DEFINITE DATE FOR QUITTING PHILIPPINES

Washington, Jan. 17.—A definite date for the withdrawal of the United States from the Philippines should be set now, with the understanding that a neutralization treaty to protect the islands would be negotiated at the close of the European war, Chairman Stone, of the Foreign Relations Committee, declared today during debate on the Philippine bill. He said he favored an amendment in line with Senator Clarke's resolution providing that the United States withdraw in two years after having arranged a neutralization pact.

Earlier in the day Chairman Hitchcock, of the Philippine committee, had discussed the Clarke resolution with President Wilson. He said later the President did not favor it.

Senator Shaforth, of the committee, said he, too, favored neutralization.
Senator Newlands (Democrat) said he also favored withdrawal, but believed the Senate should be informed as to what responsibility the United States might find still resting upon it.

Not so good as a three or four mile walk every day, but very much better than to allow the bowels to remain in a constipated condition. They are easy and pleasant to take and most agreeable in effect. Obtainable everywhere.
