"Rube" Delroy and Aunt Samantha, the Country bumpkins, with the Young Buffalo Wild West and Col Cummins' Far East

The Big Circus

Combining features of the Orient and Occident, the Young Buffalo Wild West and Col Cummins' Far East, which will exhibit in Marshall, Thursday afternoon and night, September 26, makes an especial appeal to the jaded amusement lover in quest of something new, meritorious and out of the ordinary. The thrilling adventures of the romantic, rugged people of the far west, in their daring games, sports, past times and reckless horsemanship, combined with the semi-barbaric denizens of the far east, furnishes an entertainment so unique and fascinating, it is said, that the most blasé amusement patron will find it well worth while. Representatives from many tribes of North American Indians, cow boys, cow girls, bronco busters, rough riders, vaqueros, lasso manipulators, marksmen and markswomen of international repute, together with Cingalese, Tartars, Arabs, Maoris, Australian bushmen, buck jumpers, boomerang throwers, bull whip manipulators; Boers, Turks, Hindus, Egyptians, East Indians, Japanese, Russian Cossecks and whirl wind dancers, vieing with each other for supremacy in their native sports, exploits, horsemanship and dare-devilry. The ample arena is transformed into a veritable riot of action; a kaleidoscopic panorama of color; a seething mass of humanity—the melting pot of the world's most interesting, strange, romantic and fascinating people.

BABCOCK TESTER IS PRAISED

Invention Has Revolutionized Dairying Industry—Bulletin issued by Wisconsin Station.

A fitting recognition of Dr. Stephen Moulton Babcock's services to the dairy world through the invention of the milk tester bearing his name is found in a circular lately issued by the Wisconsin experiment station. Its title is "The Coming of Age" of the Babcock Test, and it is written by Dean Russell. In bulletin 24, issued in 1890 by the same station, the Babcock test was given to the public. The invention has so completely revolutionized dairying, putting it on a sound business basis, that upon its twenty-first birthday official recognition of the inventor's work is given by the same institution that fostered the invention. The circular contains a complete account of the invention of the tester and should be read with interest wherever cows are known.

Babcock Testing Outfit.

Fills the Bill. "A sentence with the word exposure," the teacher demanded, and a sturdy boy put up his hand. "If you fellows don't quit your grafting I'll expose," he quoted grandiloquently from the noted reform lecturer he had heard.

Country Without Manufactures. Panama has practically no manufactures. The principal exports are bananas, coconuts, hides and skins, ivory, nuts, rubber and hardwood, of which the United States receives the greater portion. More than half of the imports are furnished by the United States and consist chiefly of foodstuffs, textiles and hardware.

Business? "It's Great!"

Talk about customers, well I should smile. For each day brings in a pile. And Uncle Jake, so you will see, Is just as busy as a bee; And say, it really does seem nice To see that lots took my advice, For I should long have told you all About our wonderful line for Fall. And if you tell me your request Your Uncle Jake will do the rest. So don't delay, but be like those Who took my tip on "Collegian Clothes."
