General Debility and Loss of Flesh

Scott's Emulsion has been the standard remedy for nearly a century. Many doctors have found that in cases of debility, where nothing else seems to be effective, they are able to give the patient almost immediate relief by giving a small dose of Scott's every day. A very few drops, and straightway the strength and appetite are increased. Scott's is also a good tonic for invalids and convalescents.

Scott's is the only emulsion that has been approved by the United States Department of Agriculture.
