OFFICIAL PAPER OF SEWARD COUNTY, LIBERAL CITY AND UNITED STATES LAND OFFICE.

Subscription price.....\$1.50 Per Year

Mr. Chas. Molter and daughter Mary drove a new Overland Sedan from Wichita Tuesday.

Mr. and Mrs. Joe Maas, Mr. and Mrs. J. M. Ferguson left Tuesday for a few days visit with relatives at Great Bend.

Mr. William Looper underwent an operation at a local hospital Tuesday. He had been employed on the L. P. Warner farm, south of the city.

Mr. and Mrs. John Bledsoe returned to their home in Jacksonville, Indiana Wednesday after several weeks visit with Mrs. Bledsoe's brother, Mr. L. N. Ellexson, of near Liberal.

Mr. Mike J. Stedje, a farmer living near Spearman, Texas, died at a local hospital, Tuesday, July 11th. The body will be shipped to Spearman for burial.

Miss Dessie Tune who has been employed at the Platte State Bank of Wheatland Wyoming, has resigned her position there and will arrive in this city soon to make her home with her parents, Mr. and Mrs. G. W. Tune of West Fourth Street.

Last Sunday, Rev. Henry was in charge of the League Meeting. The subject was: "The Proclaimer of a Changed Life." This man was John Wesley. Rev. Henry told in a very interesting manner of the life and the great work of John Wesley. Rev. Henry threw out a challenge to the young folks to take up their work and move forward.

Next Sunday, "Hank" Highland will be the leader and the subject is "Only they who know can save". All you Epworthians know "Hank" and his ability to lead, so come out and see him in action Sunday.

Kenneth Sawyer, youngest son of Mr. and Mrs. G. W. Sawyer, had the misfortune of breaking his arm Sunday while vaulting from the porch nicely at this time.

UNABLE TO CREATE DISEASE

Science Has Demonstrated the Impossibility of the Human Mind Having That Power.

"In one sense it may be said that the human race gets the diseases it deserves; but the sins are those of ignorance and neglect of physical laws rather than against spiritual ordinances," said Sir Richard Gregory in the course of his address at the recent Edinburgh meeting of the British Association for the Advancement of Science.

"Plague is not now explained by supposed iniquities of the Jews or conjunctions of particular planets, but by the presence of an organism conveyed by fleas from rats; malaria and yellow fever are conquered by destroying the breeding places of mosquitoes; typhus fever by getting rid of lice; typhoid by cleanliness; tuberculosis by improved housing, and most like diseases by following the teachings of science concerning them. "Though the mind does undoubtedly influence the resistance of the body to invasion by microbes, it cannot create the scientific organism of any disease, and the responsibility of showing how to keep such germs under control and prevent, therefore, the poverty and distress due to them is a scientific rather than a spiritual duty."

American-Grown Bulbs.

In the future it is not likely that the United States will continue to depend upon Holland for our spring flowering bulbs. This country uses annually about \$2,000,000 worth of Dutch bulbs, and produces scarcely \$25,000 worth in any one year, this despite the fact that few plants are more widely adapted and few crops more easily grown than bulbs. The Federal Department of Agriculture has prepared a very interesting bulletin on bulb culture in the United States which points to rich possibilities in the years to come.

Bulbs can be grown in this country on both the Atlantic and Pacific seaboard and in the Ohio and Mississippi valleys. Some of the hardier and more robust of the narcissus varieties thrive even in the gulf states. Contrary to what would be generally supposed, it is not too cold for tulips and narcissus to succeed as far north as Sitka, Alaska. They thrive along the entire border of the United States, wherever the moisture conditions are suitable.

Learned to Love Japanese.

Major General William Verbeck, former adjutant general, who is president of St. John's school at Manlius, N. Y., lays claim to being the first white boy of American parentage to be born in Japan. His father was a missionary who was attached to the Tokugawa government as an educator, and later helped to establish the Japanese Imperial university. Young Verbeck's playmate and friend was a Japanese boy whom his father helped to bring back from California when he was detained and stranded while in quest of an American education. The boy's name was Korekiyo Takahashi. He is now premier of Japan. "Through this Japanese boy," said General Verbeck, "and my association with his people, I learned to love them and to have the highest respect for their integrity."—New York Evening Post.

It is a common notion that if a dove were let loose with its eyes blinded, it would fly straight up into the air until it fell from exhaustion.

If you are going downhill when you hear the first dove in the season, you will lose something. If you are going up, you will find something.

If a gentle ground-dove or turtle-dove is seen strutting along on the top of a home in Barbados, it is a sure sign of death to the inmates.
