

CANNON MUST EVEN PAY AUTO EXPENSE

House Refuses Appropriation For Upkeep of Speakers Machine.

ENEMIES WIN BY TRICK

REPRESENTATIVE DWIGHT, THE REPUBLICAN WHIP, IS IN BAD REPUTE WITH INSURGENTS AND DEMOCRATS DUPE HIM.

Washington, March 17.—Republican insurgents, combining with democrats, subjected "Uncle Joe" Cannon and his followers a number of trying indignities in the house. They gave the Cannon organization the second parliamentary drubbing of the season and went so far as to refuse the speaker an appropriation for the upkeep and operation of the government automobile placed at his service.

This was the finishing touch to the antics of the insurgents of which the speaker was the victim. The loss of the appropriation for the automobile came after the Cannonites had fought for two hours to ward it off. What makes it all the more painful to "Uncle Joe" is that he has sent his own automobile and chauffeur back to Danville preparatory to riding at the government's expense.

Whip Is in Bad Repute.

The success of the insurgents put Representative Dwight, the republican whip, in bad repute with the speaker. Dwight, it appears, was asleep at the switch. It looked as if all hands had gone off watch for the day. Only a handful of the members were in their seats, the speaker was in his room, and John Dalzell in the chair.

In accordance with a prearranged plan the insurgent democrats were in their rooms in the house office building awaiting the signal that the bill had been reported from the committee of the whole. The signal came, and within five minutes an avalanche of insurgent republicans and democrats came tumbling into the house.

Dwight Falls at Rescue.

It took Dwight's breath away. He dispatched messengers for regulars, but it was too late. Most of them had gone home. In order to save the bill from defeat, Representative Bennet was recognized on a motion to recommend that it be defeated. An effort was made to adjourn the house, but the enemy blocked this dodge.

The insurgents and democrats easily put through an amendment offered by Representative Foster of Illinois, cutting out the appropriation for the maintenance of the government automobiles provided for Speaker Cannon and Vice President Sherman. The vote was 113 to 94. A rider reducing the appropriation for enforcing the corporation tax law from \$100,000 to \$75,000 was beaten.

Nothing just as good. GOLD COIN FLOUR in a class by itself. Ask your Grocer.

COSTS 24 MILLION

Animal Tuberculosis Is Cause for This Loss Each Year in U. S.

CHIEF MELVIN REPORTS

Washington, March 17.—The financial loss in the United States caused by tuberculosis in food-producing animals amounts to \$24,000,000 annually, according to an estimate made by Dr. A. D. Melvin, chief of the bureau of animal industry of the department of agriculture.

In the twenty-fifth annual report of the bureau, just issued, Dr. Melvin discusses the economic importance of tuberculosis. Other papers on the subject appear in the report, one by Dr. E. C. Schroeder, superintendent of the bureau's experiment station, which points out the danger from the tubercular cow to human health, and another by Drs. John R. Mohler and Henry J. Washburn, of the pathological division, dealing with the cause and character of animal tuberculosis and federal measures for its repression. Results of experiments to determine the length of time that typhoid bacilli will remain alive in milk and butter are given in an article by Dr. Washburn.

The importance of clean mouths in health calls for no argument. The necessity for disinfection of this important gateway to the interior in disease is less commonly appreciated. Much attention has been given to the question in various armies and navies. Drinking from common cups is prevented wherever possible. Some of the ships of our navy keep the drinking cups on the water tanks lying in a formalin solution, when not in use. On others the sailors drink directly from a spout, which throws the water up to their mouths—no cups being used. In default of some method of mouth disinfection, says Dr. J. D. Gatewood, in his work on "Naval Hygiene," specific diseases, tuberculosis, diphtheria, influenza, pneumonia, measles, mumps, and scarlet fever may become epidemic on ship board.—New York Press.

that a handsome new one was left in its place.

Oliver Ferguson does not fully recover from the gripple.

Miss Hazel Filby and mother spent yesterday at Richmond with Mrs. Oscar Klemeknecht.

Raymond Wehlyer, who has been assisting in the song services at the M. E. revival meeting, spent yesterday at his home in Richmond.

Mrs. Geo. Filby and daughter, Miss Bertha Filby, spent yesterday at Cambridge City.

Mrs. Jesse Warren, who fell and hurt her arm is improving.

Miss Marie Elwell is on the sick list.

Miss Lathrop, the little son of Mr. and Mrs. Ed. Lathrop, was taken to Richmond yesterday and placed in Reid Memorial hospital for an operation for appendicitis. He was taken by O. H. Beeson in the automobile and accompanied by his mother and the attending physician.

Remove the Useless Load With TON-DON AXLES

The useless load is the useless friction caused by imperfectly designed axles of faulty construction.

TON-DON Axles lighten the load—and save the horse, because they are built on a correct principle—of wear and friction eliminating qualities.

The Ton-Don spindle won't take a file scratch any more readily than a piece of smooth glass.

The Ton-Don Box is lined with a new metal—a sleeve of Phosphor Bronze—which grows harder and smoother with wear.

Lubrication is rarely necessary oftener than four times a year.

Ask your builder, repairer or retailer today for particulars of the first axle improvement in fifteen years.

Also made in Concord Express style for delivery wagons.

Uric Acid in Our Food

Nearly everything we eat produces Uric Acid, especially red and lean meats, and if it were not for the healthy blood that flows through our bodies every one would fall a victim to Uric Acid poisoning. Only those with impoverished blood are subject to Rheumatism and Gout. When thin and watery, it admits Uric Acid which in turn settles in the linings of the kidneys, stomach, bladder, joints, bones and in the muscles themselves, carrying pain and misery with it. Get rid of Uric Acid and you will get rid of Rheumatism. The **Golden Crown** Remedy is an antidote to all poisons of the kind. It cleanses and purifies the blood as effectively as good soap and clean water cleanses a piece of linen. In thirty minutes after taking the first dose traces of it are found in the blood and after a few days' use the blood becomes thoroughly charged with its wonderful germ destroying and health giving properties. You can actually feel it as it forces the poisons out through the pores. Your skin may show slight color and roughness and itch a little for a few days, a condition that need create no alarm as it passes away as quickly as it comes. Three doses will stop the most obstinate case of dyspepsia and a few weeks' use will restore digestion and overcome constipation. Three days' use is sufficient to prove its worth in all such cases. Don't fail to give it a trial. If you are sick and ailing in any way we will gladly mail you a free sample if you will send us this ad with your name and address.

For Sale by A. G. Loken & Co. PRICE 25c.

Korean and Japanese Tobacco.

The difference between Korean and Japanese tobacco is that the latter, while not so good in quality, is cured in a better manner. The tobacco of both countries is of a much inferior quality to that grown in the United States.
