**EUPEPSY.**  
 This is what you ought to have, in fact, you must have it to enjoy life. Thousands are searching for it daily, and mourning because they find it not. Thousands upon thousands of dollars are spent annually by our people in the hope that they may attain this boon. And yet it may be had by all. We guarantee that Electric Bitters, if used according to directions and the use persisted in, will bring you good digestion and onst. the demon dyspepsia and install instead eupepsy. We recommend Electric Bitters for dyspepsia and all diseases of liver, stomach and kidneys. Sold at 50 cents and \$1 per bottle by W. S. Lloyd, druggist.  
 \* Mr. James Lamberk, of New Brunswick, Illinois, says: "I was badly afflicted with rheumatism in the hips and legs, when I bought a bottle of Chamberlain's Pain Balm. It cured me in three days. I am all right today and would insist on every one, who is afflicted with that terrible disease, to use Chamberlain's Pain Balm and get well at once." For sale by T. G. Julian. 30-4t

**Pronounced Hopeless.**  
 From a letter written by Mrs. Ada E. Hurd, of Grotton, S. D., we quote: "Was taken with a bad cold, which settled on my lungs, cough set in and finally settled in consumption. Four doctors gave me up saying, I could live but a short time. I gave myself up to my Saviour, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for consumption, coughs and colds. I gave it a trial, took in all eight bottles; it has cured me and thank God I am now a well and hearty woman." Trial bottles free at W. S. Lloyd's drug store, regular size, 50 cents and under one dollar. Give the name of Mr. Hurd, who would see that you get the genuine.

 The life of a whale is passed with but little of it being visible, and it is not an approachable animal. What is known of its life has been obtained at long range, and many errors have thereby crept in. All the romance about thrilling adventures in the capture of the whale have had their day. It is still regarded as a dangerous occupation, but nothing like what it was in the past. You will hear no more stories of hand harpooning, and the smoking line running out over the bow, the boat towed by a leviathan at lightning speed, and all those details that illuminate the old-time stories of the sea. Now whales are killed with a bomb lance, fired as any other projectile, at a moderately long range. It carries an explosive substance that detonates when the lance enters the body of the whale. That is the modern way. The whale is generally harpooned afterward in order to make it fast, and unless this is attempted before the whale is dead, it is not attended with any danger. The greatest fallacy about the leviathan of the sea is the belief that the whale is a fish. It is a mammal with none of the characteristics of a fish, except that it lives in water. An animal that nurses its young, and has rudimentary hind legs, could hardly correspond to a fish in any respect. It will see the animal spouting a tremendous volume of water from his blow-holes. This is purely an imaginary habit on the part of the whales. The blow-holes of the whale correspond to the nostrils of other animals. When it comes to the surface to breathe, it expels the air from the lungs with a violent effort. Its nostrils are apt to be slightly under water, and the result is a column of spray rises in the air. This has been mistaken in the distance by sailors for a column of water. When a whale has been harpooned so that its lungs had been penetrated, it is likely that the water-uted blood and water through the original error when the whale was first served it at close range.

**Pure Cider Vinegar.**  
 Many States have laws against adulteration of vinegar, and all should have. Chemically prepared acids are injurious to the teeth and to the digestive organs. Apple cider allowed to ferment and make itself into vinegar is the best material, but any vegetable compound is safe, and if well made, is a good substitute. Good vinegar is made from maple sap and the refuse from making maple sugar. It is often mixed with cider and makes the vinegar quicker and better than cider alone could do. Much of the vinegar sold in the West is made from the refuse of glucose factories. The glucose itself is not as healthful as pure sugar, and its refuse contains considerable quantities of sulphuric acid used in changing the starch of the sugar into sugar. Such product is therefore open to the objections against chemical compounds when directly used in making vinegar.—[American Cultivator.
