

TANGO GARTERS MAKE TANGOING EASIER

Tango garters!

They're the latest innovation thrust upon us by the craze for the irresistible Argentine dance.

The first pair bought in Chicago was purchased by one of this season's very prettiest debutantes.

Tango garters are Dame Nature's shock absorbers.

From each garter band, which fits

snugly just above the knee, falls a ruffle of lace and ribbon, which completely conceals the wearer's leg.

The woman who wears a pair will find that in addition to being dainty and graceful, the tango garter affords that freedom of movement so necessary to the season's favorite dance.

The tango garters replace skirts, allowing freedom of movement. At the same time they drape the leg and ankle modestly, so it is never displayed through the slash in the tango skirt.
