RAILROAD NEWS.

Santa Fe Through Traffic Surprisingly Heavy.

Since the Opening of the San Francisco Line.

100 TO 200 CARS A DAY.

San Francisco Shippers Are Favoring the Kansas Road.

Good Fortune Due to Feeling Against Southern Pacific.

Since the opening of the San Joaquin Valley line, the freight business over the Santa Fe into San Francisco has been surprisingly heavy.

The feeling existing in California against the Southern Pacific company, which up to the present time has monopolized the railroad business in and out of San Francisco, is largely responsible for the heavy shipments over the Santa Fe.

President Ripley of the Santa Fe is reported to have entered into an agreement with the Oceanic Steamship company by which the closest traffic relations will be maintained between the two corporations.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers. They filter out the waste or impurities in the blood.

Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It is used to be considered that kidney troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

For young sick you can make no mistake by first doctoring your kidneys. The mild and extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits.

STOP USE OF FIRE ARMS.

Reckless Firing in the City Must Cease.

Councilman Mergan introduced a resolution at the meeting last night requiring the city attorney to draw up an ordinance prohibiting the use of firearms within the city limits at any time.

The resolution was the direct result of the excessive firing of blank cartridges and cartridges that were not blank on the Fourth. It was passed without a dissenting vote.

Another resolution requiring that an ordinance be drawn prohibiting the hitching of horses, mules or other animals on Kansas avenue between Gordon street and Tenth avenue was introduced, but was defeated.

CAN'T BE DONE.

Doubt About Ability of Water Co. to Transfer.

Attorneys Garver and Austin Say City Should Condemn.

NO DOUBT OF POWER.

Court Would Then Appoint the Appraisers.

Dangers of Present Plan for Fixing the Value.

Judge T. F. Garver, chairman of the legal committee of the Commercial club, and Mr. Edwin A. Austin, the Topeka attorney, who has particularly interested himself in the water works question, believe that the present water works plant should be acquired by the city by condemnation proceedings.

Judge Garver is of the opinion that it would be satisfactory to proceed under the present agreement provided the appraisers were appointed beforehand and were satisfactory to the city officials.

Otherwise he is in favor of commencing condemnation proceedings. Mr. Austin thinks such an agreement as proposed can lead to the most simply a friendly condemnation, on the theory that the water works company can't deliver the goods.

Judge Garver and Mr. Austin say there is no doubt that the property can be condemned and purchased under such proceedings.

"I think the proposed agreement is all right, provided the city knows who is to act as appraisers," said Judge Garver. "I would be opposed to the city going into the matter blindly, which it would if it was left to the water company to appoint an appraiser and the two appointed."

"A controversy would probably result between the appointed appraiser and the appointee of the water company and the third appraiser, who I understand is to be a hydraulic engineer, would likely side with the water company."

"The real question in my mind is whether the water plant can be taken in under condemnation proceedings. Both the statute and the 1887 charter require that appraisers would then be appointed by the city, and their report would be subject to the approval of the court."
