You Beer Drinkers

Read THIS!

"Beer acted upon by light soon takes up the very disagreeable so-called 'light taste,' and also a repulsive skunk-like odor.*** Beer so affected is offensive to the palate of most consumers.*** Beer should not be exposed to light, especially to direct sunlight, as it will thereby be detrimentally affected, the light having an influence upon the albuminoids in beer, causes the beer to become hazy.***"

Make your cut glass sparkle with GOLD DUST

Soap leaves a greasy film on glass, which is hard to remove; the following method of washing will, however, make glass crystal clear:

Take a wooden tub, or pad the metal sink with soiled glass-linen towels, or any soft piece of cotton. Wash the glass in warm suds, made by dissolving a teaspoonful of Gold Dust washing powder in a pan of hot water; use a soft brush to clean surface, then rinse in water of the same temperature.

After the glass has been carefully dried on glass linen, use a camel's hair brush to polish the cut.

A Fine Sense of Feeling.

One of two darlings who run a boot-black "parlor" in partnership was bragging of his well developed sense of touch, particularly in the matter of money. He boasted that he could tell the denomination of any United States coin merely by feeling it. His partner wearied of these boasts and came back with this:

"Your sense o' feelin' ain't nothin' to my friend Marcus. Him and me used to work on the Pullman down through Kansas. Marcus had been on this route for about ten years. One night when we was both a-sleepin', "long around midnight, I wakes up and I shakes Marcus and I says, 'Marcus, where are we?' And Marcus jest rolls over and sticks his hand out the window and he says, 'We're goin' through Oswego.'—Everybody's."

Sorrows of Authorship.

"Paradise Lost" brought Milton only a paltry \$5—about \$25 of our money.

Hawthorne for twenty years continued to be, to use his own words, "the obscurest man of letters in America." "There is not much market for my wares," he said at another time.

There is an interesting example. A thousand copies of his "A Week on the Concord and Merrimack Rivers" were printed, but very few of these were sold, and a considerable number were given away by the author. The remainder were returned to him and were stored in his attic. He grimly observed, "I have now a library of 900 volumes, the greater portion of which I myself have written."—New York Press.
