PAW PAW, - - MICH.  
I adopt this mode of advertising my business instead of employing agents. My object is, to reduce the expense of the business as much as possible, so by purchasing of me you pay no agent fees. You can also save the expense of delivering the work if you choose; besides you can select the Marble yourself, and see the style of it, as it will be, so there is no possible chance for being deceived or being disappointed.  
By taking this course, there is a saving of from twenty to thirty per cent—according to how far the purchaser comes.  
You can read what the money I save by not keeping agents goes to the purchaser instead of the agent.  
Agents claim that they can furnish work cheaper. That cannot be done, unless done by Apprentices. I furnish no work of that class as I employ no Apprentices.  
My work and material cannot be questioned. Patronize home, if you can, and save money by so doing. 818

Two years ago that great party laid down the banners it had carried for almost half a century, and made an unconditional surrender of all the principles for which it had contended, by placing at the head of its column one of the fathers of the republican party. Thereby it is said to us, "in all the years past you have been right and we have been wrong."  
And now, standing here to-day, at the end of two decades, and looking over the past, we ask by what warrant does the Democratic party require the Republican party to hand over to it the affairs of Government? By its surrender two years ago it declared its incompetency, and acknowledged that the Republican party was the party of ideas and progress.  
Gentlemen of the Convention, I congratulate you upon this happy anniversary, and I predict that twenty years more of power and control awaits us, if we conduct ourselves with that magnificent discretion and wisdom which has led and guided us in the past.  
Mr. Childs, on taking the chair as President of the Convention, spoke as follows:  
Fellow Citizens,—I never had until this moment an intimation of the action of your committee in inviting me to preside over your deliberations. I have not words to express my surprise, or my sense of honor and gratitude for this mark of your esteem and confidence in choosing me to preside over this, the largest in numbers of any Republican Convention ever convened in the State of Michigan. I will not take up much of your precious time by making extended remarks; but allow me to say that I believe with you that the glorious and important mission of the Republican party is not yet ended. I believe the same Providence which called it into being has yet further use for it; and I may say, perhaps, that there are greater responsibilities to meet than any it has previously borne. Under the administration of that party, questions vital to the very existence of our Government have been settled forever. The dark cloud of disunion, which hovered over the horizon, has been banished from our political skies, never again to return. The existence of the Union is settled and indissoluble. Every great question which came up has been successfully settled by this party. In that glorious past record, to which we point with pride, is read the demand for a future continuance in power of the Republican party. And there are questions now agitating the public mind, of vital importance to us, upon which perhaps parties are not settled; and to no party can our country so safely commit these unsettled questions as to the Republican party. ### STATE CONVENTION.

The Convention was called to order at 11 A. M. by S. D. Bingham, Chairman of the State Central Committee, who nominated B. M. Catcheon of Manistee as Temporary Chairman, who on taking the chair spoke as follows:  
Republicans of Michigan!—We stand to-day at the threshold of the third decade of the Republican party of Michigan. For one-fifth of a century this party has held the reins of power in the Peninsular State. And, standing as we do to-day, and looking back over the record of the past, we need not apologize for the record, but can proudly invite the criticism of the world, and a comparison of the Republican party and its principles and acts with the principles and acts of the opposition.  
Springing into existence twenty years ago this summer, it threw itself like a living wall before the advance of American slavery, declaring that the virgin soil of the Territories should be forever free. Standing at first upon that issue, from that hour up to the present time the Republican party of the United States has been the party of liberty, the party of progress, the party of reform; it has been in one word the party of the Republic.  
In times past it has devoted itself with entire and loyal devotion to the development and advancement of all the great moral, material, industrial, and political interests of the republic. With an eye single to the upbuilding of the present, and laying the foundation of a grand and perpetual future, this Republican party has gone steadily forward, never taking one step backward. We have written upon our banner the motto of Hampden, the English revolutionist, "We take no step backward."  
In time of rebellion, this great Republican party, which has arisen with a patriotism, magnanimity, and determined devotion, absolutely without a peer in ancient or modern times, actually drove back and crushed the foes of the Republic and banished treason from the land.  
During the trying and perplexing hours of the Reconstruction period, that taxed to the utmost the resources of American statesmanship, it proved itself competent for the task, and led us through this stormy sea until we rode serenely and securely in the harbor of peace once more.  
And we stand here to challenge a comparison between the record of this party during all this time and the record of the parties which have been opposed to us. While we have been the party of progress, our opponents have been the party of reaction, the party of destruction tearing down nearly as fast as we could build up. But on every point we have borne our banners through the thickest of the fight, to victory and final success.  
We stand here to-day to give to the people an account of our stewardship, and we ask no indulgence. While we admit that in the trying hours of the reconstruction period, and in the more trying opening hours of the rebellion, we may have made mistakes, we offer no apologies, ask no pardon, but invite a candid and fair criticism and comparison.  
When we first planted ourselves on the platform of the non-extension of slavery, and the Democratic party withstood us face to face and steel to steel, we met and vanquished them. Then came the times of rebellion, and we crushed out treason; but the Democratic party, through four long years of bloody war loudly cried, "No coercion." It opposed the Emancipation Proclamation, opposed all legislation on civil rights, and all liberal amendments to the Constitution.  
Two years ago that great party laid down the banners it had carried for almost half a century, and made an unconditional surrender of all the principles for which it had contended, by placing at the head of its column one of the fathers of the republican party. Thereby it is said to us, "in all the years past you have been right and we have been wrong."  
And now, standing here to-day, at the end of two decades, and looking over the past, we ask by what warrant does the Democratic party require the Republican party to hand over to it the affairs of Government? By its surrender two years ago it declared its incompetency, and acknowledged that the Republican party was the party of ideas and progress.  
Gentlemen of the Convention, I congratulate you upon this happy anniversary, and I predict that twenty years more of power and control awaits us, if we conduct ourselves with that magnificent discretion and wisdom which has led and guided us in the past.

### GOV. BAGLEY'S SPEECH.

Mr. Chairman and Fellow Republicans:  
I served my time at the business in which I now am engaged with an old Puritan, a man of the old school, rigid in discipline. I gave him (as most boys I presume give their employers) a great deal of trouble, and it seemed a pleasure to him to tell me that I gave him trouble. He used to scold, and no doubt I deserved it; but I remember well, after I had had a week of pretty severe scolding, that I said to him one day, "Colonel, do I ever do anything right?"—"Why, of course you do," he replied; "if you did not, I should not keep you." I said to him, "Why don't you say so then?"—"Well," he replied, "it is your duty to do right, and you deserve no praise for it."  
And you, my fellow Republicans of this grand old State of Michigan, although as critical of my faults and errors, yet how much more generous you have been to me to-day! And need I say how kindly, how deeply, how heartily I appreciate your kind words and treatment!  
I have just returned from a trip across and around this State of Michigan. Leaving Detroit, with its hundred manufacturing chimneys piercing the sky; passing through the great, rich agricultural district of Central and Southern Michigan; crossing the fruit belt of the State, and seeing upon the great lakes a hundred vessels owned by our own people; crossing the great pine belt and entering the great belt of hardwood timber, and then into the Lake Superior region, with its mines of iron, copper, quarries of slate and sandstone, thence proceeding homeward, passing the salt basins of Lake Huron and the Saginaws, the thought came to me every day, on that trip, with every revolution of the wheels of the locomotive and the steambot, of the great and varied interests of Michigan, and what a noble empire had been entrusted to us. The thought came to me, how closely allied are all these interests one to another, and how the prosperity of one is the prosperity of all, and that a disaster to one interest is a disaster to all.  
And I could not but think, during that trip, of these mighty and valuable interests, which had been entrusted to you, my fellow citizens, and through you to me, to help foster, protect, encourage, and develop. These things make me appreciate most heartily the honor and dignity of the position which you have once conferred upon me, and which I suppose, God willing, you propose to do again.  
I have but very little to say of the past, nor have I many promises to make for the future; but as I look upon the whole past history of this State and its government, and the development and growth of our educational and charitable institutions, I cannot but feel what a grand, good, blessed, glorious old State Michigan is, and how well—throwing out the past two years—it has been governed, with not a stain upon the conscience of the State.  
We have reduced its indebtedness; we have reduced its taxation; we have given a hearty support to almost every charitable institution of which the human imagination could conceive; we have cared for the deaf, the dumb, and the blind, the insane, the unfortunate, the criminal, the pauper, and last of all, we have reached out the great hand of the State to the little children, whom we thought, from their circumstances and surroundings, were going in the road that leads all the way down hill. We have done all this with decreasing taxation and decreasing debt. Within the last two years we have paid \$724,000 of the debt of the State of Michigan.  
There are some latter-day prophets who tell us we have got too much money in the Treasury. It is the first time I have heard the charge made as a fault in any State or its officers; but it is well to remember, whether this charge comes from friend or foe, or from those who know nothing about it, that all the money in the Treasury of Michigan comes there through the action of the organic law,—the Constitution,—which ties up (thank God, forever!) the specific taxes of the State for certain purposes. I remember very well Wm. A. Howard saying, in his address at the laying of the corner-stone of the new Capitol, that it was to the credit of the State of Michigan that the impious hand of no Governor nor any party had ever reached for the trust funds of this State. I want to say to you that I shall not be the first Governor to put my hands upon the trust funds of the State of Michigan. If you do not want this money in the Treasury, you must change the Constitution; but just so long as your Constitution stands as it does today, these funds will remain untouched by every honest man.  
I thank you for your cordial friendship displayed to me to-day, by the hearty unanimity with which you have given me the second nomination for the office of chief Executive of this State.

### GOV. BAGLEY'S SPEECH.

Mr. Chairman and Fellow Republicans:  
I served my time at the business in which I now am engaged with an old Puritan, a man of the old school, rigid in discipline. I gave him (as most boys I presume give their employers) a great deal of trouble, and it seemed a pleasure to him to tell me that I gave him trouble. He used to scold, and no doubt I deserved it; but I remember well, after I had had a week of pretty severe scolding, that I said to him one day, "Colonel, do I ever do anything right?"—"Why, of course you do," he replied; "if you did not, I should not keep you." I said to him, "Why don't you say so then?"—"Well," he replied, "it is your duty to do right, and you deserve no praise for it."  
And you, my fellow Republicans of this grand old State of Michigan, although as critical of my faults and errors, yet how much more generous you have been to me to-day! And need I say how kindly, how deeply, how heartily I appreciate your kind words and treatment!  
I have just returned from a trip across and around this State of Michigan. Leaving Detroit, with its hundred manufacturing chimneys piercing the sky; passing through the great, rich agricultural district of Central and Southern Michigan; crossing the fruit belt of the State, and seeing upon the great lakes a hundred vessels owned by our own people; crossing the great pine belt and entering the great belt of hardwood timber, and then into the Lake Superior region, with its mines of iron, copper, quarries of slate and sandstone, thence proceeding homeward, passing the salt basins of Lake Huron and the Saginaws, the thought came to me every day, on that trip, with every revolution of the wheels of the locomotive and the steambot, of the great and varied interests of Michigan, and what a noble empire had been entrusted to us. The thought came to me, how closely allied are all these interests one to another, and how the prosperity of one is the prosperity of all, and that a disaster to one interest is a disaster to all.  
And I could not but think, during that trip, of these mighty and valuable interests, which had been entrusted to you, my fellow citizens, and through you to me, to help foster, protect, encourage, and develop. These things make me appreciate most heartily the honor and dignity of the position which you have once conferred upon me, and which I suppose, God willing, you propose to do again.  
I have but very little to say of the past, nor have I many promises to make for the future; but as I look upon the whole past history of this State and its government, and the development and growth of our educational and charitable institutions, I cannot but feel what a grand, good, blessed, glorious old State Michigan is, and how well—throwing out the past two years—it has been governed, with not a stain upon the conscience of the State.  
We have reduced its indebtedness; we have reduced its taxation; we have given a hearty support to almost every charitable institution of which the human imagination could conceive; we have cared for the deaf, the dumb, and the blind, the insane, the unfortunate, the criminal, the pauper, and last of all, we have reached out the great hand of the State to the little children, whom we thought, from their circumstances and surroundings, were going in the road that leads all the way down hill. We have done all this with decreasing taxation and decreasing debt. Within the last two years we have paid \$724,000 of the debt of the State of Michigan.  
There are some latter-day prophets who tell us we have got too much money in the Treasury. It is the first time I have heard the charge made as a fault in any State or its officers; but it is well to remember, whether this charge comes from friend or foe, or from those who know nothing about it, that all the money in the Treasury of Michigan comes there through the action of the organic law,—the Constitution,—which ties up (thank God, forever!) the specific taxes of the State for certain purposes. I remember very well Wm. A. Howard saying, in his address at the laying of the corner-stone of the new Capitol, that it was to the credit of the State of Michigan that the impious hand of no Governor nor any party had ever reached for the trust funds of this State. I want to say to you that I shall not be the first Governor to put my hands upon the trust funds of the State of Michigan. If you do not want this money in the Treasury, you must change the Constitution; but just so long as your Constitution stands as it does today, these funds will remain untouched by every honest man.  
I thank you for your cordial friendship displayed to me to-day, by the hearty unanimity with which you have given me the second nomination for the office of chief Executive of this State.
