

CAN'T SHAKE HIM

Haywood's Attorneys Give Orchard Up as a Bad Job.

Are Merely Laying Foundation for Contradictory Evidence.

ADAMS ON THE WAY.

Another Prisoner Witness for State to Be Heard.

His Story Expected to Eclipse the One Already Told.

Boise, Idaho, June 10.—Harry Orchard commenced his fifth day's grilling on the witness stand in the Haywood murder trial this morning.

The tragedies of two years of his life, prior to the time the gates of the Idaho penitentiary were closed upon him, have yet to be rehearsed in detail.

Under the cross examination of E. F. Richardson the tax upon the man's memory would appear to be more than the ordinary mind could be capable of, but so far Orchard has stood the test.

If he goes through the cross examination with as little confusion in his statements as he has evidenced the last few days, it will have been, perhaps, the most remarkable exhibition ever given on a witness stand.

Counsel for the defense themselves do not hesitate to pronounce Orchard the most difficult proposition they have ever been called upon to face in the course of their experiences as lawyers.

Practically they have given up hope of being able to shake the man's testimony so far as material points are concerned and they say that the present examination is made not for the purpose of confusing Orchard, but to place before the jury statements which will contradict in detail by their own witness.

Among the witnesses expected to arrive in the city today is former Governor Stead Adams to testify.

Steve Adams, another prisoner-witness for the state, is now on his way to Boise, coming from the jail at Wallace, where he is held pending trial.

LEAVENWORTH IS DRY.

Every Saloon in the Town Closed at Midnight of Saturday.

Leavenworth, June 10.—This city today for the first time in many years has not an open saloon.

The twenty-five or thirty that were left over after the vigorous campaign of the past two weeks closed their doors at midnight and made no pretense of opening on Sunday.

Nor are they open today. Leavenworth is dry.

It is understood the saloon keepers in the county were also given "official" notice to close their places and some of them have already done so.

Saturday, Acting County Attorney Harper, while in the court house, received a phone message from the attorney general who said in substance:

"Get some officer whom you can trust; give him the list of names of all in Leavenworth who are selling liquor, as furnished you by Chief of Police Cranston; have this officer go to all of these places and notify the keepers thereof that they must close their places of business at midnight tonight, to remain closed; that if any of them open their places and sell liquor after midnight tonight search and seizure warrants will be issued, their places raided and injunctions will be run against the buildings they occupy."

Attorney Harper gave to the deputy sheriff the list of saloons furnished him by Chief Cranston and then started on his long trip, to visit 105 places. Some of them he found closed; others were still running.

Larkin didn't look for the "evidence"; he was merely on duty notifying the places to close and he did so. The list he had contained the names of all the saloon men together with the number of the property they occupied. The action was effective.

SCULPTOR WORKS IN JAIL.

He is Modeling a Group of the Italian Royal Family.

Rome, June 10.—Felippo Ciefarello, a noted Italian sculptor, who was in prison in Naples for more than a year, awaiting his trial for the murder of his woman companion who was a music hall star, has recently been permitted to work at his art in order to ease his mind of his material troubles.

An adjoining cell has been fitted up as a studio and here, the sculptor, who is believed to be mad, passes the day modeling with feverish activity. His latest work is a magnificent group of the royal family which he has taken from a picture postcard.

The artist has announced his intention of having it cast in bronze, after which he will turn it over to King Victor. He expects that it will be sold and he hopes that the money it brings will be used for the benefit of the prisoners' families.

THE OCEAN RACE ENDS.

Yawl Lila Wins the Sailing Contest From New York to Bermuda.

New York, June 10.—Late dispatches from Hamilton, Bermuda, reported the arrival there of the yawl Lila, three hours and 34 minutes after the yawl Hyperion, both contestants for the cup for the smyler boat in the New York-Bermuda ocean yacht race.

At the Hyperion allowed the Lila six hours and 45 minutes, the later wins the Three club's cup.

Up to a late hour last night the Derbish and the Shamrock were the only schooners that had finished.

Manhattan, June 10.—Just a fraction over one inch of rain fell Sunday and last night. Today is clear and the indications are that the storm is past.

Osage City, June 10.—Rain fell in this section of the state at intervals all day Sunday and a part of last night, and the precipitation according to the government gauge has amounted to .94 of an inch.

Concordia, June 10.—This part of the state was visited by what appears to have been a general rain Sunday and Sunday night and an inch of rain fell which following the rains of last

STATE IS SOAKED

General Rains Visit Kansas on Sunday.

In Many Localities Over an Inch Falls.

BOOM FOR THE CROPS.

Immense Benefit to the Farming Section.

Half Inch of Water Falls at the Topeka Weather Bureau.

Reports received from various sections of the state indicate that another general rain has fallen to the lot of Kansas and that the state has received a second wetting within one week.

All of last week a low barometer was recorded in New Mexico and Sunday this condition shifted eastward until it reached this state and the general rain was the result.

Heavy rains are recorded in various sections, though the southwestern portion received the lighter precipitation. In this city the precipitation amounted to .46 of an inch and the figures indicate that this should be classed among the districts receiving light showers.

The rain began falling in Topeka early in the morning and continued throughout the day and last night at intervals.

The barometer at the weather office in this city yesterday by its sudden starts and stops indicated that a peculiar atmospheric condition prevailed. At one time, about 8 o'clock last night the wind reached a velocity of 45 miles an hour.

The rain of Sunday was of the warm midsummer variety and will be of an immense benefit to the growing crops, following the soaking rains of last week as it did. The air was heavily charged with electricity and the action of the following and growing crops are in good condition.

Weather is Warming Up.

A semi-cloudy condition has prevailed in Topeka all day though there are no indications of showers and the prediction of the weather department of "fair and warmer" seem to have been realized and the forecast for tomorrow is the same as for today.

Reports from towns in the county indicate that the precipitation in this city amounting to .47 of an inch is somewhat under the average. A 20-mile-an-hour wind has prevailed most of the day. The following are the temperatures for the past 24 hours.

7 o'clock 63 11 o'clock 71
8 o'clock 64 12 o'clock 74
9 o'clock 66 1 o'clock 76
10 o'clock 69 2 o'clock 77

Sedan, June 10.—This section of the state was visited by a heavy rain Sunday, the precipitation amounting to 1.34 inches which fell as showers accompanied by a wind, though not of force enough to do any damage.

Manhattan, June 10.—Just a fraction over one inch of rain fell Sunday and last night. Today is clear and the indications are that the storm is past.

Osage City, June 10.—Rain fell in this section of the state at intervals all day Sunday and a part of last night, and the precipitation according to the government gauge has amounted to .94 of an inch.

Concordia, June 10.—This part of the state was visited by what appears to have been a general rain Sunday and Sunday night and an inch of rain fell which following the rains of last

week will be of unestimable value to growing crops.

Baker, June 10.—Showers fell at intervals yesterday and last night the total precipitation amounting to half an inch. The conditions today indicate that more rain may fall before the clouds which are overhanging the city lift.

Dodge City, June 10.—This section of the state was visited by a light shower yesterday during which .04 of an inch of moisture fell. The indications are that the storm is much heavier to the east of us.

Dresden, June 10.—The weather conditions today are clear and the indications are that the 20 hundredths of an inch which this section received Sunday is all that it will get out of the present disturbance.

Fort Scott, June 10.—One and eight hundredths of an inch of rain has fallen in this city during the past 24 hours and the indications are that this portion of the state has received a good soaking which will be of immense benefit to growing crops.

Macksville, June 10.—Sunday was cloudy and during the day and night showers occurred which measured by the weather bureau indicate that .46 of an inch of precipitation has fallen in this section.

Wichita, June 10.—The rain of last week was followed by another Sunday during which .60 of an inch of moisture fell which will give new life to the growing wheat and other crops.

Russell, June 10.—The sun is shining brightly today and there is little save the lakes of water standing in the streets to indicate that this section of the state was visited by nice showers during Sunday and last night during which .76 of an inch of rain fell.

Toronto, June 10.—The mercury reached 80 in this part of the state Sunday, notwithstanding the showers during which .82 of an inch of rain fell. The sun is shining today and the indications are that the storm is over.

El Dorado, June 10.—Good rains have fallen in this section of the state during the past week. Three-quarters of an inch fell Sunday and the night following and growing crops are in good condition.

Junction City, June 10.—This section of the state was visited by heavy showers last night and Sunday accompanied by a high wind though no damage is reported from the latter. The precipitation amounted to one inch.

Emporia, June 10.—Rain fell here nearly all day Sunday and a portion of last night and it will be of immense value to the wheat which is just commencing to head.

Hutchinson, June 10.—A rain accompanied by a high wind and a small amount of hail fell in this county last night. The damage by the wind and hail if any, will amount to but little compared with the benefit to growing crops. The total precipitation amounted to about an inch.

Larned, June 10.—The dry spell which has existed in this section of the state for the past six weeks was broken Sunday and the night following by a good general rain during which the precipitation amounted to nearly an inch. Coming just at this time the moisture will be of great value and fair crops will result where had the rain come a week later there would have been no crop to harvest.

Lyons, June 10.—Rain fell during most of Sunday afternoon and a portion of the night. The precipitation will amount to nearly an inch.

Kingman, June 10.—This section of the state was visited by a heavy wind and rain storm last night and for a time it was thought that the cyclone belt had changed so that this section was included. Some damage was done to trees and outbuildings by the wind

which was accompanied by a heavy rain which will be of great value to growing crops.

OWEN AND HOFFMAN WIN

Result of Democratic Senatorial Primaries in Oklahoma.

Guthrie, Okla., June 10.—The results of the Democratic primaries as regards the governorship probably will not be definitely known until late today. Roy W. Hoffman, T. and Lee N. Haskell of Muskogee, T., and Lee C. Owen of Ardmore, T. each claim to be for 10,000. For United States senators of the new state of Oklahoma, Robert L. Owen of Muskogee, T., and Roy W. Hoffman of Chandler, Okla., appear to have won the nominations by safe pluralities.

Robert L. Owen is one-eighth Cherokee. He was born at Lynchburg, Va., and was educated at Washington and Lee university. He has been a teacher in the Cherokee Orphan asylum, for a time edited the Chief, a newspaper at Vinita; was Indian agent to the five civilized tribes from 1882 to 1884; organized the first National bank in Indian Territory and as counsel has for the last 17 years represented the Indians in various suits against the United States, some of them notable. He has been a delegate to Democratic national conventions and a member of the Democratic national congressional committee.

Colonel Roy W. Hoffman came to the territory from Kansas 18 years ago. He was first employed in the land office at Guthrie. Later he practiced law and became known as an orator. He organized the Guthrie States' District Attorney Caleb R. Brooks. He was lieutenant of the Oklahoma volunteer infantry regiment in the Spanish war and was made commander of the Oklahoma militia with rank of colonel.

28 DROWNED

French Schooner La Jalouse Goes Down Off Barbados.

Barbados, June 10.—Twenty-eight passengers, including 12 women and children, were drowned by the sinking of the French schooner La Jalouse off Cayenne for St. Lucia. The schooner sank off Barbados last Friday night. Eleven of the 21 men reached Barbados yesterday.

Tired of Life, Drank Acid.

Mack W. Guy, a Young Farmer at Berryton Commits Suicide.

Mack W. Guy, a young man living three miles east of Berryton, county, committed suicide Saturday night by swallowing carbolic acid. He went onto the farm several months ago for the benefit of his health, but could not get relief, and has been dependent for some time. Saturday night he informed the members of the household that he had taken carbolic acid and within a few minutes Dr. H. H. Keith, county coroner, stated today that he had made inquiries which satisfied him that it was Guy who had committed the crime. No fault on the part of others and that no inquest would be held.

Guy came from Kansas City to the farm near Berryton.

AN ESTIMATE OF GENE WARE.

Geo. W. Finley Gives an Interview to Washington Paper.

From the Washington Post: George W. Finley, of Topeka, who has been a power in Kansas politics for years, is at present in Washington. He has been on terms of intimacy with every public man of prominence in the state since his war in, in which he served. His home is a few doors east of Eugene W. War, former Commissioner of Pensions.

"Gene Ware is regarded as one of the big men of our State," said Mr. Finley, last evening. "He is highly regarded as a lawyer and a man who takes an active interest in public affairs. He came near getting the nomination for congress in his district at one time. But he is not known so much for his abilities as a lawyer and publicist as he is for his wit and capacity for writing good verse that goes right to the heart. I have known him since the time we lived in Fort Scott together thirty-seven years ago, so I ought to know something about him. A kinder, simpler man I never knew. He always has a pleasant word for everybody. He studies life and likes to write his impressions of it. For instance, he heard a washwoman singing at her task. Straightway he went to his office and wrote some verse that became famous."

TOMORROW IS TIN CAN DAY.

Put Your Rubbish Out in Alleys for Street Force to Get.

Tuesday is tin can and rubbish day in Topeka.

The street commissioner announces that tomorrow the laborers of the street department and all of the teams will be put at work cleaning out the alleys of all the debris and tin cans that have been piled up as the result of the spring's housecleaning. North Topeka is in good condition and will not require as much attention as the south side. The street department set aside one day early this summer for North Topeka and managed to get rid of most of the debris.

WON'T TALK ABOUT LIGHTING.

City Council Will Discuss Other Things at Meeting Tonight.

Watts, voltage, and arc lamps are not going to be discussed at the session of the council meeting this evening. The members of the council solemnly promise that they are going to keep their hands off of the city electric light plant for this evening. It is stated that an application is pending for the promotion of one of the firemen long in service to the proper rank of lieutenant but Mayor Green refuses to take any personal action on the matter this morning, agreeing to have the application referred to the proper council committee. The position of Lieutenant carries with it an increase in pay. The lieutenant takes charge of a company when the captain is off duty or happens to be absent. Otherwise his duties are merely nominal and are on a par with that of a regular fireman.

Mayor Green Thinks Fire Department Has Enough Officials.

With two lieutenants on the fire department Mayor William Green does not favor increasing the number by any other promotions. It is stated that an application is pending for the promotion of one of the firemen long in service to the proper rank of lieutenant but Mayor Green refuses to take any personal action on the matter this morning, agreeing to have the application referred to the proper council committee. The position of Lieutenant carries with it an increase in pay. The lieutenant takes charge of a company when the captain is off duty or happens to be absent. Otherwise his duties are merely nominal and are on a par with that of a regular fireman.
