 \* KISSING BY TELEPHONE IS NEXT ON THE \*  
 \* PROGRAM—ALL THERE BUT THE THRILL \*  
 \*\*\*\*\*

Kissing by telephone will be as easy as talking when Jerome Meyer of Baltimore gets his new invention installed in every home.

But it won't be quite as satisfactory, for the thrill will be missing. Aside from that intangible, but highly important feature, you'd never know the difference, for by Meyer's invention you hear the ecstatic sigh, see the love-light in your lady's eye and glimpse the blush that touches with crimson her creamy cheek.

Yes, indeed, for it is said that Meyer, at 26, has perfected a

televisual apparatus that does for the eye all that the telephone does for the ear. It isn't the first invention designed for "seeing by telephone," but Meyer's friends say it is the closest approach to a practical utility yet announced.

The idea of such an invention fascinated Meyer for years. Then one day he read of Dr. Pfund's discovery that the rare metal, selenium was so sensitive to electrical changes that the rays of light made varying degrees of shadow upon it.

Each shade of the shadow, the
