GOLD STILL TRAVELS.
OVER A MILLION DOLLARS ARE SHIPPED TO JAPAN.

Again Does the Government Have to Come to the Front With A Few Million?

New York, Feb. 22—It was quite as clearly demonstrated today that the Foreign drains have extended to Japan as it was by the stock market yesterday, where the largest collections were made. The Treasury Department has been compelled to make another large collection of gold, the amount thus far collected amounting to $5,000,000.

THE MADNESS OF GENIUS.

There is no instance to be found in the history of genius to which it can be applied with more appropriateness than that which is at present passing in the court of the late Emperor of China. It is the singular misfortune of the world that there should be a man so gifted with the principles of a prince who has been so justly and impartially considered by all mankind as the most generous and benevolent monarch of the age. His death has been considered as the loss of a great and beneficent monarch, and his memory will ever be held in the highest estimation by all nations.
