

HOW A FRIENDSHIP GREW

The Story

Whether Hand Sapolio got a more enthusiastic welcome in homes where Sapolio was an old and tried friend, or where it was a stranger, is a question. Where women had come to rely on Sapolio for rapid, thorough cleaning in every part of the house except the laundry, they commenced without loss of time, to avail of this new prize. Grubby little hands, and stained, work-worn older ones, whitened, softened, and smoothed out as if by magic, callous spots disappeared, and complexions cleared. Children ceased their strenuous objections to the scrubbing up process, because it became a

Do you want a clear and healthy skin?

pleasure. It freshened up the hands after dish-washing, removing the most disagreeable feature of that necessary task. It was found to keep delicate baby skins from chafing better than saive or powder, and the crowning note in the song of delight came when an adult member of the family used it in a full bath, and realized that a Turkish Bath at a cost of one dollar was outdone by a small fraction of the little, ten-cent, velvety cake. But, strange though it may seem, there were people who had not learned to prize Sapolio. To these the advertising of Hand Sapolio came as a surprise. Sapolio, a scouring soap,

THE FIRST STEP away from self-respect is lack of care in personal cleanliness. The first move in building up a proper pride in man, woman, or child is a visit to the bathtub. You can't be healthy, or pretty, or even kind, unless you are clean. Use HAND SAPOLIO. It pleases everyone.

adapted for the hands, the face, the general toilet? Impossible, it would be horrid. Who ever heard of such a use? Finally a bold shopper carried home a cake. Does it look like kitchen Sapolio? No one is sure, and a cake of that is bought, and comparison made. Behold a family using both the Sapolios for every conceivable purpose, and comparing notes! After easily and quickly cleansing a greasy pan with Sapolio, Jane thought the other would be gritty, and was astonished at the smooth, dainty lather. Another was certain it would harden

the hands and could scarcely realize how soft and "comfy" they felt after the washing.

Then began the excitement of adventure; what would the new soap NOT do? A girl tried a shampoo. Her hair, pretty, soft and silky "went up" perfectly, with none of the unmanageableness that generally exists for a full week after the usual process. A man used the delightful lather for shaving.

Game Name to Small Coinage.

Sir John Swinburne obtained the distinguished honor of having the three-penny bit named after him throughout South Africa. When he went to Cape Town first there was no copper coinage, and he was provident enough to take out a sackful of the smallest "collection in silver," to be used for tipping. So throughout the colony this coin is still known as "Sir John," when it is not called a "tickle."

Benefit of Slight Fasting.

Fasting for one day will often prevent a serious illness. More people suffer from eating too much than too little.

To Disinfect Dishes.

Soda, in a 2 per cent solution, is recommended by Prof. Esmarch of Göttingen as the best means of disinfecting eating utensils.

and felt no need for cold cream afterwards. A pimply face was treated to a daily bathing with the full suds, and promptly became clear. Tartar on the teeth yielded to it, and that

WHY TAKE DAINTY CARE of your mouth and neglect your pores, the myriad mouths of your skin? HAND SAPOLIO does not gloss them over, or chemically dissolve their health-giving oils, yet clears them thoroughly by a method of its own.

had a tendency towards hardening of the skin regained their natural condition, till another family had joined the chorus of friendly acclaim. And so it is everywhere, those who know the "elder brother" welcome the newcomer, for the sake of the first known, and those who meet both for the first time are plunged into a whimsical worry as to which they could better spare if they had to make a choice.

TRY HAND SAPOLIO.

Its steady use will keep the hands of any busy woman as white, untanned and pretty as if she was under the constant care of a city manicure. It is truly "The Dainty Woman's Friend," in the suburbs or on the farm. Those ugly dark brown streaks on the neck, arising from tight collars, and the line where the sunburn stops, can be wiped out by the velvety lather of HAND SAPOLIO. It is, indeed, "The Dainty Woman's Friend."

Burglars Wear Gloves.

Four burglars, arrested in the act by the London police, were all wearing gloves in order not to leave finger prints behind them.

CHEAP EXCURSION TO CITY OF MEXICO.

Under Management of The Utah-Mexican Sugar & Livestock Company.

Only \$75.00 round trip. Tickets good leaving Utah October 21st. Final return limit December 21st, 1905. Route going via Rio Grande—Santa Fe and Mexican Central Railways. Returning via Mexican Central—Santa Fe and Union Pacific Railways.

For further information see local representatives of above lines, or Heber M. Wells President, or James T. Hammond Secretary, Utah-Mexican Sugar & Livestock Company, Salt Lake City, Utah.

The Big Wind in Oregon.

Port Oxford evidently is a very windy place. A gentleman just from there reports that last week the wind blew a sheep up against a barn, about twenty feet from the ground, and held it there four days, until it starved to death.—Drain (Ore.) Nonpareil.

TEA

Tea is almost nothing; how much weight do you think there is in the taste of it?

Weight is no measure for tea!

Soap from Pompell.

A few years ago a soap-boller's shop was discovered in Pompell, having been buried beneath that terrible rain of ashes that fell upon the city 79 A. D. The soap found in the shop had not lost its efficacy, although it had been buried 1,800 years.

Here is Relief for Women.

Mother Gray, a nurse in New York, discovered a pleasant herb remedy for women's ills, called AUSTRALIAN-LEAF. It is the only certain monthly regulator. Cures female weakness, Backache, Kidney and Urinary troubles. At all Drugists or by mail 50 cts. Sample mailed FREE. Address The Mother Gray Co., Lefroy, N. Y.

Wouldn't Play Second Fiddle.

Here is a story a Kansas Irishman tells on hash. An Irishman who arrived in this country only a few days before, was offered some hash. He refused it. "Let them that chewed it eat it," he said.—Kansas City Journal

Storekeepers and Hotelkeepers Should investigate acetylene gas Write "Acetylene Jones" to-day.

British Goods in Petersburg.

An Englishman traveling in Russia was depressed on scanning a mile of shops in St. Petersburg and finding only one which displayed an article of British make.

TEA

Tea intelligence; what do you think that is?

Write for our Knowledge Book. A. Schilling & Company, San Francisco.

More than 200,000 pilgrims visit Mecca every year.

TEA

It is a most mild delight; but it is a delight—good tea, fine tea

Egypt was the first country to possess any army.

"KING PHILIP'S" SEAT REMOVED.

Connecticut Landmark Placed in Charge of Amherst College.

Many curious travelers who have heretofore made the long pilgrimage up Sugar Loaf mountain to view "King Philip's Seat" will be pleased at its present location in front of Amherst college.

For centuries Mt. Sugar Loaf has hung out like a flying buttress over the far level plain beneath through which winds the Connecticut.

Sugar Loaf as a geological phenomenon, composed entirely of red sandstone, is attractive, but its great cliff, with its straight mountain face shearing off 300 to 400 feet in depth, is the chief feature. At the southern end of this cliff Pulpit rock stands out sharply over its edge and underneath was the far-famed King Philip seat, where King Philip, the reputed instigator of many a bloody attack upon the peaceful villages below, is said to have given his commands to his assembled followers.

Formerly the seat was well defined, but curiosity seekers have chipped away the sides and bottom until nothing but a round hole remains.

There have been several narrow escapes from death by falling on the part of careless sightseers attempting to view the rock, and its present safe location is a welcome change.—Boston Globe.

Cómic Scene on London Bus.

It was the upper deck of a London bus. A passenger, a dignified personage, lighted a cigar and threw the match, as he supposed, into the street. A few seconds later he was greatly surprised to find that his umbrella was on fire. At the same instant a sharp gust of wind opened it and carried it like a flaming parachute through the air. Making a sudden grab after his truant property, the passenger overbalanced, plunged head long over the omnibus rail and after turning a somersault landed upright on the road unhurt.

Von Buelow's Many Decorations.

Including two recently received decorations from the Shah, the Imperial Chancellor, Prince Vort Buelow, is

If Chancellor Von Buelow Wore all of His 115 Decorations.

next to the Kaiser's Chief Chamberlain, the best decorated man in Europe. He possesses 115 stars, orders and ribbons, besides medals galore. A German mathematician the other day reckoned that if the Chancellor wore them all they would cover not only every inch of his breast, but his back as well and overflow down his trousers to the knees.

Siam's King an Ardent Motorist.

The King of Siam is an ardent automobilist, and his "scorching" has worried his ministers, who are anxious about the safety of the royal neck.

They presented to their august master the following petition: "At the service of your majesty there are bearers, and when time presses, carriages. We, therefore, beseech you to give up the use of motor cars, or at least to go at a more moderate pace. This is expected by the dynasty and your people. We have been too much alarmed lately to remain silent."

To which his majesty sententiously replied in a marginal note: "Danger lies not in the motors, but in the hearts of men."

Unwarlike Race of Bees.

A race of bees has been brought to this country—as an experiment by the United States government—that has been found the gentlest in the world. The one great drawback to bee-keeping for most people has been the fear of stings, but recent experiments at Washington have proved the Caucasian bees to be the most remarkable bees in existence for their gentleness. The bees are not altogether stingless, for they possess this organ so necessary to their welfare, but so seldom do they resort to its use that they are for all practical purposes non-stingless.

Windfalls for Widow.

After the death in 1897 of John Q. A. Olney of Upton, his widow was notified that there was a deposit of \$1,600 in a Milford bank. This money had been laid away without the knowledge of Mrs. Olney. A second surprise came to her the other day when workmen began to make repairs on the old Olney cobble shop and found \$85 in a tin box under the floor.

To make Cheap Gas-light for Country Homes

TAKE a common Clay Pipe. Put a simple "Acetylene" Gasburner on its stem.

Bind the two in position with a tight-fitting piece of Rubber Hose.

Then fill the bowl of the pipe with fine-ground Calcium Carbide.

Next tie a rag over head of the bowl to keep in the Carbide.

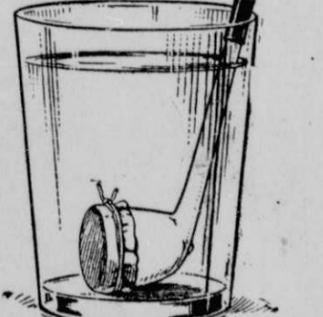

Now put the pipe into a Glass of Water, as in picture.

There you have a complete Gas-plant for 25 cents.

Touch a match to the Burner—and you'll get a beautiful White Gas-light.

Of course, this is only an experiment, but it shows the wonderful simplicity of Acetylene Lighting.

That very simplicity gave Acetylene

Light a setback, at first. It seemed so simple to turn Calcium Carbide into Gas-light that over 600 different kinds of "tanks" and "Acetylene Machines" were invented, patented, and marketed for the purpose, by about as many different people.

Well, the thing to be expected certainly happened! About 530 of these "Acetylene Machines" had been invented and sold by people who knew more about Tinware than they did about Gas-making.

The "Calcium Carbide" was all right all the time, but 530 of the machines for turning it into Gas were all wrong all the time.

So Acetylene Gas "got a bad name," though it is clear enough now that it never deserved it at any time.

It was like selling Wood Stoves to burn Hard Coal in, and then blaming the Coal for not burning.

Lots of things happened to grieve the Owners of these 530 makes of alleged "Acetylene Machines."

But very few accidents occurred from them even in the days of rank experiment and dense ignorance, among "Generator" Makers.

Of course, a gun will go off unexpectedly, now and then, if the trigger be pulled by a person who "didn't know it was loaded."

But, that's no fault of the Ammunition—is it? Well, finally the Insurance Companies got after these 530 odd makes of "Acetylene Machines" that wouldn't Acetylate, and the Insurance Board made an investigation of all Generators that were submitted to them.

Then, out of the 600 odd "Machines" patented, only about 70 were "permitted" by the Insurance Board to be used.

Oh, what a howl was there!

"By permitted" I mean that the Insurance Board was willing that any building should be Insured, with-

out extra charge, which used any one of these 70 Acetylene Generators it had found safe, and effective, just as it permitted houses to be piped for City Gas, or wired for Electricity, under proper conditions.

Now, the Insurance Companies ought to know whether or not these 70 different makes of Acetylene Generators were absolutely Safe to use.

Because, they have to pay the bills, if Fire or Explosion occurs, from any one of the Acetylene Generators they authorize.

And, here's a proof of their good judgment.

Though there are now Two Million people using Acetylene Light in America, there have only been four Fires from it in one year, against 8865 Fires from Kerosene and Gasoline.

There have also been 4601 Fires from Electricity, 1707 Fires from City Gas, and 520 Fires from Candles.

Besides these there have been 26 Fires from the Sun's rays, But,—only four Fires from Acetylene.

That shows how careful the Insurance Board was in its examination of Acetylene Generators, and in "permitting" only the 70 makes that were above suspicion, out of the 600 experiments that were once on the market.

Well,—the boom in Acetylene Lighting made lower prices possible on the material it is derived from, viz., Calcium Carbide, a material that looks like Granite but acts like Magic.

Today, Acetylene Light is a full third cheaper than Kerosene Light, or Gasoline Light, per Candle Power. It is not more than half the price of Electric Light, nor three-fourths that of City Gas.

If I can't prove these statements to your full satisfaction my name is not "Acetylene Jones."

But Acetylene is more than the safest and cheapest Light of the year 1905.

It is also the Whitest Light—the nearest to natural Sunlight in health-giving Blue and Violet rays, and because of this, with its freedom from flicker, it is the easiest of all Artificial Light on the Eyes.

It is so much like real Sunlight that it has made plants grow 24 hours per day in dark cellars where no ray of Sunlight could reach them. It made them grow twice as fast as similar plants that had only the Sunlight of day-time, viz., half the time.

That was proven by Cornell University in a three-months' experiment made this very year.

Now, I've saved up for the last a point more important to you than all the others about Acetylene Light.

It consumes only one-fourth as much of the vital Oxygen from the Air of Living rooms or bedrooms, as either Kerosene or City Gas—Light consumes.

That's a tremendous difference in a lifetime, mark you—three-fourths of a difference.

Because,—Oxygen is Life.

And every bit of Oxygen stolen from the lungs of Women, Children and Men, through Lighting, is a loss that can never be made good again.

A 24 Candle-Power Acetylene Light costs you only two-fifths of a cent per hour.

That's about \$5.85 per year, if burned every night in the year for four steady hours.

A Kerosene Lamp of equal capacity would cost you a third more, viz.: three-fifths of a cent per hour for Kerosene alone, or \$8.75 per year.

That's exclusive of broken lamp chimneys, new wicks, and the everlasting drudgery and danger of cleaning, filling and trimming daily.

I want to prove these figures to you, Reader, if you are a house-owner or storekeeper.

Tell me how many rooms you've got and I'll tell you what it will cost to light them with brilliant, beautiful, Sanitary, eye-saving Acetylene.

Write me today for my Free Book about "Sunlight on Tap."

Had No Cause to Complain.

The Hon. Benjamin Kimball, one of New Hampshire's well known railroad men, is said to have complained to one of the butchers at Gilford, where Mr. Kimball's summer residence is, about the quality of meat supplied, saying: "That lamb you sold me must have been old enough to vote. It was so tough I could hardly cut it." "Oh," said the butcher, "that is nothing; Tom Fuller said the last piece of meat he bought of me was so tough he couldn't get his fork into the gravy."

A Greeley Story.

Horace Greeley was once asked for a tonation by a minister "to save people's souls from going to hell." Horace wasn't feeling well that day, so he irritably replied that "there are not half enough people going to hell, as it is." But the minister got his check.

Mine on Fire Many Years.

A mine in Warwickshire, Eng., has been alight for years, and man is powerless to check it. The blaze started in a seam of highly combustible coal, and the workings, which stretch under parts of Birmingham itself, are gradually being burnt out.

Mrs. Winslow's Soothing Syrup.

For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Venomous Even in Death.

William English and Milton Davis of near town, were out hunting on the farm of J. D. Powers a few days ago and they shot a large rattlesnake, shooting off its head and about four inches of its body. The severed head was hurled by the discharge against the bird dog of Mr. English. It bit the dog and he died within a few minutes.—Perry (Mo.) Enterprise.

Hunger Might Be Good Lesson.

It would be an excellent thing for the softening of the hard hearts in this world, an almost complete cure for man's inhumanity to man, if the heartless could be compelled to live on three or four meals and no more within the limits of a single week. It would be especially beneficial to those who make the laws which make hunger in such a land as this possible.—Wallace Rice in Chicago Journal.

What He Paid For.

A cynical highland gillie thus explains a certain rich American's action in paying \$25,000 as a year's rental for a castle in the north of Scotland: "He pays \$5,000 for the house, \$5,000 for the fishing, \$5,000 for the deer, \$5,000 for the grouse and \$5,000 for being near Balmora, where the king occasionally visits."

HE ATTENDS TO BUSINESS
who goes straight to work to cure
