

# THE KETCHUM KEYSTONE.

Entered at the Postoffice at Ketchum, I. T. as second class matter.

## TOWN TIDINGS.

A little blustery this evening.  
Prospectors daily arriving from the hills.  
The new Baxter Hall is going up rapidly.  
Spring chicken at the Bon Ton Restaurant.  
Elegant diamond pins at Reiff's from \$75 to \$300.  
New milk for sale in any quantity at the Bon Ton Restaurant.  
A new show-case filled with the choicest cigars at McLennan's.  
M. C. McLennan keeps all kinds of tobacco cigars and smokers' articles.  
Col. E. Green, of the P. M. & S. Co., returned from San Francisco Sunday evening.  
Waltham's patent dust-proof watches just received at J. B. Reiff's. These watches are perfectly dust-proof.  
A Booth's celebrated "Oval Brand" of fresh oysters in any quantity on ice at the Bon Ton Restaurant.  
Mr. Dickenson, of Dickenson & Bramble, visited Ketchum yesterday with his wife. They were guests at the Philadelphia Co's parlors.  
O. Peck & Co. have come to town with a steam saw, and are prepared to saw up cordwood in any lots from five to five hundred cords. Leave orders at the machine or at the store of Pinkham & Lewis.  
Col. Broadhead came down from Sawtooth yesterday and reports his wife doing well under treatment of Dr. Hill of Vienna. The Colonel himself was pretty badly bruised in the runaway accident, but not seriously, while the boy escaped unharmed.  
Eight miners additional have been put to work on the Elkhorn mine, making a total force of thirty-eight miners. We are informed that operations on the Elkhorn will be pushed with all possible force for the next month or six weeks, at the end of which time the regular crew will be reduced about one-half, to the winter force.  
Vendor, the Canadian weather prophet, has afflicted a patient world with another weather prediction, which is as follows: "The autumn will be wet mild and open. No snow at end of year. A rather severe October, but open weather afterward. January, 1884, wet and open. Unusual warmth for winter of 1884. No ice, or hardly any."  
Here is a warning for the author of "Sweet Violets" and "Only a Pansy Blossom." The author of "See that my grave is kept green" is an inmate of the Indiana penitentiary. Contagious disease calls for heroic treatment. That the aforesaid songs should be classed "contagious" there should be no doubt. Everybody has caught 'em to a greater or less severity.  
The Rev. George Ritchie, Mrs. J. H. Ritchie and son, the Misses Crawford, W. G. McDowell and Clancy Lewis boarded the train in Hailey Monday evening for Salt Lake City. Mr. Ritchie will remain there for a few days' visit, and the others will pass on; Mrs. Ritchie, son and Clancy Lewis to Chicago, the Misses Crawford to their home in Ames, Iowa, and Wiley McDowell to his home in Dayton, Ohio.  
The departed ones were all well known in Ketchum society, and their departure is much regretted. Our best wishes are with them.  
W. H. Broadhead, of Sawtooth, thus writes to the Salt Lake Tribune: "I notice an item in the Daily Tribune, of the 30th ultimo, headed Sawtooth Mines, wherein it stated that the Minnie Alto claim, adjoining the Scotia, had mill tests of eight tons of first-class and five tons of second-class ore at the Columbia & Beaver mill, the largest going 42 ounces." This statement is not correct. The ore referred to above came from the Eureka mine, adjoining the Scotia. The Minnie Alto is hardly known in the district, and has never produced a ton of ore. I trust you will make this correction, as such misrepresentations are liable to do injustice to the mining interests of this district.

## The Weather.

The eight days' storm has passed away, and yesterday morning the welcome sunlight once again spread its genial influence over the land. The storm has left the sky clear, the atmosphere pure and the roads in not a bad condition. All Wood River rejoices to feel that a good long Indian summer has set in, and the teaming, mining and milling industries are given a new impetus on every hand. We may now safely count on a month or six weeks of the fairest weather.

## Smelter Items.

One forty-ton stack at the Philadelphia works was closed a week since. The two fifty-ton furnaces will continue to run steadily from this on, making a daily billion output of about 300 bars. Colonel E. Green, General Manager, returned from San Francisco Sunday evening, and will probably remain several weeks.  
Messrs. Foote and Stetson, of the Philadelphia smelters, took in a dance at Hailey last evening.

# IN FULL BLAST!

Just Opened, the Largest and Most Complete Stock of

## Tinware, Hardware, Stoves, Ranges, Glassware, Crockery, Paints, Oils, CHANDELIERS, LAMPS, & C.,

THAT EVER CAME TO KETCHUM.

Call and see us, and if you don't get better goods and lower prices than you ever had before, then our name is not COFFIN BROS.

### THE BALTIMORE GROUP BONDED

To James Hickey, of Salt Lake, for \$50,000.

The Baltimore group of claims, one mile east of the Elkhorn, located and owned by J. C. Cobough and Ed. Preston, has been bonded to James Hickey, of Salt Lake city, for \$50,000. This property includes the well known Baltimore and Victoria mines, and is considered one of the best in the vicinity. It was discovered and located last June by J. C. Cobough, since when it has developed into a good-looking mine, and is generally thought now to be worth every cent, if not more, than the bond is placed at.  
There are upwards of one hundred tons of ore on the dump, taken out in development work, and large bodies are uncovered and exposed, ready for extensive stoping. We mention that the owners are not anxious to sell at this figure, and if the purchasers fail to come to time at the end of a brief period they will be content to commence ore extracting operations on a large scale.  
Cobough & Preston are now employing a double shift, both in the Baltimore and Victoria. They report the property in excellent condition.

### THE SIBERIA SOLD.

A. Himes Sells a Two-Third Interest in the Siberia, on Deer Creek, to J. C. Cobough for \$1,000.

Two-thirds of the Siberia prospect located on Deer creek, formerly owned by J. C. Cobough, and subsequently relocated by Mr. Himes, has been sold to the former for a cash consideration of \$1,000.

The Siberia is an unknown property, but we learn that its ore contains gold and silver in good paying quantities, and the ledge, which lies between good walls, and in a good formation, needs only development to become a paying property. It is yet developed no further than the grass roots, but gives every indication of a permanent ore body.

### ACCIDENT AT SAWTOOTH.

Mrs. Col. Broadhead is Thrown From a Carriage and Has Her Right Arm Broken.

News reached here this morning that an accident occurred one mile this side of Sawtooth Sunday morning, in which the team driven by Colonel Broadhead ran away, throwing the Colonel and his wife and son from the carriage, Mrs. B. receiving a severe stroke from the upsetting vehicle, which resulted in breaking her right arm just below the shoulder. It seems that the Colonel, his wife and son had started toward Galena, and had gone about one mile out from Sawtooth when the neck yoke in some way dropped from the horses, and the tongue consequently fell and running into the ground frightened the horses. They started to run, when the Colonel headed them up hill. The tongue then ran into the ground, upset the carriage and threw the entire number to the ground. In falling Mrs. Broadhead was struck by a wheel across the arm, and received the injury referred to. The Colonel and his son were also bruised but not seriously. A conveyance was at once brought from Sawtooth, by persons who happened to see the accident, and Mrs. B. was taken home. She has since been under the care of a physician, and, report says, doing well.

### The End of the World.

The end of the world is confidently predicted by devout Moslems to be approaching with the close of the Mohammedan thirteenth century on Nov. 8. Tradition declares that in the present month, during the Ramadan fast, the sun shall rise in the west, the day of mercy and forgiveness shall cease, and that of judgment and retribution begin. Thus, a proclamation has been issued from the Mecca, warning all true believers to prepare for the coming day, which the Times of India tells us has been widely circulated, and has created a great impression. A fanatical pilgrim to the prophet's tomb, at Medina, Mohammed Suleb, declares that Mohammed appeared to him in a dream last March and warned him of the coming end. There are twenty-five signs to be fulfilled before the great day, and some of these the Mohammedans already recognize, the closing sign being the coming of Iman Mahdi, the director, with his troops, bearing large ensigns, and a mighty wind, which shall sweep away the souls of all who have but a grain of faith in their hearts. After the Mahdi's reign, the trumpet shall sound two blasts, the dead arise, and the judgment begin.

William Faulkner, of Burlington, Vt., is a striking instance of a man whose conscience troubles him for a deed which was decided by the courts to be meritorious. Twenty years ago under great provocation he shot and killed a ruffian, for which he was promptly acquitted on the plea of justifiable homicide. Nevertheless, for the past twenty years he has found it impossible to get any rest after three o'clock in the morning. Remorse seizes him at that hour, and for several hours afterward he is driven from his house. As there is no other place open at this time he has made it a practice for many years past to go to the press room of one of the morning dailies, where he is always looked for exactly at 3:15. No one can understand why he should be thus troubled with remorse for a crime of which he has been legally declared innocent.

The scientists have a new nut to crack, and one that will probably prove nearly as hard as the monkey-man question. It is that of one of the most singular freaks of the recent volcanic eruption in Java, was the carrying, in the midst of the molten lava a bed of solid ice of enormous size, which had been emitted from the bed of one of the craters. It was carried along by the current and landed on the extreme northeast corner of the island. This bed of ice was surrounded by the thick layer of sand and scoriae which are non-conductors of heat. It must be an interesting condition of things subterranean that can send up molten lava and ice at the same time and apparently from the same locality. Or, perhaps, the crater has opened some underground channel that connects with the North Pole, and at last demonstrates the correctness of the Symms' Hole theory.

The Battle Mountain (Nev.) Messenger says that there are hundreds of cattle on the Humboldt that are perfectly blind. So far no cause can be assigned for the disease. A scum forms over the ball of the eye, entirely depriving the animals of sight. A few have but one eye attacked. The blindness lasts about twenty days, and the animal not being able to travel in search of food, loses considerable flesh.

Clancy Lewis, the son of L. L. Lewis who has been subject to nervous disarrangement, is en route East to receive scientific medical treatment in a Chicago institute.

Messrs. E. R. Leonard and Dr. McMurry, the latter of Salt Lake city, came up from Hailey yesterday to visit the Philadelphia smelters.

### The End of the World.

Mr. Uhl wishes us to inform his patrons that he has secured the services of a first-class shoemaker, who will pay strict attention to work in his shop until such time as he is able to resume his business.

### Guyer Hot Springs at Ketchum Idaho.

Large and commodious buildings have been erected containing parlors and rooms for guests and visitors suitably furnished. A good restaurant connected where board and lodging is furnished at reasonable prices, a number of bath rooms, also a large plunge and swimming bath for both ladies and gentlemen provided, for all who may call to enjoy the exhilarating and medical effects of this celebrated water of which Prof. Doremus gives the following analysis:

Sodium Chloride	per gal in gr.	3,578.
Sodium Carbonate	"	6,965.
Calcium Sulphate	"	6,574.
Magnesium Sulphate	"	534.
Magnesium Chloride	"	914.
Traces of Iron	"	1,240.

Total Solids 22,805.  
I. I. Lewis, Manager.

Bills, Cards, Blanks, Tickets, Posters, Receipts, Programmes, Pamphlets, Bill Heads, Statements, Note Heads, Letter Heads, Visiting Cards, Funeral Notices, Wedding Invitations, And everything else commonly done in a printing office. Call and see samples and learn prices.

### APPLICATION FOR PATENT.

Notice No. 3.

U. S. LAND OFFICE, HAILEY, IDAHO.

August 20, 1883.

NOTICE is hereby given that the Philadelphia Mining and Smelting Company, an organization incorporated under the laws of the State of New Jersey by its authorized agent, Edmund Green, whose Post Office address is Ketchum, Idaho Territory, has this day filed its application for a patent for fifteen hundred linear feet of the

### TEMBROOK LODE MINING CLAIM

Or vein bearing silver and other minerals with surface ground 997 feet, average, in width, situated in Warm Springs Creek Mining District, County of Alturas and Territory of Idaho, and designated by the field notes and official plat on file in this office as Lot Number 35, and described in said field notes and official plat with magnetic variation at 19 degrees east and 30 minutes East as follows, to-wit:

Beginning at the discovery point and running thence S. 6 deg. 39 min. E. 660 feet to center of south end line of claim; thence N. 61 deg. 01 min. W. 300 feet to corner No. 1; thence S. 61 deg. 01 min. E. 660 feet to corner No. 2; thence N. 6 deg. 39 min. W. 600 feet to corner No. 3; thence N. 17 deg. 25 min. E. 901.2 feet to corner No. 4; thence N. 61 deg. 01 min. W. 594 feet to corner No. 5; thence S. 17 deg. 47 min. W. 900 feet to corner No. 6; thence S. 6 deg. 39 min. E. 600 feet to corner No. 1, the place of beginning survey of exterior boundaries of claim, containing an area of 18 and 2/100 acres. From corner No. 1, U. S. M. No. 2 bears N. 53 deg. 25 min. E. 2322.6 feet distant.

The nearest known locations are the Niagara, Hathaway and Hub No. 2.

Any and all persons claiming adversely any portion of said "Tembrook" lode mining claim or surface ground are required to file their adverse claims with the Register of the United States Land Office at Hailey, in the Territory of Idaho, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

It is hereby ordered that the foregoing Notice of Application for Patent be published for the period of 60 days (ten consecutive weeks) in the KETCHUM KEYSTONE, a weekly newspaper published at Ketchum, Idaho.

HOMER L. POUND, Register.

WM. HYNDMAN, Attorney for claimant.

[Aug. 22.]

### APPLICATION FOR PATENT.

Notice No. 10.

UNITED STATES LAND OFFICE,

Hailey, Idaho, October 1st, 1883.

Notice is hereby given that the Pocaterra Mining Company, a corporation duly organized and existing under and by virtue of the laws of the State of New York, with its principal office in the city and county of New York, and doing business in the County of Alturas, Territory of Idaho, by its legally authorized agent, W. H. West, whose Post Office address is Hailey, Alturas county, Idaho Territory, have made application for a United States Patent for the

### "WASHINGTON"

Lode Mining Claim, situate in Wood River Mining District, Alturas county, Idaho Territory, consisting of 1,500 linear feet of the lode, and surface ground 600 feet wide, being Lot No. 41, and described in the field notes and official plat on file in this office as Lot Number 41, with magnetic variation at 19 degrees east, as follows:

Commencing at the discovery point of this claim and running North 2 degrees and 55 minutes west along the center line of the northern end line of the claim 600 feet to the center of the northern end line; thence, North 87 degrees and 08 minutes east 300 feet to corner No. 1; thence South 12 deg. 25 min. and 55 minutes east 1,500 feet to corner No. 2; thence, South 87 degrees and 08 minutes west 600 feet to corner No. 3; thence, North 2 degrees and 55 minutes west 1,500 feet to corner No. 4; thence, North 87 degrees and 08 minutes east 600 feet to corner No. 1, the place of beginning survey of exterior boundaries, embracing an area of 23.66 acres, applied for. No conflicts. From corner No. 3, U. S. M. No. 2, bears North 9 degrees west 371 feet feet distant.

The said mining claim being of record in the office of the County Recorder of said Mining District, at Hailey, in Alturas county, Idaho Territory. The nearest known location being the "Grand Prize."

Any and all persons claiming adversely any portion of the said "Washington" Lode Mining Claim or surface ground are required to file their adverse claims thereto with the Register of the United States Land Office, at Hailey, Idaho Territory, within the sixty days publication thereof, or they will be barred by virtue of the provisions of the Statute in such cases made and provided.

HOMER L. POUND, Register.

I direct that the foregoing notice of application for Patent be published for the period of sixty days, ten consecutive weeks in the KETCHUM KEYSTONE, a weekly newspaper published at Ketchum, Alturas county, Idaho Territory.

HOMER L. POUND, Register.

Oct. 3, '83-10w.]
