COMB SAGE TEA IN HAIR TO DARKEN IT

It's Grandmother's Recipe to keep her Locks Dark, Glossy, Beautiful.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's recipe, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the mummy mixing at home. All drug stores sell the ready-to-use product, improved by the addition of other ingredients called "Wyeth's Sage and Sulphur Compound," which is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive.

This ready-to-use preparation is a delightful toilet requisite for those who desire a more youthful appearance. It is not intended as a cure, mitigation or prevention of disease.

About Batteries

Q—Is there really any difference in batteries?
A—Yes, but there are really only two kinds of batteries. Those with wood separators and those with Threaded Rubber Insulation.

Q—Is Threaded Rubber Insulation the only feature that puts the Willard Threaded Rubber Battery ahead of the ordinary automobile battery?
A—By no means. The Willard Threaded Rubber Battery has all the improvements that have gone into Willard's years of specialization in building starting, lighting and ignition batteries. Ask us about it.
