

SHERIFF BRUNER MAKES SHAKE-UP AMONG DEPUTIES

Removes Chief Siemon and Promotes Miller to the Position.

NEW JAILORS IN CHARGE

Alvine to Move in First of the Month — J. G. Britton is Offered a Place.

Sheriff O. L. Bruner left his cot in Tri-City Sanitarium in Moline last night long enough to come in a taxi to his office in the court house and summon his deputies about him. Things had not been running satisfactorily in his office during his sickness, Sheriff Bruner advised his assistants, and he had long contemplated a change. He therefore asked Chief Deputy Jailor George Siemon for his resignation. This in written form was immediately forthcoming, whereupon the sheriff at once promoted Deputy Sheriff Phil Miller to the place of chief deputy and Deputies J. E. Wiggins and Hugo Alvine were made jailors. Mr. and Mrs. Siemon will remain in charge of the jail until August 1, when Mr. Alvine will move his family into the living quarters.

J. G. Britton was offered the position of deputy to fill the vacancy. BRUNER TALKS OF CHANGES. In conversing with The Argus over the phone from the Tri-City Sanitarium this morning, Sheriff Bruner said: "Conditions in the sheriff's office have not been satisfactory to me for some time, and I have had the change in mind for several weeks. Yesterday after I got up here, I made up my mind that there was little chance for me to get on my feet with constant worry over the conduct of my office hanging over me. So I went down in an automobile last night and made the changes.

"Mr. Miller has been loyal to me throughout all my troubles and while I have been confined to my house, I have felt that I could rely upon him to represent me until I can get back on the job, and with the new arrangements in force I am able to rest easy on that score, at least."

SIEMON INTERVIEWED. When former First Deputy George Siemon was interviewed this morning he stated he had nothing to say for publication. He admitted that he was no longer connected with the sheriff's force and that he had been succeeded by Phil Miller. He said that he would move from the county jail just as soon as he could secure possession of his own home which is now rented. He had no plans to announce relative to his future work but expects to continue to reside in Rock Island.

PARENTS PUZZLED BY SON'S ABSENCE

Paul Brown.

The strange disappearance of Paul Brown, collector for the National Insurance company and for McCabe's, is giving his father, James G. Brown, much concern. The young man, who is 21 years of age, left home July 7, and no word of his whereabouts has been learned since.

POLICE NEWS

William Wilson, colored, absorbed too much gin last night and became involved in a fight. Officer Kell placed him in jail for safe keeping and this morning a \$50 fine was assessed.

Maurice Gilman, charged with disorderly conduct, was arraigned in police court this morning, and his attorney, J. K. Scott, entered a plea of guilty before any witnesses could be put on the stand. A fine of \$5 was assessed. Gilman, it will be remembered, was accused of an attempt to abduct a girl and take her into a shady hotel. This morning interested parties stated that the girl had been drinking and was afraid to return to her home, and that was the reason she was being taken to the hostelry in question.

The police today denied the rumor that a negro, Jack Palmer, was being held here as a murder suspect for a crime committed in Chicago. "We have been picking up the stray negroes about town," said the police today, but as to arresting anyone for a murder suspect, that is a pipe dream. The police also denied that they yesterday had a clue as to box car thieves in the Milwaukee yards, and had trailed two negroes.

Joe Holmer, drunk, was fined \$3 and costs.

HEIRS TO FORTUNE SOUGHT BY POLICE

Murdered California Woman Leaves Estate Valued at Over \$100,000.

FORMER RESIDENT HERE?

Moliner Asks Aid of Chief Brinn and of the Freeport Authorities.

The aid of the Rock Island and Freeport police is being sought in an effort to locate relatives of a woman known as Cherry De St. Maurice, real name, Flossie Baldwin, who was murdered in her apartments at Sacramento, Cal. one week ago. The hunt is being engineered by W. I. LaRash, a printer employed at the DeSaunders plant in Moline, who rooms at 2324 Sixth avenue, that city. LaRash came to Chief Brinn last Sunday, and made inquiries as to whether or not the local force knew of the St. Maurice woman having lived in Rock Island. He is now in Freeport, attempting to locate relatives there, as the murdered woman was born in that city, and there are a number of Baldwins now living there.

An estate valued at over \$100,000 awaits the fortunate relatives, but thus far the search has been vain.

BRUTAL MURDER.

Cherry De St. Maurice was married in Chicago at the age of 16 years. A baby girl was born, and a few days afterward the husband deserted her. Subsequently she secured a divorce. The woman then joined a theatrical troupe. Ten years ago she made her home in Sacramento, and in that brief space of time amassed her fortune. She was 37 years of age, very handsome, and of Irish descent.

The woman was murdered in her apartments by Jack Drumgold, a prize fighter, and Sam Roberts, alias Raber, a cafe entertainer. The men clutched her by the throat, and throwing her to the floor choked her to death. Robbery was believed to have been the motive. Various valuable diamonds were stripped from the dead woman's body, and the entire place was ransacked for hidden money and valuables.

IMPORTANT THAT ROAD BE BOOSTED

Many Rock Islanders Planning to Attend Mass Meeting at Edgington.

Rock Island business men are showing a great deal of interest in road improvement in the lower end of the county and a number propose to attend the meeting at Edgington Saturday night at which it is likely an organized movement for the betterment of at least one route through the district will be inaugurated. The delegation from here will go by auto, and those desiring to attend, and who have no means of getting there, are asked to notify either H. S. Cable, president of the Rock Island Savings bank, or J. L. Vernon, vice president of the People's National, who will endeavor to provide transportation.

A number of speakers will be heard on the subject of highway improvement and the new law under which state aid may be secured will be explained. The project is one in which Rock Islanders are as much interested as are farmers in the west end of the county. Considerable tracts of land in the district that the road would reach are owned by Rock Island citizens, and every land owner is a booster for better highways.

Cut off by natural barriers as Rock Island is from the country that must supply it with produce and with which its business men have to deal, it is of the utmost importance that the highways leading to it, be made passable at all times. Especial need exists because of the fact that the district in which road improvement is proposed is entirely without transportation facilities other than those afforded by the highways, and the country is one of the richest that lies out of doors.

The meeting at Edgington has been called by the Progressive Country club of that township, and it is understood that the route favored is from Milan to Taylor Ridge, thence to Edgington, Illinois City and on west, possibly to Muscatine. This route carries the heaviest local travel of any in the west end of the county and is favored by many for that reason. However, there are a good many who advocate the building of a permanent road down the Mississippi valley as offering fewer

Kill the Parasites and Save the Hair

If your hair is thin at the temples, or receding from the forehead, or if there is a thin bald spot on your crown—if the brush or comb is filled with hair after you use it—you need a shampoo that will directly attack the parasites that cause the death of hair. Scientists agree that falling hair and baldness are caused by a vegetable parasite that finds its home in an unclean scalp, and is easily conveyed from one person to another. Mother's Shampoo kills the parasites that cause falling hair. It is a scientific formula that scours the scalp, yet is mild and gentle in action. You can buy Mother's Shampoo from your druggist for 25 cents a package, containing 10 shampoos. Dissolve a teaspoonful in a cup of hot water, pour on the head and wash, then rinse thoroughly. The scalp will be refreshed and pliable; it won't "pull" nor feel harsh nor dry. It prepares the scalp for a healthy growth of hair, and makes the hair soft and fluffy.—(Adv.)

since we had a demonstration of articles of such superior merit as the Luxtone Preparations. The Luxtone beauty specialist will be at our store the rest of this week and will give a thorough course of instruction on the care of the skin and the acquiring of a beautiful complexion.

Luxtone Beauty Secret
A dainty wet powder in the form of a cream which instantly beautifies and permanently benefits.

Luxtone Rubint
Cannot be detected from Nature's own coloring.

Luxtone Cucumber Cream
Protects the complexion from the sun and wind and keeps it clear and delicate.

Luxtone Almond Olive Cream
Is one of the best tissue builders on the market.

BANKER'S HEROINE WIFE HOPES TO CLEAR HIS NAME AND START HIM ANEW IN MEXICO

Mrs. M. A. B. Ham.

San Francisco, Cal., July 17.—Mrs. M. A. B. Ham, wife of George I. Ham, the banker, who effected his release from a Mexican prison during the turmoil of the revolution, has arrived from the lower coast. Single handed, she labored in behalf of her husband, who is now trying to recover his health in Europe, in an effort to recoup the broken fortunes of the banker, whose imprisonment for alleged misappropriation of funds attracted wide attention two years ago.

Undismayed by the trials and tribulations she underwent in the southern republic, Mrs. Ham still has hopes that the interests of her husband will come out all right and she says that they expect eventually to return to Mexico. She formerly lived in Pasadena.

During the time Ham was languishing in a dungeon his wife worked bravely for his release, appealing to many high and influential sources to no avail. She made many trips to Mexico City, experiencing all kinds of odd adventures. Then came the revolt, and a fortunate revolt it was for the

difficulties and greater advantages in the way of direct connection with the three cities.

Crackmen Get Jewelry. New York, July 17.—Crackmen secured jewelry valued at between \$20,000 and \$30,000 early today by blowing up a safe in the Rosenberg Daniel jewelry supply house.

FINE INVENTION OF A LOCAL ELK

Robert L. Hunter Has Vacuum Print Drier That Is Attracting Attention.

An invention which promises to revolutionize the photographer's art has just been completed by Robert L. Hunter, who has a photographic supply store at 1506 Second avenue. He has sold the manufacturing rights to Burke & James, Inc., Chicago, who will place the device on the market. A patent has been applied for.

The invention is a vacuum print drier. With it flat, dry prints can be turned out in 30 minutes instead of taking 48 hours as previously. Many methods of drying and flattening prints have been advanced from time to time but have not been very satisfactory. During the process of developing, fixing and washing of prints, both the coating and its paper support expand considerably. In drying, the emulsion contracts to a greater extent than the support, with the result that the print is drawn out of shape. With the vacuum drier the print roll holds the

print in a flat position, slightly curved back from its emulsion side from the time it leaves the wash water until it is bone dry.

In operation the vacuum drier is extremely simple. As soon as the prints are taken from the wash water and the surplus moisture removed they are rolled up in the apron between blotters about the print roll drum. The roll is next placed endwise in the lower funnel of the drier, and the upper funnel is drawn down about the upper end of the print roll. A strong vacuum is formed above the print roll as soon as the fan is started, drawing a rapid circulation of air upward through the corrugations of the print roll apron. A small heater in the warm air chamber, beneath the lower funnel, serves to make drying quicker in moist weather. It is not necessary when the atmosphere is dry.

Mr. Hunter leaves this evening for Kansas City where he will demonstrate his drier before the National Photographers' convention for the Burke & James company.

Teething children have more or less diarrhoea, which can be controlled by giving Chamberlain's Colic, Cholera and Diarrhoea Remedy. All that is necessary is to give the prescribed dose after each operation of the bowels more than natural and then castor oil to cleanse the system. It is safe and sure. Sold by all druggists.—(Adv.)
