

When some girls wear a solitaire everybody can see it goes to their brain.

There are men who can't help making love, at any old time, on any old excuse.

Often a woman changes her man ner to please a man, then he pleases to go in the other direction.

Some summer girls think hardest over their bathing suit.

The aftermath of a love affair is often the beginning of another.

The girl who marries for a home generally stays there.

The quest of riches brings many to ditches.

Too many flirtations spoil the matrimonial market.

Lots of people detest gossip when it is about themselves.

Angelic women almost always expect you to tell them so.

Work is only dishonorable when it is done weakly and in shame.

Deeds of glory are not for the commonplace man; we should remain content with the victory over daily trifles which make up our lives, when all is said and done.

If the June bride can cook, she's all right.

The narrow-hearted man can't help having a narrow mind.

The summer girls are queens in their own rights, provided they bring the figures.

Beauty and brains may go together, by some special dispensation of providence.

Swans live a hundred years and are beautiful to the last—awful unjust to lovely woman, when we think of it.

Many gray mornings have glowing sunsets.

Beauty unsung is beauty pouting in a corner.

Self pity is the only kind of pity it is given a few unfortunates to know.

Sympathy is wasted when the fellow you're giving it to wants lots more.

When a man's star is in the ascendant, he is apt to think he caused it to climb.

Tribulations do seem to come in bunches when a man has given up hope.

Work is a panacea for all ills, and as balm to the rebellious heart it can be counted upon always.

No man of sense confides that which he would most confide; he limits himself to the superficial.

Like attracts like—and so does dislike.

Better the pinch of hunger than to be pinched by the police.

Love is something best described by those who have never felt it.

Behold the cheerful liar, he spins them, also does he make others yawn.

A well balanced mind weighs well all words before permitting them to escape from between the lips.

Youth has no monopoly of silliness.

There is no flight beyond the reach of the imaginative human mind.

It is a wise man these days who knows which side his bread is buttered on—for all is not butter that goes by that name.

Next to a twisting of facts comes the bare lie.

To be captain of one's fate often means a narrow destiny.

CONDITIONS OF NEGROES INVESTIGATED

BOOKER T. WASHINGTON HEADS DISTINGUISHED PARTY ON PLEASANT AND INSTRUCTIVE TRIP THROUGH MACON COUNTY, ALABAMA.

Tuskegee, Ala.—Within the last two or three years Dr. Booker T. Washington has made quite a number of extended trips through various parts of Macon County, Ala., for the purpose of seeing for himself just what the colored people are doing and under what conditions they are doing it. It was just such a trip as this that Dr. Washington made through the southwestern portion of the county on Sunday, recently. He was accompanied by Judge R. H. Terrell and Hon. Whitfield McKinley, both of Washington, D. C.; Lord Eustace Percy of the British Embassy of Washington; Mr. W. T. B. Williams, agent for the Anna Jeanes fund and Slater fund; Dr. Thomas J. Jones of the United States Census bureau, and Mr. George L. Knox, editor of the Indianapolis Freeman, as well as quite a number of the teachers and friends from Tuskegee.

The first stop was made at the residence of Mr. Lott Ellington, a successful farmer, his house, yard and garden were all inspected and found to be in almost perfect condition.

The next stop was at Fort Hull, where much to the surprise as well as to the delight of some of the members of the party, as it was generally understood that breakfast would be served at another place. Mr. Morgan Russell, a successful white farmer in that section, had prepared quite an elaborate breakfast; after eating the party then went to the little church, which was only a few paces from the tables where a very short meeting was held.

Leaving here the next stop was Mt. Andrews community; however, it might be well to mention the fact that just before reaching this community a mounted committee met the party, and one of the most unique scenes of the whole trip were the four members of the committee who were on oxen which were saddled and bridled. In the Mt. Andrews Community church was an excellent exhibit of the Farmers' Improvement club. The object of these clubs, which are scattered throughout the various communities, is to decide how they can meet the conditions that would naturally confront one living in the country. This exhibit consisted of vegetables, fruit, and several kinds of meats all grown on their land. The majority of the homes occupied by these people were all whitewashed and painted.

In the course of his remarks here Dr. Washington said that people could not go through a community without being encouraged. "Here in Macon county you have good land that will grow abundant crops. You have a good citizenship here and there is every opportunity for you to make this a little heaven right down here on earth. Therefore get some land and cultivate it."

The party then proceeded to Liberty Hill, where a brief stop was made. It might be well to mention that the people in this community own between twelve and fifteen thousand acres of land. After one or two speeches the members of the party proceeded to Mt. Pisgah. They were met by a large crowd, headed by the Farmers' Improvement club. In the schoolhouse the visitors found all kinds of vegetables and sewing, and were informed that the colored people owned over two thousand acres of land and quite a large herd of live stock. Dr. Washington urged the people to get hold of land and keep it, to do better farming, and grow something else besides cotton. He also made reference to what is known as "Draw Saturday," urging the people to get out of the habit of going to town every Saturday purposely to draw from the merchants, when they have the opportunity to draw from the soil every day such things as corn, peas, and almost every other kind of vegetables. He laid special stress upon the importance of making the home more comfortable.

A FRAGRANT TRAIN

CUT FLOWER LIMITED EXPRESS A UNIQUE FEATURE IN FRANCE.

Every night during the winter months a special train, popularly called the "Rapid des Fleurs"—the cut flower limited express—of ten cars, leaves Toulon for Paris over the line of the Paris, Lyons and Mediterranean railway, carrying cut flowers in baskets and cardboard boxes from all stations on the line from Nice to Toulon to the Paris markets. Certain cars are switched off to Frankfurt, Berlin and Munich; others continue to Brussels and others to Calais, where their perishable freight is rushed to the markets of London and Manchester.

Certain shipments reach St. Petersburg and Vienna, and the facilities thus offered the flower growers of southern France are unique in the transportation world. A special train crew sorts these tens of thousands of

parcels en route, the eight or ten sorters handling the baskets as carefully as the mails are handled.

The cut flower industry of southern France began with the impetus first given by Alphonse Karr, the ecrivain Jardinier, as he was known when he settled in St. Raphael in the latter part of the last century.

Today the violets of Hyeres, like the roses and carnations of Antibes and the narcissus and Roman hyacinths of Ollioules, Le Pradet and Carqueranne, are found in the shops of Paris scarce eighteen hours after they were growing in the open air on the Mediterranean shores.

Trimnings from new flax and hemp are the stock from which is made the finest grades of "rice" cigarette paper.

CHEAP PERFUMES

MADE FROM MUSK SUPPLIED BY MANY VARIETIES OF CIVET CATS.

Most women who indulge freely in the use of cheap perfumes do not know of what they are compounded. The principal ingredient of low-priced perfumes is musk, animal musk, which is obtained from several creatures.

The muskrat is probably the best known of these, and a few decades ago the wives and sweethearts of men who set traps around ditches and ponds in the countryside carried proudly the bags of musk obtained from this source. As an article of commerce the musk supplied by several varieties of civet cats is probably the best known today. The odor is strong and sweet. The strength is the particularly noticeable feature and is the reason why it is the foundation of the perfumes. In the small mammal house at the zoological gardens are two sizes of civets, and any one with an investigating turn of mind may stand near the cages and catch the musky odor.

The musk is used in the cheap perfumes, as only a little is needed to give a most lasting odor to an ounce of perfumery, but the musk itself is not cheap, and it is one of the duties of the attendants of the mammal house to collect it. It is then sold through regular channels and is one of the sources of revenue to the zoo, although a small one.—Philadelphia Record.

From 1893 to 1909 the acres of potatoes harvested in Maine increased 64,003, or 89 per cent. From 46,617 acres in 1887 there was an increase to 71,765 in 1899, and again to 135,768 in 1909. The total yield in 1909 was 28,552,911 bushels, the average yield an acre 210 bushels, and the average value an acre \$75.30.

At the Yarmouth town council it was recently proposed that the donkeys on the sea front should not be allowed to carry persons weighing more than eight stone.

KEROSENE CURES.

If you can stand the odor, a bad cough can often be cured by five drops of kerosene taken on a lump of sugar. If this sounds too horrible much the same effect is achieved by swallowing vaseline.

Put into a jar one quart of green gooseberries, with two table-spoonsful of water and two cupfuls of sugar; set the jar in a saucepan of boiling water and boil until the fruit will mash; beat to a pulp and put through a coarse sieve. To one pint of pulp add one-half pint of cream and one cupful of milk; the milk first gradually, beating.

GOOSEBERRY FOOL.

Put into a jar one quart of green gooseberries, with two table-spoonsful of water and two cupfuls of sugar; set the jar in a saucepan of boiling water and boil until the fruit will mash; beat to a pulp and put through a coarse sieve. To one pint of pulp add one-half pint of cream and one cupful of milk; the milk first gradually, beating.

SHOOTING A HORSE

THE WAY TO INSTANTLY END HIS MISERY SHOULD HE BREAK A LEG.

When a horse falls in the harness his natural inclination is to get up again. The shock of the fall has excited him more or less, and in his efforts to arise he may further injure himself as well as the harness.

The first action should be to sit on his head, pointing his nose upward with one hand, to keep him from struggling until the traces and all other attachments to the vehicle can be unfastened. If two persons are present this can be done without difficulty.

If a horse breaks his leg the most humane as well as the most sensible action is to shoot him on the spot. It is true that cases are on record where broken legs have been successfully treated by means of suspending the horse in a sling and pulleys, but the experiments in this direction have almost invariably met with failure.

To shoot a suffering animal and kill him instantly is not so simple a matter as it at first appears, says Country Life in America. Many shots are sometimes fired before death results. How and where should a horse be shot?

In the center of every horse's forehead a little above the line of the eyes is a little swirl something like a cowlick. Three inches above this swirl is the exact spot to lodge the bullet to insure its piercing the brain. The bullet should not be of less than 35 caliber.

For sprains hot or cold bandages are recommended. Fomentations promptly applied sometimes prevent permanent lameness. Spraying of the back sinews is only too common and unless promptly and properly treated results in knuckling and other complications. Blistering, firing and even nerving are resorted to, but it should be borne in mind that these drastic measures are often unnecessarily taken. Rest, turning out where practicable under favorable conditions, and massage often effect a cure.

Not infrequently a horse will pick up a nail. It is unnecessary to say that the first aid is to remove the nail. If suppuration ensue poultice the wound and give the animal rest until well. It may be well to remove the shoe for a time. Great care should be taken that the nail be not broken off flush with the sole and left there to fester. Horses are peculiarly susceptible to tetanus or lockjaw, and a nail often causes it.

FLASH-LIGHTS

That if you work for a man, in heaven's name work for him. If he pays wages that supply you your bread and butter, work for him, speak well of him, think well of him, stand by him and stand by the institution he represents.

The man who is worthy of being a leader of men will never complain of the stupidity of his helpers, of the ingratitude of mankind, nor of the inappreciation of the public.

That failure is only for those that think failure.

That every man should keep a fair-sized cemetery in which to bury the faults of his friends.

That persistence has won most of the world's battles and all of its skirmishes.

That the devil was asleep when man was made, but he awoke before woman was completed.

That to be great in our history or in any other history a man must stand for something.

That the orator persuades and carries all with him he knows not how; the rhetorician can prove that he ought to have persuaded and carried all with him.

That only about one man out of fifty ever thinks. The rest merely memorize and think they think.

That quite 70 per cent. of ambition is never realized at all, and 90 per cent. of all ambition realized is fruitless.

That quality holds off competition.

That it would be a superb thing if we were all big enough in soul to see no slights, accept no insults, cherish no jealousies and admit into our hearts no hatred.

That luck means rising at six o'clock in the morning; living on a dollar a day if you earn two; minding your own business, and not meddling with other people's.

Hood's Sarsaparilla

Acts directly and peculiarly on the blood; purifies, enriches and revitalizes it, and in this way builds up the whole system. Take it. Get it today.

In usual liquid form or in chocolate coated tablets called Sarsatabs.

DAISY FLY KILLER

planted anywhere, it attracts and kills all flies. Kills flies, mosquitoes, house flies, etc. Lasts all season. Can't get it off your nose, will not soil or injure anything. Guaranteed effective. Of all dealers or send postal for this. HAROLD HUMERS 150 De Kay Ave. Brooklyn, N. Y.

An Eight Years' Walk.

Hiram Davis of Newburg went for a walk with his father eight years ago. The father stopped to talk with a friend, and Hiram, then about ten years old, walked on. He was never seen after that until he walked into his parents' home recently.

The police all over the east were on the lookout for him, the Hudson river was searched and finally he was given up for dead. When he greeted his mother it was some hours before she could be calmed.

Davis has been out west.—New York Sun.

Sincere But Awkward.

It was at the private theatricals, and the young man wished to compliment his hostess, says the Boston Transcript:

"Madam, you played your part splendidly. It fits you to perfection." "I'm afraid not. A young and pretty woman is needed for that part," said the smiling hostess. "But, madam, you have positively proved the contrary."

No Argument There.

She—Oh, but mamma objects to kissing.
He—Well, I'm not kissing your mother, am I?

FREE

A trial package of Munyon's Paw Paw Pills will be sent free to anyone on request. Address Professor Munyon, 534 & Jefferson Sts., Philadelphia, Pa. If you are in need of medical advice, do not fail to write Professor Munyon. Your communication will be treated in strict confidence, and your case will be diagnosed as carefully as though you had a personal interview.

Munyon's Paw Paw Pills are unlike all other laxatives or cathartics. They coax the liver into activity by gentle methods. They do not scour, they do not gripe, they do not weaken, but they do start all the secretions of the liver and stomach in a way that soon puts these organs in a healthy condition and corrects constipation. In my opinion constipation is responsible for most ailments. There are 26 feet of human bowels, which is really a sewer pipe. When this pipe becomes clogged the whole system becomes poisoned, causing biliousness, indigestion and impure blood, which often produce rheumatism and kidney ailments. No woman who suffers with constipation or any liver ailment can expect to have a clear complexion or enjoy good health. If I had my way I would prohibit the sale of nine-tenths of the cathartics that are now being sold for the reason that they soon destroy the lining of the stomach, setting up serious forms of indigestion, and so paralyze the bowels that they refuse to act unless forced by strong purgatives.

Munyon's Paw Paw Pills are a tonic to the stomach, liver and nerves. They invigorate instead of weaken; they enrich the blood instead of impoverish it; they enable the stomach to get all the nourishment from food that is put into it.

These pills contain no calomel, no dope; they are soothing, healing and stimulating. They school the bowels to act without physic.

Regular size bottle, containing 45 pills, 25 cents. Munyon's Laboratory, 534 & Jefferson Sts., Philadelphia.
