

## Local Happenings

Three cats and two dogs were billed out on the stage the other morning.

Hon. Dow Dunning, of Wickahoney, was in town a few days of the last week, returning home Monday of this week.

The younger set of our town are going to give a dance at lower Masonic hall, tomorrow evening. Everybody invited.

Roy Maxon, son of our former night-watchman, S. D. Maxon, of DeLamar, will attend the public school here this winter.

Mr. John C. Connors, our hotel man, left here this morning on a trip to Boise and other points. He will be gone a week or ten days.

Mrs. Jennie Farrer Avery returned this week from Boise, where she attended the teachers' institute, which was in session there last week.

James Inglis, for a number of years master mechanic for the Trade Dollar company, took his departure from here the first of the week for Boise, where he will spend the winter.

Ethel Strode, who has spent the summer here with her mother and sister, took her departure from here yesterday morning for Gooding, Idaho, where she will attend the deaf and dumb school this winter.

Ednetta St Clair left here yesterday for Caldwell, to attend school there this winter. She was accompanied by Mr. John S. St Clair, who goes for a visit there with acquaintances and at the same time will visit in Boise and other points before returning to his duties here.

The little infant son of Mr. and Mrs. M. Brennan, of Dewey, died Tuesday morning and was buried up here yesterday. The little child was born on August 10th, last, and was not at all well up to the time of its death. The heartfelt sympathy of this entire community goes out to the grieving parents.

Now that the county commissioners have been in session and canvassed the votes cast at the primary election and made known who the different nominees for the different county offices are, would it not be well for you to consider the advisability of placing an announcement of your candidacy in The Nugget.

On last Friday Governor Brady filed a sworn statement of his personal expense account with the secretary of state and shows that the governor expended a total of \$616.25, or that he is on the safe side by a margin of \$133.75. The expense account, which is in detail, covers a period from February 28, 1910, to the present date.

In more than forty Kansas counties women hold the office of superintendent of schools, and in twenty-four other counties there are women candidates for the office. Enough of these are likely to be elected in November to place the schools, in a majority of the counties, under the direction of women. If any one should then ask the famous question, "What is the matter with Kansas?" the women teachers of the nation would answer with one voice, "She is all right!"—Ex.

School opened at Silver City Monday, Sept. 12th, with two instructors, and thirty three pupils. Prof. A. D. Bradford has charge of the higher grades and Miss Eva L. White is teacher for the lower grades. Miss White is a primary teacher of thorough training and highly successful experience and Silver City is fortunate in securing her services. The primary class of ten pupils just entering school this year is the largest class of beginners our school has had for years. Their first lessons show them to be as

eager and intelligent a lot of youngsters as ever went to school and their teacher is very highly pleased with their first efforts.

Mattie Heer and Clifford Weston left here to attend the University of Idaho at Moscow, and Verna Frye, Ray, Karl and Ned Williams for the Albion State Normal School, at Albion, the two former leaving here this week and the latter last week. All of these are bright and well advanced in school studies that their parents have thought it desirable to send them to higher schools for further advancement, and we hope to hear of excellent reports from one and all of them. Let them remember that knowledge is power, and that education is a friend which no enemy can alienate, no prison can bar from one. At home it is a friend; abroad, an introduction; in company, a comfort, and in solitude, a solace, and that the days industriously employed in acquiring it are days spent in gathering treasures, of which one can never be robbed.

Mr. Asher A. Getchell, our postmaster and druggist, informs us that he has made application to the postoffice department to start a postal savings bank here, an idea which we heartily approve of and hope he will be successful in landing. While we ourselves may not be fortunate enough to possess a little surplus cash to deposit with him in Uncle Sam's bank, we have a class of people in our community whom we know to send their money to foreign countries to be deposited, because they are afraid of our banks. But with a bank in our midst, with Uncle Sam as president, ought to be sufficient guarantee of the safety of your deposit and worthy of patronage. Look into this matter thoroughly before you send your money abroad and satisfy yourself. All information regarding this new postal bank, and how to make your deposits etc., will be cheerfully given by our postmaster.

## Joe Hutchinson's Good Luck

A Salt Lake special dated the 3rd: Among those registered at the Cullen hotel from Boise is J. H. Hutchinson, lieutenant governor of Idaho under Governor Steunenberg and candidate for Congress on the democratic ticket in 1902. He received today from Carson City, Nev., a telegram stating that the supreme court of Nevada had affirmed the decision of the lower court, which gives him the credit for originating the idea of what is now known as the Consolidated Mines company and 30,000 shares of stock worth today \$8.25 a share, and upon which there has accumulated \$100,000 in dividends.

Later we learn that this case has been, or will be, taken to the United States supreme court. This gentleman is well and favorably known in Silver City, he being a son-in-law of our townspeople, Mr. and Mrs. C. M. Hayes, and at one time manager of the famous Trade Dollar of this place.

## Card of Thanks

To the many kind friends of Dewey and Silver City and vicinity, who so kindly assisted us with act of kindness and sympathy in our sad hour of bereavement—the death and burial of our darling baby boy—we wish to extend our sincere thanks.

MR. AND MRS. M. BRENNAN.

Geo. R. Sweeney has just received and now has on display a full and complete line of samples of the latest fall and winter clothing. Go and see him for a good tailor-made ready-to-wear suit.

## THE BANNER

The beginning of work again in the upper workings of the company's property has revealed some very rich ore in the 100 which is improving as work progresses. There is every reason to believe that very favorable results will be accomplished when the new compressor arrives and is installed and men put at work to tap this ore shoot, in the mill level tunnel, which has been encountered in the upper workings. When this ore shoot is encountered in the mill level tunnel, the workings will be deep enough to permit of its extraction without much loss of time and will be of easy access to the mill. If the management is a little slow about listing the stock and putting it on the market it is merely because they want the public to be thoroughly convinced that the recent strike is all it has been represented to be.

## Notice of Teacher's Examination.

There will be an examination for teachers Sept. 22nd 23rd, and 24th. Questions will be issued for second and third grade certificates.

JENNIE FARRER AVERY,

County Superintendent of  
Public Instruction.

Silver City, Idaho, Sept. 14, 1910.

## Three Great Plants, One Bird.

When Columbus discovered America, he not only opened a new world to the children of men; but it was found that this new world possessed three plants which have since become necessities to mankind. The potato, Indian corn and tobacco came to the world with that discovery. What would the world do without them now? The potato is most generally used, but we believe that corn in its manifold uses is the most important plant in the world, while tobacco has become a real necessity to the civilized and semi-civilized people of the whole earth. Take it from armies and navies of the most progressive nations and there would be a general mutiny; take it from the printing office and before a week there would not be a newspaper worth reading in the world.

A failure of a corn crop in the United States for a single year would be an overwhelming disaster, a failure of a corn crop in the United States and Mexico, the same year would cause thousands of people in the latter country to starve. We all know what formerly followed when the potato crop in Ireland was a failure.

Besides, the three plants mentioned above, the New World gave to the children of men the noblest of birds, the turkey. The image of the eagle on Roman standards led the way for the conquering of the world; our own American eagle has been an inspiration from the first; but could not an American soldier fight better with a section of a turkey in his stomach and no standard, than with nothing in his stomach and an eagle on his flag? No corn, no potato, no tobacco, no turkey, no wonder the world had begun to degenerate.—Goodwin's Weekly.

## THE SCHOOL AGE

With every year that passes more and more thought is being given to the subject of the physical care of children. Attention is especially turning to that class of children whose parents are either too ignorant or too careless to pay proper regard to their bodily welfare, and especially is the state growing to a sense of its duty in regard to the children in its schools.

The schools are no longer looked upon

as dumps, where children are to be placed and kept without discrimination as to age, capacity or physical condition. Parents as well as pedagogists are growing more and more awakened to the absolute loss of time involved in sending little children to the public schools who have no right to be there. A sick child has no place in the school at all, a defective child has no place among children who are normal, and all children below ten years of age are being treated with nothing short of cruelty when the full complement of hours is exacted from them.

There was never yet seen a normal child who was fitted to sit still indoors, from nine o'clock until four, with a break of only one hour at noon. Such an arrangement means in the winter no daylight playtime at all. The child is kept at an unnatural tension when attention is demanded of him for hours at a stretch, and study is made odious to him, so that lessons become associated in his mind with all that is wearisome and to be avoided.

Many a poor little boy plays truant and takes his punishment again and again. He knows that retribution is inevitable, and yet he faces it because, although he could not express it, the alternative—that of spending the long day at the school desk—is intolerable. He is not a natural criminal, he is not a potential tramp, although he may become one under the system. He is simply a natural, healthy little boy, able to attend to his teacher up to a certain point, and then able no longer, do what he or his teacher will.

If truancy and backwardness and inattention result from some physical defect, such as imperfect eyes or deafness, the case is even more cruel, and natural mental development is a physical impossibility until the defects are remedied.

Much good work has already been done in the direction of physical examination of defective children, and much has also been done to remedy the partial or actual starvation which is the piteous state of so many children of the poorer classes; but much remains to be done, and especially in the matter of the number of hours in school demanded of children under ten years of age.—Youth's Companion.

Government timber that was killed by the recent forest fires that swept over large areas in Oregon, Washington, Idaho and Montana, is to be sold as speedily as possible by the forest service, provided purchasers can be found. A great deal of this timber, though killed by the fire, is entirely sound and fit for the mill, provided it is cut and removed within two or three years. It is this timber that is to be sold.

The sales will be made under the direction of the district foresters having jurisdiction over the states in which the big fires occurred, and these officials will be at liberty, if they so desire, to sell this burned timber at lower rates than have heretofore been asked for mature timber sold from forest reserves. There will be no instructions issued by the Washington office directing the sale of this timber at reduced prices, as the district officers will be permitted to exercise their best judgment.

It is the desire of the forest service, however, that all timber killed by the fires be cut and removed as early as possible, and it is also the belief of the Washington office that a reduction in price might well be made as an inducement to mill men who are so situated as to be able to handle this timber.

The goods manufactured by the Silver City Cigar Mfg. Co., are all Union Made and guaranteed. Dealers who handle their goods always have satisfied customer.

## Notice for Publication.

DEPARTMENT OF THE INTERIOR  
UNITED STATES LAND OFFICE  
Boise, Idaho, Sept. 8, 1910.

Notice is hereby given that William J. Owens, of Lowry, Idaho, who, on April 6, 1904, made homestead entry No. 7253, serial No. 63995, for E½ SE¼, SW¼ SE¼ Sec. 10; NW¼ NE¼ Section 15, Township 10 S, Range 1 W, Boise Meridian, has filed notice of intention to make final five-year proof, to establish claim to the land above described, before the Register and Receiver, at Boise, Idaho, on the 18th day of October, 1910.

Claimant names as witnesses:  
J. R. Goldman, of Riddle, Idaho.  
T. B. Richardson, of " "  
Archie McCoy, of Lowry, " "  
Oswill Traxler, of Mahogany, " "  
W. BALDEBERTSON, Register.  
First publication September 15, 1910.  
Last publication October 13, 1910.

## Notice for Publication.

Notice is hereby given that at 10 A. M., on the 26th day of October, 1910, at Silver City, County of Owyhee, State of Idaho, before Judge E. S. Heer, proof will be submitted of the completion of works for the diversion of 12 cubic feet per second of the waters of Rock Creek in accordance with the terms and conditions of a certain permit heretofore issued by the State Engineer of the State of Idaho.

1. The name of the person or corporation holding said permit is John H. Hatton.
  2. The postoffice address of such person or the place of business of such corporation is Oresana, County of Owyhee, State of Idaho.
  3. The number of such permit is 3219, and the date set for the completion of such work is October 26, 1910.
  4. Said water to be used for irrigation and domestic purposes.
  5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application for such permit, is 12 cubic feet per second.
  6. The amount of lands for which said water is available is 640 acres, particularly described as follows: SW¼ SE¼, S½ SW¼, NW¼ SW¼, SE¼ NW¼, W½ NW¼ Sec. 34 SW¼ SW¼ Sec. 3, SE¼ Sec. 14, N¼ NE¼, SE¼ NE¼, NE¼ SE¼ Sec. 23, all in T. 7 S. R. 3 W. B. M.
- D. G. MARTIN,  
State Engineer.

First publication September 15, 1910.  
Last publication October 6, 1910.

## Notice of Proof of Completion of Works and Application of Water to Beneficial Use.

Notice is hereby given that at 2 p. m. on the 1st day of November, 1910, at South Mountain, County of Canyon, State of Idaho, before Dow Dunning proof will be submitted of the completion of works for the diversion of 3.2 cubic feet per second of the waters of South Mountain Creek and of the application to beneficial use of said water in accordance with the terms and conditions of Permit No. 5406 heretofore issued by the State Engineer of the State of Idaho.

1. The name and postoffice address of the person or corporation, holding said permit, are Charles Wall, Jordan Valley, Oregon.
  2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of use, in accordance with the plans accompanying the application for such permit, is 3.2 cubic feet per second.
  3. The use to which said water has been applied is irrigation and domestic purposes, and the amount applied to beneficial use is 3.2 cubic feet per second.
  4. The place where said water is used is SW¼ Sec. 17 T. 7 S. R. 4 W. B. M., unsurveyed.
  5. The date of priority which said user is prepared to establish is October 4, 1910.
- D. G. MARTIN,  
State Engineer.

First publication September 15, 1910.  
Last publication October 6, 1910.

## \$1,000.00 REWARD

One thousand dollars in cash is the offer made by the Directors of the Panama-Pacific International Exposition company, to artists and designers the world over for an Exposition Seal. It must be of character suitable for use as a poster, a crest for stationary, or an Exposition button, and should typify the completion of the Panama Canal and the celebration of that event proposed to be held in San Francisco in 1915. Finished drawings or paintings should reach the Exploitation and Publicity Committee in San Francisco not later than October 15th. It is desired that as wide announcement as possible of this offer be made, that artists every where may be inspired to make suggestions and send in their designs by this date. A number of suggestions have already been made and these will be held for consideration when the competition closes.

A good stock ranch on Sinkler, for sale. For particulars call on Mrs. M. E. Paul.
