BELLS: BELLS: BELLS:

FOR Churches, Academics, Factories, Steamboats, Plantations, etc., made, and a large assortment kept consantly on hand by the Sabscribers, at their old established and enlarged Foundry, which has been in operation for thirty years, and whose patterns, and process of manufacture so perfected, that their bells have a world wide celebrity for volume of sound and quality of tone. The present Proprietors have recently succeeded in applying the process of foam moniding in Iron Cases to Bell Casting—which scures a perfect casting and even temper, and as an evidence of the unimpaired excellence of their Bells, they have just received, January 1854—the First Premium (a Silver Medal) of the World's Fair in New York, over all others, several from this Country and Europe being in competition; and which is the 18th medal, besides many Diplomas that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order chimes of any number of bells, or key, and can refer to several of their make throughout the States and Canadas. Their Hangings, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the bell, spring acting on the clapper, prolonging the sound.—Iron Frame, Tolling hammer, counterpoise, stop, etc. For Steamboats, Steamships, etc., their improved Revolving yoke, or Fancy hangings in brass or bronze of any design furnished. We can supply whole sets or parts of our improved hangings, to rehang bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors Instruments of all descriptions made and kept on hand.

Being in immediate connection with the principal routes in all directions, either Railroad, canal or river, orders can be executed with dispatch, which, either personally or by communication are respectfully solicited.
