LAYNE & BOWLER CO.
 S. O. SCOGGINS, MANAGER
 WELSH, LA.

P. S.—If our Mr. Scoggins should be out of town when you call, lay your well proposition before Mr. John Armstrong of the Armstrong Machine and Well Works Co., Welsh, La.

Raise More Rice

But Don't Exhaust Your Soil

This is what you can do by using the right kind of fertilizer. Swift & Co. manufacture this class of goods. It is made out of blood, bone and other tankage goods.

Your old ground needs something besides Phosphoric Acid and Potash. It needs Nitrogen as well.

Do you know that if you have an acre of ground planted in cow-peas that they will pull \$5.00 worth of Nitrogen out of the atmosphere and take it into the soil?

But we can't all raise cow-peas on old wet rice land. Then do the next best thing. Buy fertilizer that contains Nitrogen along with the other elements and you can still raise good crops on your old land.

ASK FOR SWIFT'S 10-2-2

containing 10 per cent Phosphoric Acid, 2 per cent Nitrogen and 2 per cent Potash. Don't be satisfied if someone tells you his is just as good, but demand SWIFT'S.

We manufacture all kinds of fertilizer, but recommend 10-2-2 above all others for old land.

— See our Agents —

Welsh Warehouse & Supply Co.

— For Our Goods —

Also ask them for our free book on fertilizer, it will tell you just what each element in fertilizer is good for and what it will do.
