

INDIANA WOOL TO BE GRADED BY EXPERTS; CLIP TO BE POOLED

INDIANAPOLIS, May 26.—Lewis Taylor, general secretary of the Indiana Federation of Farmers' associations, in a letter mailed to members of the association today, announces that arrangements are being completed with a Chicago warehouse and storage company whereby the wool clip of the members of the association will be graded and pooled on the market.

The chief advantage to the farmers by this arrangement will be in the grading. It is pointed out that wool raisers have been selling much of their product without grading. With the grading being done by experts at the warehouse, the farmers will receive the full return their output warrants and will have information to determine which grade of wool brings the best financial return as a guide in breeding and selecting their stock.

Bag Weighs 350 Pounds. Under the proposed arrangement the warehouse will handle on arrival, store, insure, grade, sell and ship out for 2 1/2 cents a pound. After the wool has been in storage for a period of four months, an additional charge of 15 cents a bag, a month, with insurance added, will be made. The approximate weight of a bag is 350 pounds.

The storage company will make an advance of 35 cents a pound, with interest at 7 per cent if the shipper desires, on shipments as soon as placed under an original railroad bill of lading attached to the company's form of sight draft and signed by the person with legal authority to receive the payment.

It is suggested that under the arrangement farmers will have representatives to observe the handling of the wool from the time it arrives at the storage company's warehouse until it is sold. All matters pertaining to selling wool will be left to the judgment of the company.

THE Standard Oil Company (Indiana), as a public servant, interprets its obligation to the 2,000,000 motorists in the territory it serves as reaching beyond simply supplying them with gasoline and lubricating oils.

The Company feels that it falls short of its full duty, if in the manufacture of gasoline and lubricating oils the elements of economy, efficiency, dependability, and protection are not inherent in every gallon.

The Standard Oil Company (Indiana) requires of its products, that, in addition to furnishing dependable power and lubrication the car investment of the motorist must be protected—his repair bills must be minimized—the life of the car must be prolonged.

Every frictional surface must be conserved. The engine must respond instantly in emergencies. The motorist must get every possible mile out of every gallon of Standard Oil gasoline which he buys.

To make these products as available to the 5-gallon buyer as to the 500- or 5000-gallon buyer, the Company maintains 1300 service stations conveniently located throughout the territory.

The Company realizes that its interests and those of the motorist are a unit—tangible and concrete.

Intelligent self-interest impels the Company to safeguard every product it manufactures and distributes that it may at all times give to the motorist the utmost of value and service.
