A Shift of The Burden.

We hear talk of panic attending the changing of tariff rates, but you can bet your boots there will be no panic. A panic would result from suspensions not taking advantage of weakness at Washington, but we are glad to say that there is no weakness there, but on the contrary there is a firmness bred by a confidence of right. And in that firmness and strength the country has confidence and where confidence exists there can be no panic.

A few men are going to howl—those that are hit hardest. We can determine just how hard they are hit by the magnitude of their protest. When their anger to scream that the country is ruined, that business is paralyzed, that the paralysis will be confined to their own little minds.

The country is at least prepared to throw off the incubus of an inflated tariff. First, because sufficient confidence exists in those who will do the work that they will do it wisely and well; and secondly because the loss of revenue will be made up by an income tax. The virtue of the income tax in this light has largely been lost sight of. Its deep significance is, that the poor people can be relieved of the burden of excessive taxation, and the difference be made up from taxation of the fortunes of the rich.

Indeed, as pessimistic as some of us have been with relation to the welfare of the poor man, it looks as though he coming slowly into his opportunity.

GOV. BLEASK, of South Carolina, was in Washington on the day of the inauguration but refused to take part in the parade because negro militiamen from Maryland were in line. By this Bleask sought to attract attention and he succeeded. Strange he had not wanted to lead the suffragette parade, or occupy a seat on the cupola of the Capitol building or do some other "dampfool" thing. How long, oh how long, has the Palmetto State got to be humiliated by having such a complete ass for its governor, as Bleask proves himself on each and every occasion to be?

When you are thinking of entering a protest against the many kinds of wrongs that are being done in this world, don't let the belief that the worm will not wait much longer to turn. It can't.

WE DON'T like the new Indian-buffalo nickel a little bit. First place, like the other denominations of wampum, they are mighty hard to get your fingers on. And secondly, the thought of Indians and buffaloes always makes cold chills run down our spinal column.

It is a good thing to be prepared for a rainy day. Why not buy a good Umbrella and keep dry? Come to the store where you don't get "soaked" in price and where you will find nice clean dry goods.

You will have comfort and look good if you let us supply the things you need.

How Date Of Taking Office By President Was Fixed.

The date of taking office by a new President was fixed by the United States in Congress assembled—the Continental Congress, Saturday, September 12, 1788 when this resolution was adopted:

Resolved, That the first Wednesday in January next be the day for appointing electors in the several States, which before the said day, shall have ratified the said Constitution; that the first Wednesday in February next be the day for the electors to assemble in their respective States; and so for a President; and that the first Wednesday in March next be the time, and the present seat of Congress (New York) the place, for commencing the proceedings under the said Constitution."

The first Wednesday of March 1789 fell on the fourth day of that month and thus the term of Washington and his successors elected to the office of President begins on that day. The date fell on a Sunday in 1821, 1849, 1877, and will fall on a Sunday in 1917, 1945, 1973, 2029, 2057, 2085, 2125 and 2153.

Washington was inaugurated for the first time Thursday, April 30, 1789, and for his second term Monday, March 4, 1793.
