not irritate; in the prevention of infection it must be so pure as to produce aseptic cleanliness.

The American Eagle seldom screams, but when it does it makes a hellofa noise.

Candidates are as thick as fiddlers in hell. Not a day passes without from ten to twelve of them in town.

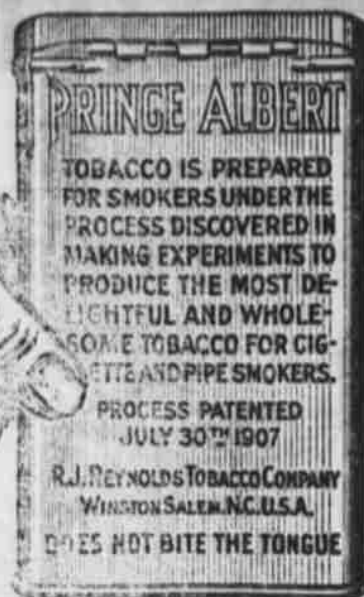

Some statesmen can talk for a few minutes and their words make history. Others can spout for a week at a time and no one remembers a word they say.

It is again rumored that England, Germany and France are considering the appointment of a joint commission for the consideration of peace in Europe. If there is any one thing under the sun that the rest of the world ardently desires, it is that this rumor may be founded upon fact and not conceived in the fertile brain of some lying foreign correspondent. The world is satiated with the unspeakable horrors of this war. It wants peace, and it wants it to continue until the crack of doom.

Do you want to develop your muscles, and stimulate your appetite, and aid your digestion, and put more color in your face, and make yourself feel better all over generally and inside in particular? Thirty minute exercise a day will do it. Go out into the garden. Use a hoe, or a spade, or any of the tools necessary to produce something to satisfy the appetite you will be creating. Use those tools and your brain at the same time, and in the end you will be better physically and brighter mentally and your table will be well supplied with edibles that cost you nothing but the exercise every normal constitution demands.

The spoiling of eggs during the hot months before they come to market is due very largely to the incubation of fertile eggs. Infertile eggs would be of very much better quality. Three merchants in Kansas made a study of this on thirty cases of eggs candled in August. There was a loss of 36c on every dollar's worth of eggs handled in this test. The total of losses due to the incubation of fertile eggs is, therefore, very great. Infertile eggs can be secured and should be produced during the summer by the removal of all roosters from the flocks. The week of May 22—27 has been designated as "Rooster Week" for Kansas by Mr. Ross M. Sherwood, poultry specialist in this Division, and all farmers are urged to dispose of their roosters then or earlier. Many merchants in this state, particularly in counties where farm bureaus and county agents are at work, have promised to pay a premium for roosters during that week so as to make an inducement to farmers to dispose of them.

The News is only a dollar per year—it's worth it, too.

P. A. comes to you with a real reason for all the goodness and satisfaction it offers. It is made by a patented process that removes bite and parch! You can smoke it long and hard without a come-back! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!
