

It is significant that in homes of wealth where the very best is demanded, Ivory Soap is used in the nursery. At the same time, in hundreds of families where economy decides the choice, Ivory Soap is selected. Thus its purity attracts the rich; its economy attracts the poor. High quality and low cost is there any better combination?

The situation of fruit growers is called to the advertisement of the Farmington Nurseries in this paper. Mr. Dinterfeld is now prepared to receive and fill orders for the fall of 1903 and spring of 1904. The varieties which he offers are those which have proven most successful in this section, and are among the best varieties of commercial fruit grown. Mr. Dinterfeld is one of the most experienced nurserymen in the State, and whatever his recommendations may be relied on. More than a year he has been experimenting with the fruit grown in Southeast Missouri and testing other varieties at the experiment station at this place and is qualified to speak with authority of the varieties most profitable to be grown here. If you are going to plant trees and aim your orders, or better, visit the nurseries and experiment station, before ordering.

REPUBLICANS SEEM TO BE REJOICING
 over Mr. Dalton's flop, but they can't measure up with the prominent Republicans who have announced their intention of voting the Democratic ticket. Such men as Webster Davis and many others are exposing the Administration unmercifully, and are advocating the Democratic platform, which cannot possibly be objectionable to any intelligent and fair minded man whose interest is with the wealth producers of the country, viz, the laboring people.
