### PREVENT DODDER IN ALFALFA

Infested Spots in Field Should Be Closely Mowed, Covered With Hay and Burned.

Care should be taken not to use alfalfa seed infested with dodder. Dodger seeds may be removed by screening the seed in small quantities through a 20-by-20 mesh sieve made of 34 wire. Dodder-infested spots in an alfalfa field should be closely mowed, the stubble sprinkled with kerosene, then covered with dry hay and burned.

### MAKE GOOD CHICKEN ROOSTS

Should Be Built Two or Three Feet From Floor With Dropping Board Eight Inches Below.

Good chicken roosts may be made of two by two inch material with upper edges rounded. They should be built on the same level, about two or three feet from the floor. If a dropping board is used it should be placed about eight inches below them.

**Liberal Use of Manure.**  
A liberal use of barnyard manure generally is advisable when the soil is rather thin.

### Lame Back Relieved

For a lame back apply Chamberlain's Liniment twice a day and massage the muscles of the back over the seat of pain thoroughly at each application.

### GOOD ROADS 1919 PROGRAM

Michigan Starting on Greatest Era of Highway Construction in History of State.

Michigan is going to start on the greatest era of road building in the state's history, declares Edward N. Hines, first vice president of the Detroit Automobile club. Mr. Hines adds that Michigan highway constructors have seen the folly of their ways in building roads too narrow and of types not permanent. They will correct this in the future.

Every citizen, including the farmer, business man, laboring man and the resident of the small town, sees the need of permanent highways, the case being proven to them by wartime conditions, according to Mr. Hines. This was brought about by the inadequate freight and express service, the food situation and the general need to conserve labor wherever feasible.

"Had the war continued," Mr. Hines stated, "I had records of projects for building of concrete roads in the state that likely would have been put through by the proper authorities in Washington because of their war necessity, there being some 656,000 square yards. Other projects for concrete roads in Michigan financed by the Covert act whose issues were sold and the money not expended during the past season, and direct tax levies amounted to 1,347,909 square yards, a total for the state of close to 2,000,000 square yards. All of this will be built in 1919 and in all probability this yardage will be doubled by the time the road construction work begins in the spring.

"Wayne county's concrete roads have stood the test since the United States entered the world conflict. The normal traffic, plus the enormous war haulage by army trucks over concrete roads seven, eight, nine and ten years old, was handled satisfactorily and the highways held up in perfect condition. Eyes of the road builders throughout the country have been focused on Wayne county's roads and the practical demonstration of the value of permanent roads has been proven here in the vicinity of Detroit.

"Wayne, leader among the counties of Michigan in mileage of improved roads, asked for no county road tax this year and will have to rely on the money received from automobile licenses. Consequently 1919 will not approximate previous years' programs because of lack of funds to push the work to the limit. We expect to get more for a dollar in 1919, though, as

Neglect of Maintaining Roads Is Not Only Tying Up Transportation and Handicapping Industry, but Is Costing United States Many Millions of Unnecessary Expense.

the labor turnover will not be as great and material prices will have a tendency not to incline towards higher levels.

"Among the projects which will be carried out next year are the following: One-half mile section in the village of Wayne, from Michigan avenue on the Wayne road south, connecting with the Huron River drive. This road will be of concrete, 20 feet wide. Belleville-Romulus branch of the Huron River drive and Outer Belt drive is to be finished. Delivery of stock on this job has already been started and will be kept up as long as good weather continues. Warren road, which will be concreted to the Washtenaw county line in time, is to be taken care of by another road crew. This work will go on until the 1919 funds are exhausted. The Lahser road, from Redford north to the Oakland line, connecting with the good road in Oakland county, will also be completed.

"We will pay considerable attention to widening some of the main routes and will maintain all the previously built roads in a first-class condition."

**Public Necessity.**  
Good roads are a public necessity and there is no use trying to stop progress by complaining about the cost, or objecting to the automobile. If every auto were destroyed, good roads would be as much needed as with the autos.

**What Poor Roads Mean.**  
Lack of proper roads is costing the American people \$1,000,000 for every working day. That is the conclusion of the Corn Exchange National bank of Philadelphia.

## The Fire and the Flavor

Flavor in cooking is largely a matter of exact control of heat. With Puritan Oil Cookstoves you can regulate cooking heat perfectly. They light instantly—give any heat for frying, simmering, boiling or baking. Set the flame low, medium or high—there it stays. No fire tending. None of the kitchen heat or grimy work of a coal stove. Like gas for convenience. Like gas the flame plays right on the cooking utensil—cooks quickly.

Sold by all dealers.

For best results use Con-o-co Safety Oil.

### Useless Equipment.

A soldier just released from the service was the guest of friends at a dinner in celebration of his return home. The waiter placed an elaborate silver service around the table. The soldier looked at the showy array, carefully selecting one knife, one fork and one spoon. Shoving the rest of the silver from him, to the surprise of his hosts, he remarked: "Too much equipment to keep clean."—Judge.
