

A GEM OF A LIBRARY

ITS WONDERFUL SCHEME IN COLOR
TONE AND CLASSICS.

The Delightful Harmony of the Surroundings Was Only Exceeded by the Ingenuity of the Twelve Volume Edition of Ennius.

A St. Louis professor who makes a specialty of the classical languages and is particularly fond of the Latin literature was treated not long since to a surprise he is not likely soon to forget.

An old friend who for many years resided in a distant state not long ago moved to this city and sent to the professor notice of his arrival. The twin met downtown by appointment, and the new arrival invited the professor to call at his home "as soon as we get things fixed up." After a decent interval allowed for the fixing up the professor called, and as the gentleman of the house was momentarily engaged the man of much Latin was ushered into his friend's library, where he sat delighted with the elegant appearance of the superb carved oak bookcases and the long rows of gilt and Russia. His chair was close to one of the cases, and, glancing round, he noted with keen satisfaction the names of Greek authors who had been his lifelong library companions. He also noted that each half of each case to the middle of the door contained exactly twelve volumes and that each author's works constituted a set of the same number. Homer, twelve volumes; Sophocles, twelve; so also with Aeschylus, Euripides, Thucydides, Timocides and even Theophrastus, each had its appointed number.

"This is peculiar," said the professor to himself, for he knew that some of these authors wrote little and others much. "Extensive commentaries perhaps" was his reflexion, and, rising, he stepped to the next case, and on the top shelf here was Ennius in twelve volumes, heading a long line of most respectable Roman historians and poets. "What's this?" The professor gave a start, for although he knew perfectly well that Ennius was the first in time of the Latin poets, he knew also that there were only about a couple of dozen lines of him left and that these had been preserved as quotations in the works of later writers. "Ennius in twelve volumes! I never heard of such a thing. What in the world can it be?"

He glanced involuntarily at the lock. But there was no key. And while he marvelled greater grew the door opened and in came his friend.

Half an hour later, after old times had been discussed and former friends recalled, the professor, who grew more and more curious to find out how any commentator could expand twenty or thirty lines of an old time poet into twelve large volumes, brought up the subject.

"By the way, I notice you have an Ennius here in twelve volumes. Now, remembering that only twenty or thirty lines of his poems are known to exist, I have a great curiosity to know what this can be. Is it a commentary, history or, if not, what is it?"

His friend smiled. "Oh, that's a little idea of my wife. You see, she has a taste for Latin and Greek, stuff like that, and when she went to buy books for our library she determined to have a Greek case and a Latin case, but when we looked at the Greek and Latin books she found they were of all sizes, some too big to go in the shelves and some so little that they looked like babies alongside the others, so she would not take 'em.

"But having her heart set on filling up the Greek and Latin cases, she kept worrying about them until finally she hit on a great idea. The ladies always do, you know, if you give 'em time enough.

"She took her idea to the binder and told him the exact length of the shelves and their height. The binder grinned a little to himself as she explained, but he was not the man to lose a job, so he took a lot of thick pine boards, trimmed one side so that it butted regularly like the backs of books, and she went to a library somewhere and got a list of names for him to put on the backs, and he came and tacked in the boards, and she she filled up her Greek and Latin cases in sets of twelve volumes each, twenty-four volumes on every board, and was perfectly satisfied. I don't know what she did with the keys, Ah, here she is now! Allow me to introduce my friend, Professor Blank. I was just telling him, my dear, of your little idea of the Greek and Latin cases."

"Oh, I hope, professor, you admire the sets!" said the lady. "Aren't they lovely?"

"Perfectly lovely, madam!" echoed the professor.

"And don't you think it's a good idea?" rejoined the lady. "You see nobody ever went to those old books anyhow, but the uniform sets look pretty, and the red contrasts well with the carpet."

"Beautifully," murmured the professor, and the subject was dropped, but he is still wondering how much lower classical learning will sink after that twelve volume edition of Ennius—St. Louis Globe Democrat.

Give Immediate Thanks.
"The first thing Columbus did on landing in America was to kneel and express his gratitude."
"Yes," answered Miss Cayenne; "I suppose he was thankful to get her under circumstances that did not bring him into contact with the customs of fleers."—Washington Star.

Mrs. Carl Mink, wife of the new director of the Boston Symphony Orchestra, is so fond of America that she says she has no desire to return to Berlin. She contemplates taking several courses at Radcliffe in the near future, and if her husband remains here may go in a degree.

I, this concerns you, read carefully, Dr. Caldwell's Syrup Pepsin is positively guaranteed to cure indigestion, constipation, sick headache, offensive breath, malaria and all diseases arising from stomach trouble.

MRS. FOUTS DEAD

She Was One of the Best Known Women in the County.

LIVED HER LIFE THERE.

Hagerston, Ind., Feb. 6.—The death of Mrs. Mary Fouts, east of town, widow of David Fouts, occurred Wednesday morning at 10 o'clock after a long and tedious illness due to stomach trouble. The deceased was born on the farm now owned by Miss Ann McCullough, a sister, and lived in Jefferson township during her entire life. She was aged 84 years. She was the daughter of Samuel and Nancy McCullough. The deceased was well known throughout the entire county, and was a faithful member of the Baptist church at Salem, four miles east of town, since its organization many years ago. She is survived by one brother, Joseph McCullough of Clero, Ind., and one sister, Miss Ann McCullough, and nine children, four daughters, Mrs. Rose Ann Stable of Harrisonville, Mo.; Mrs. Nancy Harris of Bartlett, Kans.; Mrs. Hulda Albert of Tawanta, Kans.; and Mrs. Charles Pettit. Five sons, Harvey Fouts of Oswego, Kans.; George, David, Samuel and James Fouts of this vicinity.

Funeral services will be held at Salem, Saturday morning at 10 o'clock. Elder R. W. Thompson of Greenfield, will have charge. The interment will be in the cemetery adjoining.

Ratner Equivocal.
Uncle Morton, an old negro, who had been a slave in the days before the civil war, was a retainer in the household of an Atlanta family. He was something of a philosopher, and a good deal of a diplomat. One day the waitresses, two young mulattos, were chafing him.

"Uncle Morton," one of them said, "who do you like best, Belle or me?"

"The gray-headed negro looked first at one, then at the other, and said, with a tone of indecision:

"If am too tedious to say."—New York Times.

The Parental Voice—Maud, is that young man gone yet?

The Daughter—Yes, papa; he says he is.—Cleveland Leader.

"THE POSE OF POWER."

A Doctor Says It Can Only Be Obtained by Carrying the Body Right.

The human body is a machine—a machine in some respects not unlike a watch. If you bend the watch slightly you displace its parts (its organs, if you please), and then the watch will not go aright.

The same is true of man. In his body every organ has its place. If his body is bent some of all of his vital organs are displaced. They cannot perform their work, and the man, like the watch, is out of order.

"How many of us are like that?" Well, in an examination covering several thousand people I found less than one in a hundred who was right. Ninety-nine people out of a hundred have displaced organs.

I may add that I have never found disease in any organ that was habitually carried in its normal place. The organ always becomes displaced before it becomes diseased.

And what is the cause of this universal displacement? In a word, the cause is a bad method of holding the body in standing, in sitting, walking about and lying down. The trunk is merely a flexible, hollow cylinder inside of which the organs are supported, each in its place. When, however, the body is bent and collapsed, as in most people, the organs drop out of their places and are crowded against each other. They are then unable to do their work, and thus they become diseased.

Every case of chronic indigestion which I have ever examined has had a stomach that was hanging from two to five inches lower than its right position—a condition known to medical men as gastroptosis.

And the rare man who holds his body aright in standing, walking or sitting, such a man is always a man of power. Cromwell was a man of this type. So were Napoleon, Washington and Bismarck.

"And how shall I restore my organs to proper position?" asks one of the ninety-nine.

By so developing the body that it is at all times erect and expanded. This will draw each organ into the position in which it can do its best work. A glance at the pictures of the men I have mentioned will show you what I mean.

As to practical methods, take the following exercise for five minutes four or five times a day:

Place the feet together, arms at sides, head back, chest up and forward, abdomen in, knees back, weight on balls of feet—"the position of a soldier." Throw the weight as far forward as you can. Hold the position for half to one minute, then relax. Repeat the exercise from six to twelve times.

Add to this reasonable habits of living, and in three months you will have gone far toward gaining the pose of power.—Dr. Latson in Chicago Journal.

Warding Off a Cold.
The first point that must be struck almost every careful observer of catarrhal pneumonia is that in nine cases out of ten a cold is caught as the result, not of getting cold, but, on the contrary, of getting unduly hot. This apparent paradox is, of course, intelligible enough when one considers that it is when the body is heated that the pores of the skin are opened and are then much more likely to take a chill than when they are closed by the action of the cold. This is also the explanation of the efficacy of a cold shower bath after taking a Turkish or even an ordinary hot bath, as the sudden action of the cold water closes the pores and so protects the skin from the action of the air. The best possible preventive from catching cold is cold water, applied either in the form of a cold bath or, if that is considered too drastic a measure, it will be found that merely bathing the neck in cold water, both in the early morning and also the last thing at night, does a great deal toward giving one immunity from colds.—Modern Society.

Rossetti's Way.
This striking picture of Rossetti appears in William Allington's memoirs. "Rossetti walks very characteristically, with a peculiar lounging gait, often trailing the point of his umbrella on the ground, but still obstinately pushing on and making way, humming the while with closed teeth in the intervals of talk, not a tune or anything like one, but what sounds like a sotto voce note of defiance to the universe. Then suddenly he will fling himself down somewhere and refuse to stir an inch farther. His favorite attitude—on his back, one knee raised, hands behind head. He very seldom takes particular notice of anything as he goes and cares nothing about natural history or science in any form or degree. It is plain that the simple, the natural, the naive, are merely insipid in his mouth. He must have strong savors in art, in literature and in life. About these and other matters Rossetti is chivalrously bold in announcing and defending his opinion, and he has the valuable quality of knowing what he likes and sticking to it."

A Hopeless Pessimist.
At a gathering of men and women each one in turn was called upon to cite the attribute he or she considered of greatest worth in the formation of character, each attribute to be followed by the name of some one who best embodied it. For instance, a man gave sterling integrity and as his example, Abraham Lincoln; a woman, with Mme. de Maintenon as illustration; another woman, loyalty, adding the name of George Washington. At last it came the turn of a very plain spoken woman, who in loud, clear tones cried, "Honesty, and I know of no example, either living or dead."

Of Sir Robert Peel's entire lack of sympathy, O'Connell said: "His smile was like the silver plate on a coffin." Less scathing but less witty also was O'Connell's description of a lady of similar repellent temperament: "She had all the characteristics of a poker except its occasional warmth."

Rub fork, spade, ax and other foot handles with lard oil on hot days. They last longer and are pleasanter to the hands.
