Dave Farmer says there should be an association of Meridian farmers to prospect for a market for clover seed next fall, if we do not wish our crop to go begging for buyers. He calls attention to the fact that there was one lone buyer on the Meridian market this year, a gentleman representing a Portland seed house. This is hardly enough competition to make business brisk.

HEALING WOUNDS OF WAR BIGGEST JOB OF RED CROSS

Broken Homes and Men Must Be Rebuilt—Re-education of Disabled Soldiers for Future Usefulness.

They are already rebuilding the broken homes of France. And they are already rebuilding the broken men. Over here we, too, are getting ready to devote to the same task the best of American skill and genius.

For each million of our men who enter action ten thousand will be so crippled as to need mechanical appliances, and they will have to be specially educated to use these so that the action of the missing limbs will be duplicated as closely as possible.

If the Germans had had the entree to certain parts of France last fall they might have seen fields that they once destroyed yielding their best crop in years. And they might have seen some of these fields being reaped by men they thought they had done for.

They were men with varying degrees of leglessness and armlessness. Some ran (and repaired) tractor engines. Some, with both arms gone above the elbows, spaded the ground with the aid of a clever mechanism to which the spade was hooked. One man, who also had but the stump of each arm left, not only used a scythe but kept it sharp.

The Red Cross is running a five-hundred acre farm in France on which the maimed are taught the use of farm implements and the care of domestic animals, and is already laying its plans for great work for the maimed in this country. The end and aim of all its work will be to fit men to return to their own homes, and re-enter, as nearly as possible, their former place in life.

Sometimes these re-educated men take a far higher place in the community than they occupied before. For instance, men who have been automobile mechanics, and whose legs were maimed, have been re-educated in mechanical drafting. Bridge work-
