Ward's Orange-CRUSH
Ward's Lemon-CRUSH
Ward's Lime-CRUSH

27 Prizes in All!

1st Prize . . . \$15.00
 2nd Prize . . . 10.00
 3rd Prize . . . 5.00
 One . . . \$4.99 prize
 Four . . . 2.50 prizes
 Five . . . 2.00 prizes
 Ten . . . 1.50 prizes
 4 Cases of . . . "Crushes"

ARE you saving "Crush" Crowns? If not, start today. Try for a prize in the big Crown-Collecting Contest, now on. The Contest is our way of making the public better acquainted with the sparkling cooling "Crushes".

Men, women, boys, girls! Get busy now. Lots of fun, and lots of Prizes. Save crowns from Orange-Crush, Lemon-Crush and Lime-Crush bottles.

The delicious "Crushes" are the largest-selling fruit-flavored drinks in the world. Drink several bottles every day. At home and at social gatherings, serve the "Crushes" and save the Crowns. Soon you'll have a big collection and a good chance for a prize. The "Crushes" are on sale wherever soft drinks are sold. Enjoy a bottle today and start your Crown collection.

Sold only in the
Crinkly Bottle
 5¢

Rules and information—

Contest closes at Midnight, Saturday, July 22. Winners will be announced following week.
 Wrap and tie crowns securely, and write your name and address on outside and inside package.
 Only used crowns, bearing trade mark names, Ward's Orange-Crush, Ward's Lemon-Crush and Ward's Lime-Crush considered.
 Our count will be carefully made and must be accepted as correct.
 Everybody is eligible to this contest except our employees.
 In case of ties, full prize will be given each contestant.

Although only the finest and purest ingredients are used in the "Crushes," the price is very low. **5c**

Ingredients—The three "Crush" drinks get their flavors from the delicate fruit oils pressed from the fresh outer skins of oranges, lemons or limes, to which are added juices from these fruits, cane sugar, U. S. certified food color, carbonated water and citric acid, the natural acid of oranges, lemons and limes.

Prepared only by Orange-Crush Company—Chicago, Winnipeg, London

COWPEAS SUPPLY BIG NEEDS OF POOR SOILS

The cowpea is one of the best crops that can be grown to supply nitrogen and organic matter, the two things needed most by poor soil in Kentucky, soils and crops specialists of the College of Agriculture say. Unlike other legumes, such as alfalfa and clover, the peas make a fair growth on poor, sour soils without either limestone or other fertilizers, although a light application of limestone and some phosphate fertilizer helps them make a better growth. The peas are especially valuable as a soil improvement crop because they may be seeded by being broadcasted and therefore need no cultivation.

In using the peas for soil improvement many farmers seed them as a cater crop after wheat, oats and rye.

Seeded at this late date, the crop makes considerable vine growth which would hardly be sufficient to mature seed.

On other farms, the peas are seeded with success in the corn at the last cultivation, a bushel of seed an acre being sufficient in this case. Some farmers drill the peas in rows between the corn, this method requiring less seed and therefore being advisable when seed prices are high.

The nitrogen gathered by a ton of peas is worth about \$8 on the basis of the commercial cost of nitrogen, the specialists point out. Also the hay obtained from the peas is satisfactory feed for all classes of livestock. When the manure resulting from the feeding of the peas is returned to the soil, 20 to 30 pounds of additional nitrogen is added for each ton of peas grown.

How a Noted Vet. Gets Rid of Rats—Farmers Heed

Dr. H. H. Butler says, "I use RAT-SNAP around my hospitals every three months, whether I see rats or not. It does the work—RAT-SNAP gets them every time." I recommend it to everybody having rats." Don't wait until there is a brood of rats, act immediately you see the first one. Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Chenault & Orear.

Thought for Today—Some men seem to think women were created solely for their amusement.

SEEDSMEN MAY STUDY IN GOVERNMENT LABORATORIES

Persons interested in learning the approved methods of testing commercial seeds are offered the facilities of the United States Department of Agriculture in Washington without charge. Although the department does not pretend to conduct a seed school with outlined courses and classes, it has for a number of years permitted a few people to study in the government seed-testing laboratories, and in July and August an expert in seed testing devotes his time to helping them.

Those who have taken advantage of the opportunity in past years have been in most instances the sons of seedsmen or young men and women sent out by seed companies to learn the best methods that have been developed. The number taking up the work usually ranges from 5 to 15, and thus far the department has been able to take care of all applicants.

These students become familiar with crop seeds, seed adulterants, weed seeds and other foreign materials frequently found in commercial seeds. They are shown also how to make detailed analyses for purity and how to test seeds for germination. If a seedsmen has a special problem arising out of the peculiarities of his business, he is given every possible aid in solving it. The department welcomes the opportunity to give those who know the commercial side of the seed business additional knowledge of its technical aspects. It is an effective way to improve the quality of seeds sold to farmers and, consequently, to improve yields.

Persons who contemplate taking up this work this season should plan, if possible, to start about July 1.

WILL STUDY EUROPE'S TRADE CONDITIONS

Col. Michael Friedsam, head of B. Altman & Co., New York, was selected by President Harding to investigate the trade condition of Europe. Colonel Friedsam, when head of the Fair Price Commission, was once asked how the people might know when they were getting fair prices, and instantly replied, "Read advertising."

We heard the other day of a woman who says that when they were first married her husband came in like a lion, but now he goes out like a lamb.

The makers of wildcat whisky use no set formula. They just go ahead, beggery, and the coroner does the rest of the work.

See The Advocate for printing.

Special Children's Entertainments Popular Chautauqua Feature

Four unique children's entertainments will be given at the coming Redpath Chautauqua in addition to the regular programs for adults, each of the entertainments for the youngsters being given on a different day. Mary Mason with her Marionettes will give one entertainment and Duval Brothers, well-known magicians, another. The other entertainments will be "Characters from the Story Books" presented by Kathleen Scott and Catherine Denny, and a popular concert by the Cramer-Kurz Trio. The children's programs will be given either in the morning or in the afternoon.

Hail Insurance Rates Reduced on Tobacco

With the recent reductions of hail storm insurance rates on growing tobacco, in the face of the enormous losses to growers within the last four or five years, every grower can afford to protect himself to the limit and, with safety, go into the business of producing a crop that requires so much money, time and labor, as does tobacco, that should be insured against loss by hail storms.

Now that so many growers have gone into an organization for a more economical, business-like way of handling their crops, and the insurance companies have so lowered rates on hail insurance, there is no reason in the world for any grower to neglect the protection of his crop by ample insurance.

Better see your insurance agent right away and have him protect your crop, which is likely to be destroyed any day by a hail storm. Policies become effective noon, July 10th.

DRAINAGE OF FARM LANDS GETTING ADDED ATTENTION

With the decrease in the cost of tile, Kentucky farmers this year have shown more interest in the drainage of their fields than they have shown in any one of the past three or four years, according to Earl G. Welch, farm engineering specialist of the College of Agriculture. In line with this marked interest twelve demonstrations have been arranged by the college extension division on as many farms in eight different counties of the state to point out the value of drainage to interested persons, he said.

Warren, Madison, Rockcastle and Carroll counties each have two such demonstrations, while Muhlenberg, Hart, Webster and Jefferson counties each have one. Additional demonstrations probably will be arranged in co-operation with farmers in other counties in the near future.

"It is impossible to bring soil up to the highest state of fertility without good drainage," Mr. Welch said, in speaking of the projects. "When land is poorly drained or not drained at all, every quality necessary for a fertile soil is either wholly or partially destroyed. Poor drainage lowers the availability of all the plant food elements by preventing the proper circulation of air through the soil and prevents good structure characterized by the 'crumbiness' that is necessary for easy working of the soil and the development of plant root systems. It also prevents the proper decomposition of organic matter and the consequent formation of compounds of nitrogen and other elements which are available as plant food."

"Heaving, or freezing out of winter crops, also is favored by poor drainage. If poorly drained land has a slope it washes more than soil that has good under drainage for the obvious reason that more water must be carried away by surface drainage. Many sloping lands have poor under drainage. A striking characteristic of poorly drained soil is a tight, whitish or grayish subsoil, often containing brown or rust colored spots. The installation of tile drainage is the only remedy that can be applied to such soils."

You many think you are smart, but do you know that the average depth of the ocean is about a couple of miles?

SEASONABLE STUFF

The season for vacations is upon us again. The business, shot to pieces, has produced an extra strain. A feller's got to get away to rest a while, you know, so the most important question is, where's he's goin' to go? With Europe shot to pieces, an' her scenery gone to smash—besides, the rumpus didn't leave an overplus of cash. There ain't the old inducements for to breast the ocean's foam, an' it really ain't desirable to go so far from home. The question grows perplexin' as they often will, ye know—the hour keeps drawin' nigher, but—where are you goin' to go? Well, there's the Rocky mountains, fairy ladders to the skies—or, the northern lakes is callin' from a perfect paradise. You can rest in Eden's garden on our whole Atlantic coast—or journey to the sunny south, the land I love the most. Go where the old Pacific cools the Callifony belle—or drift around the Yallerstone, where heaven flirts with hell. Yosemite, the fairyland, or Florida, the queen—or up among the Catskills to a place you never seen. You can tackle Arizona where the canyon splits the earth—and none of 'em will cost ye more'n a tenth of what it's worth! Huh, talk about vacations—it drives me to despair, when I think about the idiots that's allers askin' "where?"—Uncle John.

RAT-SNAP KILLS RATS

Also mice. Absolutely prevents odors from carcass. One package proves this. RAT-SNAP comes in cakes—no mixing with other food. Guaranteed.
 35c size (1 cake) enough for Pantry, Kitchen or Cellar.
 65c size (2 cakes) for Chicken House, coops or small buildings.
 \$1.25 size (5 cakes) enough for all farm and outbuildings, storage buildings, or factory buildings.
 Sold and Guaranteed by CHENAULT & OREAR
