Long Honeymoon. Marriage among Moslems in India is followed by other ceremonies. The bride, with the bridegroom, is taken back to her father's house after four days; then again she comes back to her husband's house after ten days' stay and then after a stay of twenty days returns to her father's house for at least six months. Thus instead of having a short period of honeymoon they make it last almost a year.

EFFECT OF NEW BILL FELT IN ATTITUDE

European Banks Show More Favor for United States Under Vreeland Bill.

MAKES BETTER STANDING.

LAW WILL BE BENEFICIAL IN ENABLING BANKS OF THIS COUNTRY TO FINANCE THEIR AFFAIRS ABROAD.

Chicago, Ill., June 13.—The effect of the new Vreeland currency bill already has been felt in the changed attitude of European banks toward the United States, according to Chicago bankers, who say, however, that in their opinion no emergency circulation will be required this fall to help move the crops. "The new law has given American banks a standing in foreign countries that they have not had heretofore," said W. T. Penton, vice president of the National Bank of the Republic, an institution which made the unique record of paying out cash as required by its depositors throughout the period of clearing house certificates last fall. "The law will be very beneficial in a broad sense, in enabling banks in this country to finance their affairs abroad. There is always a large foreign business with the United States, and heretofore the rigid currency law prevented any elasticity and when our banks had once loaned their money they had to stop further business whereas in other countries bankers use their credit. Banking on assets has always been a recognized feature of the financial systems abroad and the new law for the first time places the United States on a similar financial system to England, France, Germany and other countries." Chicago banks have not as yet followed the lead of New York in forming a currency association but this will be done at an early date.

STOCK BUSINESS IS MAKING BIG CHANGE

Great Clover Ranches Developed From Sand Barrens In Northern States.

THE CLIMATIC CONDITIONS.

ABUNDANCE OF FRESH WATER MAKES THE LANDS SUITABLE FOR THE PURPOSE OF GRAZING.

Chicago, June 13.—Great changes in the live stock business of the country are foreseen by the packing interests here in consequence of the discovery of soil experts of the department of agriculture that some 8,000,000 acres of light, sandy soil in the jack pine region of Michigan, Wisconsin and Minnesota can be turned into great clover ranches for cattle, sheep and hogs. The agricultural department has issued a bulletin which gives in detail experiments made in the new ways of raising clover on the sandy soils of those states, which will eventually result in adding greatly to their agricultural wealth. C. Beaman Smith, of the bureau of plant industry, has demonstrated a new manner of planting and cropping clover. Climatic conditions and the abundance of water make the soils, he says, ideal for the purpose of clover grazing, a fact which promises to transform in time the cut-over pine lands which now are put to little use, for the better grade of live stock can be raised and fattened on these lands. A vast annual saving in transportation cost would be made as well as still greater saving in the losses suffered from exposure and starvation, which at times is severe on the western ranges. The clover ranch territory of these three states seems likely in the near future to have a marked effect on the prices of meat and meat products and in another generation develop new great dairying sections.

SOUTH A STREET MAY BE IMPROVED

Board of Public Works Will Meet With Citizens Interested.

MAY BE A REMONSTRANCE.

IMPROVEMENT WILL EXTEND FROM SECOND TO EIGHTEENTH STREET AND WILL COST THOUSANDS OF DOLLARS.

Friday, June 26 at 10 o'clock, has been fixed by the board of public works as the time upon which all persons interested in the improvement of South A street from Second street to Eighteenth street may meet with the board to discuss the proposed improvement. The board has passed a resolution providing for the construction of cement sidewalks, curbs and gutters along both sides of South A street. To complete the improvement it will cost several thousand dollars and it is expected the property owners will show considerable interest. One of the properties against which the heaviest assessments will be levied will be the courthouse. The entire south side of the courthouse block will be effected. On the date mentioned, the board will decide whether the benefits accruing to abutting and adjacent property and to the city of Richmond will be equal to or exceed the estimated cost of such an improvement. Practically the entire length of A street is included in the portion it is intended to improve. The south side of the square between Fifth and Sixth streets has cement walk and there is cement walk in front of the Christian church. Besides the court house the improvement will effect Trinity Lutheran and First English Lutheran churches and First High school building. It would not be surprising if a remonstrance against the improvement is presented.
