FOR CONGRESS.

In obedience to the requests of Democrats in every part of the Fifth Congressional District...

I am sincerely grateful for the cordial support given me by the Democrats of the Fifth Congressional District in the past, and I have tried to show my appreciation of their confidence and kindness by increasing efforts...

JAMES B. MCKINLEY, Richmond, Ky.

LATEST developments indicate that the limit of congressional patience has been reached, and that by to-morrow, and, perhaps today, war will be declared unless Spain recedes from her position...

Gov. WORTHINGTON vetoed the cigarette bill, saying it was unconstitutional. If there was any chance of the bill checking the use of the little coffin nails, it ought to have stood...

We had the pleasure last week of traveling in company with Mr. Green R. Keller, of the Carlisle Mercury, who was on his way to the launching of the ocean bull-dog, Kentucky...

McKinley is showing his teeth to the mad congress that wants to fight him. He has announced to members, who have demanded immediate action and making threats, that he is President of the United States and will follow the course he thinks wise...

We talked with many prominent and conservative men in Washington last week and all were of the opinion that the United States would have just a little harder time whipping Spain than most people expect.

UNCLE SAM had better not be too sure of licking Spain. Over-confidence is a bad article to have around. It will not be as easy to thrash Spain as it is to roll off a log.

WARNING AGAINST SMALL-POX.

Office of State Board of Health. BOWLING GREEN, KY., MARCH 25, 1909. To the officials, Physicians and People of Kentucky.

This Board again gives warning that smallpox is seriously threatened with an epidemic of smallpox in our community. Conditions already exist in Bell, Whitley and Madison counties, and cases are reported in Knox and Mason counties.

So far the disease has been almost exclusively confined to negroes, and in exemption of the white race cannot long be hoped for if it continues to spread.

In spite of repeated and continued warnings from this county and municipal boards, each community so far attacked was unprepared, a large per cent. of the population was unvaccinated, and dangerous and costly delays occurred before the character of the disease was recognized and hospital and other provisions could be made for the sick and exposed.

Under our laws this expense must be met by the counties and cities affected, and it can only be made small by proper preparation before a case appears. Had Middleboro and Bell county been thus forewarned and ready to care for the first cases, thousands of dollars would have been saved in actual outlay, very many thousands in loss of business, and the officials and community the mortification of clamoring for outside aid to do what they were amply able to do for themselves.

In view of these facts, the Board advises that each town and city at once pass and enforce a compulsory vaccination ordinance, beginning with the colored race, but reaching everybody that is capable of vaccination, and suitable ground for their location, and secured; that visiting and strange negroes be hunted out, vaccinated and kept under observation, and especially that physicians practicing amongst negroes be instructed as to the difficulty of recognizing mild cases of smallpox and varioloid in this race, and of the importance of calling in experienced counsel in every doubtful or suspicious case.

Those having this work in hand should deal firmly, but kindly, with every one, advising that this work is being done for their protection as well as that of the community. Quarantines against infected places, the first resort of unprepared towns, do much actual harm by giving rise to a false sense of security, thus retarding the work of vaccination and preparation, and, if rigidly enforced, are much more expensive than the precautions herein advised, besides causing much financial loss by interference with travel and commerce. No quarantine should be established without the consent of this Board, and this will not be given unless the circumstances are very exceptional. Communities maintaining unauthorized quarantines are liable to persons suffering injuries or damages therefrom.

At this time every person in Kentucky should be vaccinated or revaccinated. If properly protected it will not take, and if it does take it will be done in three places about an inch apart, by a competent physician, with clean hands and instruments upon a well cleaned arm, by scraping off the scarf skin without drawing blood, and should be allowed to dry thoroughly before the sleeve is put down, and should be protected for a few days with clean cloth or absorbent cotton. This will give the best chance for a successful result, with much less soreness and suffering.

Fresh, reliable virus may always be had from the National Vaccine Establishment, Washington City, or from its agents, The Henry Drug Co., of Louisville. Vaccination from the arm of a child known to be healthy is equally reliable.

This Board holds itself in readiness to aid local boards to the fullest extent of its powers, but little aid will be needed from it if each community will intelligently prepare to take care of itself. By order of the Board. J. M. MATHEWS, M. D., President.

J. N. McCORMACK, Secretary. Planters' NUBIAN TEA cures Dyspepsia, Constipation and Indigestion. Regulates the Liver. Price, 25 cts.
