

The Best Country a Crow Ever Flew Over

Having in mind particularly Lewis and Idaho counties in the state of Idaho. The impression one gets by talking with the people locally is that 1918 crop averaged about one half the usual crop grown in this section while it is generally conceded in other sections your crop of grain is from 50 to 100 percent larger than in other well known districts which is true. To continue this prosperity, good roads to haul your grain to the market and up-to-date tools and machinery to cultivate your land are essential.
