The Detroit Vapor Oil Stove

What's the use of heating up an iron cook stove all the summer, making so much unnecessary work, dust and expense of fuel, making the house hot for a long time, when all the cooking can be done in a simple, easy and effective way just as well in a **Detroit Vapor Oil Stove**. Nothing to do but light it, and turn it out when through. No coal to carry in or ashes to carry out. Everything so clean and tidy, besides the saving of fuel and work. Carried in two, three, and four burners; prices \$21, \$26, and \$32.

We also carry the "Perfection Oil Stove" with one to four burners.
