This horse is a rich bay, 16 hands high, with fine mane and tail, both carried right. Look at the breeding—a half brother to the great Emerald Chief, the greatest saddle and show horse Kentucky ever produced. My horse was bred by the same man that bred Emerald Chief. He has only about 12 colts in Kentucky and if any man will show me a sorry one will give him a season to any horse in the neighborhood. Will stand at the unreasonably low price of $10. Why not breed to a registered one?

FARMERS' LOSS IN SOUTH IS GREAT

Lack of Co-operation Declared to Be the Cause.

EXPERT GIVES FIGURES.

Professor Coulter of Census Bureau Has Compiled Some Startling Statistics on Annual Loss Sustained by Southern Farmers—Co-operation at Versailles For Past Year a Success.

Professor John Lee Coulter, expert special agent in the census bureau at Washington, has compiled some startling statistics in regard to the annual loss sustained by the southern farmers because of lack of co-operation.

The crops of the southern farmers are worth each year in round numbers $2,500,000,000. Most of this sum is spent for farm supplies, food, clothing,

THE NEW MILL.

etc., and $1,000,000,000 of this amount finds its way into the pockets of the ever present middlemen.

It is estimated that the southern farmers secure credit by paying $163,000,000 in excessive interest each twelve months.

All of this tremendous waste of money is made possible through lack of co-operation on the part of the gardeners and farmers, while at the same time it makes the city man pay a much higher price for the produce than he should.

Among the men in big business enterprises co-operation has been recognized as the golden key to success in the twentieth century. Co-operation and close organization, however, are products of education, and education is the weak point in most of our rural communities. Co-operation among farmers and growers has failed largely because the mass of our rural population has been poorly educated and at the same time scattered over a wide territory. In the future our success in organization and co-operation among farmers, gardeners and fruit growers will lie in better schools, in better teachers, wide awake ministers and a closer community life.

Versailles is finishing a successful year in co-operative work with its Farmers' Union Supply company. Last summer 119 farmers and stockmen took stock in the company and its success was almost immediate. As the stockholders in this company are largely growers of Burley tobacco and raisers of blooded stock it will be seen that the union can do very little as a selling agent. The main work of the past year has been as a buying agent; and in this particular line it has been a great success.

The first year's buying business will amount to about $45,000. Large amounts of wire fencing, field seeds, farm machinery, paint and coal have been bought both from jobbers and wholesale men. The first year's business has been good enough for the members of the union to receive 6 per

OFFICE UNION SUPPLY COMPANY.

cent on their stock and also obtain a rebate of 5 per cent upon all purchases made through the union.

A new mill has just been completed and will soon be in operation. This will take care of the grain grown by the members of the union and enable them to buy their mill feed at quite reasonable figures.

Education in co-operation will mean better roads, better schools, better trustees, better tax laws, better men and women everywhere in the highways and byways of our rural Kentucky.

The people of the big cities are watching the rural school problem with great interest. Louisville was among the first to strive to help in its solution.
