EVANSVILLE STOVE STORE

SOMETHING NEW AND Important to Housekeepers.

The Subscriber having secured the Patent Right for the counties of Vanderburgh, Posey, Warrick, Gibson and Knox, for

WAGER' AIR-TIGHT COOK STOVE,

Now offers them for sale, after having given them a *thorough trial*, with every confidence that they are THE BEST stove ever offered. I have sold a dozen or more to our citizens, no one of them could be purchased for the money paid for them.

This Stove is simple in its arrangement, avowing all liability to get out of repair. Its economy in fuel; its strengthened plates were exposed to fire; its enlarged flues, holding in suspense so much heated air, its perfected summer arrangement, where all small culinary operations, with broiling and boiling, heating irons and preserving may be performed without heating the stove; its perfect draught under any circumstances; its capacity for performance; the small space it occupies; the large size and complete control of heat in its oven; the smoothness of its castings; the elegance of its form, making it a rich and beautiful piece of furniture; all constitute an extraordinary combination of beauty, convenience, and durability, which leaves it without competition in the whole catalogue of Stoves.

This stove has taken the first premium both at the Country Agricultural Fairs and at the American Institute, New York, and we have numerous testimonials of its entire success in winning its way to public favor amid the tremendnous competition of the East.

The following cirtificates from Gen. Joseph Lane and others, who have them in use will speak their worth.

EVANSVILLE JULY 10 1847.

Mr. Thomas Scantlin.—Sir: The Wagar's Troy Air-tight Cooking stove, that you put up for Mrs. Lane is an excellent one and she thinks decidedly the best cooking stove that she has seen, its capacity for baking is far better than any stove that we have tried. Rerpectfully yours

JOSEPH LANE.

We whose names are annexed having purchased from Mr. Thomas Scantlin Wager's New Air-Tight Cooking Stove take great pleasure in recommending them to the public as being the best arranged cooking and baking stove we have used, the ovens being large baking can be done equal to an brick oven we have ever tried and with one half the ordinary fuel used in stoves, they are neat in their structures and combines economy, with every necessary convenience and in every respect the best article of the kind we have ever used, and would cheerfully recommend them to all persons in want of a good cooking stove.

EVANSVILLE FEMALE SEMINARY.

MRS. C. S. STONE, Principal of the Evansville Female Seminary, takes pleasure in announcing to the public that the Fall Term of this Institution commenced on the 6th inst., with a corps of Teachers, in the building on Water street, hitherto occupied by Messrs. Hotsed.

It is deemed proper to say that we fully purpose conducting the Institution in its extended course so as to answer the present demand of those who would enjoy the distinction and benefit of a finished education. The order of studies have been arranged with much care and proved to be judicious by happy experience; in the execution of which it will undergo no other change or modification, but such as the exigencies of the case demand.

Teachers whose ability and fidelity have been successfully evinced will be employed by the Principal, and will devote their time exclusively to the object of imparting a thorough knowledge of the studies. The most approved modern methods of instruction and discipline will be adopted in the management of the school, while vigilent attention will be paid to the comfort, health and happiness of the *pupils*, omitting no feasible efforts that can contribute the well proportioned development of the intellectual powers of the mind, and to the promotion of such manners and the establishment of such habits as enter essentially into the constitution of every accomplished female character.

We do not intend that any thing shall be wanting either in facilities or efforts to give as thorough an education in the useful branches of study, as can be desired. As to ornamental they will hold the prominence equal to their relative merits—being held subservient and auxillary to more important studies.—Provision will be made for accomodation of young ladies in good families with one or more of the teachers where they will be subject only to parental government. What reason, affection and moral sunsion fail to do towards securing proper application and deportment will not be attempted by other means. It will be considered a duty to get such into the hands of parents and guardians—*avoiding the immorality of squandering time and money*, as education in this school, in every point of light, is professed to be based on christian principle. Religious instruction will be daily imparted with the Bible for our text book—embracing the broad principles of the gospel, *without sectarian bearing*. We wish it understood that the primary department will occupy the first place in the attention of the Principal, as it is our aim to train the mind to patient and independent investigation. And this end is secured by great thoroughness in first principles, commencing with the simplest forms of elementary truth.

Vocal Music and Linear Drawing as a system of graphics, will be taught both as a science and an art, without extra charge. As the community are unacquainted with the Principal it is presumed that the references given with the testimonials will be satisfactory, as our dependence for patronge is not to be placed on 'circulars, professions, promises and pretensions'—but simply on making the Institution what it ought to be and what the community demands. An opportunity will be afforded for those who wish to continue the elementary training in the preparatory and advanced departments, during the vacation.—The pupils in music will receive instruction also.

The course of instruction will embrace a Primary, Preparatory and Advanced Department.

Besides the Elementary branches, instruction wil be given in History, Mental and Moral Philosophy Rhetoric, Compositon, Logic, Botany, Chemistry Mathematics, Ancient and Modern Languages, Music, Vocal and Instrumental, Drawing.
