which reach this office, two frequent features which lead me to the present comments. One of these features is the belief that the process of awarding deferred classification to a registrant requires merely the filling out of the questionnaire, and that the selective service boards will perceive the propriety of making the deferment, without the assistance furnished by the registrant's formal claim indicating the deferment desired. The other feature is the employer's failure to realize his responsibility to intervene in aiding the board's determination, and therefore to inform himself fully on all the considerations which should affect the decision as to deferment.

1. As to the first mentioned belief, it must be pointed out that if it were universally acted upon, the process of classification would be seriously hampered and delayed. Someone must indicate that the individual case is one which should arrest the special attention of the boards in respect to the registrant's occupational status. The boards do not possess a superhuman omniscience.

Boards Will Make Examination. The boards will do all that they possibly can, on their own initiative, to reach a just decision by a complete examination of the questionnaire, even where no claim is expressly made. A registrant is therefore at liberty, if he sees fit, to trust to the scrutiny of the boards to discover the necessity for his deferment.

Nevertheless, the boards will welcome and will need all the aid that can be furnished by the indication of a claim made for deferment. With this aid, the process will become a simple and speedy one.

2. Why should the employer, or other third person, in such cases, make the claim? Because the employer in this situation represents the nation, because (in the statutory phrase) "the maintenance of the military establishment or of national interest during the emergency" requires that some well-advised third person should look after that national interest, which the registrant himself may not have sufficiently considered.

It is often forgotten that the selective draft is only one element in the depletion of a particular industry's man-power. A second and large element is found in the voluntary withdrawals for enlistment; how large this is may be seen from the circumstance that the total inductions by draft have reached some 2,000,000, while the total enlistments in army and navy amount to some 1,400,000—nearly three-quarters as many. A third element, very large, but unknown as to its precise extent, has been the transfer of labor power from one industry to another, namely, into the distinctively war industries offering the inducement of higher wages. How relatively small, in actual effect, has been the effect of the selective draft is seen in the fact that, for all the occupations represented in the 8,700,000 classified registrants of January, 1918, the percentage of the entire industrial population represented by the class 1 registrants amounted to only 6 per cent. It ran as low as 3 per cent for some occupations, and correspondingly higher for some other occupations; but the national average was only 6 per cent. Any notably larger depletion in particular industries must therefore have been due, partly to enlistments, and in probably greater degree, to voluntary transfers into other industries.

Must Remember Nation's Needs. These other influences are therefore to be kept in mind by employers and others, in weighing the question whether the best solution, in the national interest, is to ask for the deferment of individuals or groups of men. Such deferments may assist the immediate situation in the particular establishment; but they merely force the army and the navy to seek elsewhere for the same number of men thus deferred. The quantitative needs of the military forces are known and imperative; and any given quantity of deferments will ultimately have to be made up by the depletion of some other occupation. Thus it becomes the employer's duty to consider these aspects of deferment, in seeking that solution of his own problem which best comports with the national interest.

The cessation of enlistments will henceforth protect industry against one irregular and uncontrollable source of derangement. It will correspondingly throw upon the selective service system the greater responsibility for an intelligent and discriminating selection made in the light of industrial groups of workers. To fulfill this responsibility they must now prepare themselves even more carefully than hitherto. They will find the boards heartily ready to co-operate with them to the utmost.

## LENINE-TROTZKY KAISER'S AGENTS

Papers Secured by U. S. Show Treachery of Bolshevik Chiefs.

### BETRAYED RUSSIA FOR GOLD

Documents Given Member of Committee on Public Information Also Reveal How Germany Plotted Against U. S. in 1914.

Washington.—Proofs removing any doubts that Nicolai Lenine and Leon Trozky, the bolshevik leaders, are paid German agents—if indeed any doubts have remained—are laid before the world by the United States government in an amazing series of official documents disclosed through the committee on public information.

Secured in Russia by Edgar G. Sisson, representing the committee (who was in that country during last winter, 1917-18) these documents not only show how the German government through its Imperial bank paid its gold to Lenine, Trozky, and their immediate associates to betray Russia into deserting her allies, but give added proofs that Germany had perfected her plans for a war of world conquest long before the assassinations at Sarajevo, which conveniently furnished her pretext.

#### Hun Plots Against America.

These documents further show that before the world war was four months old, and more than two years before the United States was drawn into it (in 1914), Germany already was setting afoot her plans to "mobilize destructive agents and observers" to cause explosions, strikes, and outrages in this country, and planned the employment of "anarchists and escaped criminals" for the purpose.

Almost ranking in their sensational nature with the notorious Zimmerman note proposing war by Mexico and Japan upon the United States, these documents lay bare new strata of Prussian intrigue, a new view of the workings of kultur to disrupt the allies standing between the world and kaiserism. They disclosed also a new story of human treachery for gold.

The intrigue appears to have been carried down to the last detail of arrangement with typical German system.

#### Revolution Staged by Berlin.

Not only do the disclosures prove that Lenine, Trozky, and their band are paid German agents. They show that the bolshevik revolution, which threw Russia into such orgy of murder and excesses as the world seldom has seen, actually was arranged by the German general staff.

They show how the paid agents of Germany betrayed Russia at the Brest-Litovsk "peace" conference; how German staff officers have been secretly received by the bolsheviks as military advisers; how they have acted as spies upon the embassies of the nations with which Russia was allied or at peace; how they have directed the bolshevik foreign, domestic and economic policy wholly in the interest of Germany; and to the shame and degradation of Russia.

Originals of documents, photographs of originals, and typewritten circulars, some of them marked "very secret" or "private," and many of them bearing the annotations of the bolshevik leaders themselves; some of them containing references to "Comrade Trozky" or "Comrade Lenine" comprise the record.

Some of the originals, it is shown, although deposited in the archives of the bolsheviks, were required to be returned later to representatives of the German general staff in Petrograd that they might be destroyed.

### JUST THE OLD HUN TRICK

London Press Ascerts Austria's Peace Conference is Cynical and Insincere.

London.—The Daily Mail, under the heading "The Word of Austria, but the Kaiser's Voice," says the Austrian invitation to the allies to open "a confidential, nonbinding discussion" of peace terms is another form of the old German trick.

The Daily Telegraph says: "Negotiations at the present moment even though they brought temporary peace would only postpone the final struggle between night and right. So long as the kaiser and his pan-Germans direct with irresistible authority the destinies of Germany so long can there be no question of an armistice or purely academic negotiations. The note is disingenuous, cynical, and insincere—an attempt to divert the entente powers from a resolute prosecution of the war."

The Austrian note is regarded in this country as a maneuver to obtain needed breathing space for the sorely tried central empires and to impress their own people with the desires of their rulers for a cessation of the struggle which is wearing them to a shadow.

Undoubtedly it is a part of a combined peace offensive which has been expected for some time, and which has taken definite form within the last few days. It is one of three moves which have been made almost simultaneously by enemy states.

### Identified.

A passenger train arriving at a station in Oklahoma with some two hundred soldiers, many of whom were officers, attracted the attention of two negroes as they paraded. As the officers walked by "Sambo" and "George" would exclaim, "Dat's a captin," or "He's a lieftenant," as the case might be.

At last a French soldier in his blue-gray uniform passed by. "What's he, Sambo—a kunnel?" asked George.

"No, George, dat's dis yer General Staff."
