County Agents Push Livestock and Crops

Production problems in connection with farm crops and livestock improvement work are head-liners in the program outlined by Michigan county agricultural agents for their field campaigns of the coming year.

A state-wide survey just completed by C. V. Ballard, assistant state county agent leader of the Michigan Agricultural College extension division, shows that an average of 27 per cent of the time of the various agents will be devoted to livestock improvement this year.

Only a few years ago, marketing and organization work headed the list of county agents activities, the need being great in the state for that field of work.

Michigan now has 64 county agents, covering 67 counties, according to R. J. Baldwin, director of extension work at M. A. C.

During the storm Friday evening the residence of Elmwood park addition were started by a severe crash of thunder and soon a number of people were observed running toward the Ramsay residence on Elmwood ave.

It then ran thru the floor to the ceiling below tearing away part of the ceiling from the bedroom and cracking the plaster thru the hall and living room.

It blew out the plugs on the back stairway. All of the push button wall plates of the electric light system were bent and the lights thru the house were blown out.
