

It Costs More

FOR several years material and labor costs have steadily increased, and all transportation charges have been advanced. That means that every operation in the giving of telephone service has increased steadily in cost.

It costs more to operate a switchboard, keep the books, do the billing and collect the accounts.

It costs more to install a telephone.

It costs more to repair a telephone.

It costs more to take out a telephone.

It costs more to move a telephone.

It costs more to string a circuit, repair a wire and to set a new pole.

Every piece of equipment and every item of supplies costs more.

And Meanwhile—

Our revenues maintain practically an even level.

The Mountain States Telephone and Telegraph Company

A Tender Juicy Steak

There is nothing more delicious nor more satisfying than one of these steaks that only our chef knows how to prepare.

Order it just as you like it—medium, rare or well done—and you'll enjoy every bite.

They're all full of flavor, served clean and appetizingly, and the price is moderate.

AT THE BOSTON CAFE

Strayed

from my farm near Jerome, on November 4th 1918. One light gray mare weight about 800, roached mane, blotc brand on left thigh. One blue mare, roached mane, weigh about 800, wire cut on neck, will pay reasonable reward for recovery or above described mare.

G. D. Finch, R.F.D. 1, Jerome, Idaho

Fjord and Farewell.

The word "fjord" comes from the old Norse, survives in the modern words "firth" and "frith," is connected with the English "fare," meaning to travel, and used in the word "farewell," and meant, most probably, in the first instance, says the author of "Norwegian Pictures," water safe for navigation on account of its sheltered position.

Delicate Compliment.

Charles received a wagon on his birthday and promptly broke a wheel. His father soon mended it. "Papa," he said, "you are smarter than you look."

World's Finest Church.

November 18 is the anniversary of the dedication of St. Peter's in Rome in 1626. This largest Christian house of worship was begun about 1450. In 1546 Michelangelo was put in charge, who redesigned the dome. The height to the top of this dome is 435 feet, and the building is one of the most imposing in the world.

Some Velocities.

When the temperature is 32 degrees, sound travels 1,090 feet a second and one additional foot a second for each additional degree of temperature. Electricity over a wire where there is no resistance travels 192,924 miles a second.

Antique Furniture.

Those who possess pieces of antique furniture should devote personal attention to them, and especially to any of old oak, which should be kept in condition by periodical rubbings with flannel dipped in a mixture of beeswax, oil and spirits of turpentine. White painted French furniture is best cleaned with paraffin.

Ammonia.

Ammonia is found in minute quantity in air, and is a natural product of the decay of animal substances. It is procured artificially by the destructive distillation of nitrogen organic matters, such as bones, hair, horns and hoofs, and is largely obtained as a by-product in the manufacture of illuminating gas from coal.

Literature.

Everyone knows what books are. But what is literature? It is the ark on the flood. It is the light on the candlestick. It is the flower among the leaves; the consummation of the plant's vitality, the crown of its beauty, and the treasure house of its seeds.—Henry J. van Dyke.
