There has been considerable complaint recently because of the failure on the part of some automobiles to keep the lights on their machines burning after dark. This is dangerous, both to those in the automobiles and to those whom they may meet on the thoroughfares. There is a city ordinance and also a state law to regulate this matter and it is hoped the law will be stringently enforced. Five penalties were imposed Sunday night, but no action was taken against them.

Tuesday afternoon a derrick, which was being used to elevate a large column stone into place in front of the new post office building, broke, letting the huge stone fall to the ground. The stone weighed about 15,000 pounds. It was fortunate indeed that no one was injured.

BIG GAIN IN MEMBERSHIP

Federick C. S. B., of London was announced as president of The First Church of Christ, Scientist, The Mother Church, at the annual meeting of that church held in the church extension yesterday.

Several thousand member attended including many members from foreign countries. Bliss Knapp, C. S. B., the retiring president, presided at the first part of the services which included hymns, readings from the Bible and "Science and Health," and prayer.

Knapp then announced the new officers and introduced Mr. Dixon, who took the chair. The other officers are John V. Dittmore, C. S. B., of Brookline, clerk, and Adam H. Dickey, C. S. B., of Brookline, treasurer.

The treasurer's report showed the finances of the church to be in a flourishing condition. The clerk's report stated that the gain in membership in the past year has been greater than in any year previous, and that 102 new churches have been organized, including five in England and others in Germany, Switzerland, Australia, New Zealand and Porto Rico. In addition to these many unorganized gatherings of Christian Scientists were mentioned.

A call for reports from the field brought testimony from all parts of the world as to the growth and excellent condition of the Christian Science movement. Thanks were given from Ohio for the generous help The Mother Church and its branches had offered; New York City reported the establishment of new Christian Science reading rooms and mention was made of the missionary work done by Christian Scientists in prisons throughout the country.

Mr. Knapp, who is a member of the board of lecturership, told of his recent lecture tour, on which he circumnavigated the globe. Everywhere he stopped, he said, he was met by numbers of people, and the halls engaged for the lectures were in many cases overcrowded, especially in Australia.

Prof. Herman S. Herbig, C. S. B. told of his lecture tour through Germany and Switzerland, on which speaking German on Christian Science he was greeted everywhere by large audiences. Col. William E. Fell of Leeds, Eng., and others describe the progress and growth of Christian Science in the British Isles.

The summary of the report of the board of lecturership showed that in the past year lectures given by the board had been attended by more than 250,000 persons, an increase of 100,000 over the number the previous year.

A report from Sweden reviewed the recent victory gained by the Christian Scientists of that country in securing official recognition of the church. This was granted by the King, whom appeal was made after several unsuccessful attempts to gain recognition from the ministers of the state church.

The meeting concluded with the singing of the doxology. — Boston Daily Globe, Tuesday, June 3, 1913.

DIAMOND PURITY.

In the selection of a diamond, size is only one of the many considerations. Purity of color and freedom from flaws are very important elements, as also are shape and style of cutting. The most important feature, we think, in buying diamonds, is the source you procure them from. We buy direct from the largest diamond cutting establishment in America. This enables us to give our customers the choicest of gems at reasonable prices—\$30 to \$25 per carat less than city prices.
