IF SO, READ AND SAVE WORK.  
SINCE Swords have been beaten into Ploughshares, and Spears into Pruning-hooks, McCormick's late Patent Reaper saves immense labor, as well as money. Attention is called to the late 1854 Patent Reaping and Mowing Machine, which surpassed any at the World's Fair.

Farmers wishing to save labor, time and money would do well to call and examine as I have them constantly on hand at my warehouse.

NO. 131, MAIN STREET,  
GALENA, ILLS.

WE have just opened the largest and most extensive stock of Foreign and Domestic Dry Goods ever offered in the west, which we are offering at Chicago and St. Louis prices, and less than have ever been sold in this market. Our facilities for purchasing are such that we are enabled to get our goods as low as they can be bought by the lowest eastern houses. We are buying our American Goods direct from the manufacturers, and being connected with a house in New York, and one of the firm constantly in the market, we shall at all times have a full stock and at the lowest market prices. We offer no goods, but our customers can depend at all times upon buying goods of us at a small advance from cost and transportation, and can find in our stock every variety and style of goods suited to the market. Merchants who have been in the habit of visiting the eastern cities, St. Louis, and Chicago, may depend upon finding as large a stock and at as low prices as can be found elsewhere.

We ask an EXAMINATION of our stock before going east.

NETT ACCUMULATED FUND, FEBRUARY 1, 1853  
\$2,018,775 64.

**Stability.—Security.—Perpetuity!**  
THIS Company has now established itself on such a firm basis, that it can offer to those desiring an investment on their lives, that greater of all desiderata in life insurance, viz: full and perfect security. Its history is almost, if not quite, without a parallel. Commencing 1st February, 1843 (10 years ago) without a dollar of capital except its receipts for premiums, it has now an actual cash capital which is "invested in Bonds and Mortgages on Real Estate, principally in the cities of New York and Brooklyn, worth double the amount loaned thereon, of over \$2,000,000. Its receipts for premiums during the past five years have been nearly \$2,200,000, and for interest on investment over \$350,000, and has paid on policies terminated by death during the same time, nearly \$800,000. Its dividends (after reserving a fund sufficient to re-insure all outstanding policies) were 52 percent the first five years, and 33 1/2 percent the last five, on the amount of premiums paid, being an average of over 42 1/2 percent per annum for ten years. These dividends are added to the policy at their reversionary value, payable at the option of the insured, or can be applied to the reduction of future premiums, at the option of the insured. The business of the Company is conducted strictly on the cash plan—no credits—and it is believed to hold out greater inducements than any other company, whatever.

Its rates of premium are as low as those of any good office, and are believed to be lower than some who profess to insure from 25 to 50 per cent less.

FREDERICK S. WINSTON, Pres't.  
Isaac Abbott, Sec'y.  
Charles Gill, Actuary.
