BETTER BE CAREFUL WHAT YOU EAT!

If you had a craw like a chicken and a gizzard full of sand rocks you might eat almost anything, but the human stomach is a delicate piece of machinery and demands great care. Don't take liver and stomach medicine and pills; it's not that you need. Buy good, pure, wholesome, fresh groceries; buy the best, and see how different you feel.

The market is full of cheap, rotten, nasty stuff, the slops and leavings from canning and packing houses, which is put up under bright labels and sold cheap. Beware of such stuff; its dangerous. We don't handle it; don't buy it; don't want it. We handle only the best of everything that is to eat, at the lowest price such goods can be sold. Come to the QUALITY STORE.

EXCHANGE NOTES

Cole Younger, a former member of Jesse James' gang, has applied for full pardon to the governor of Minnesota, where he has been in prison for 25 years.

A mass meeting of the members of the Farmers Unions of New Madrid, Pemiscot, Dunklin, Stoddard and Butler counties, are called to meet in Malden on March 4th.

Tuesday of last week Mayor Huggins of Malden shot and seriously wounded Sam Blanton, at a livery barn. The shooting was the result of a common difficulty, and not in the discharge of any official capacity.

East Prairie Eagle: The latest spasm at Jefferson City is the bill by Muir, of Lewis county, to establish a printing plant in the penitentiary to cost \$300,000, which is to be operated by convicts under a state printer, who is to be appointed by the governor for three years at a salary of \$2,500 per annum. Oh, my countrymen! What a glorious chance for graft 'twill be!

New Madrid Record: When the north bound Frisco train reached Matthews, last Tuesday, the conductor called for the constable and had a young man, 20 years old, from Big Creek, Ark., arrested for "shooting up" a passenger coach. He was tried before Judge J. N. Mills, who fined him \$85.00, and not being able to settle the bill was brought here to languish in Sheriff Hampton's bastille.

Postoffice Hours

One good thing postmaster Guffy has done since coming into office is to open the noon mail from the south on Sunday. For this purpose the postoffice is open from 1:30 to 2:30 p. m. Don't forget this, and come and show Mr. Guffy how you appreciate the favor. The hours at the postoffice are: Week days, 7:30 a. m. to 7 p. m. Sundays 8 to 10:30 a. m.; 1:30 to 2:30 p. m.; 4:30 to 6 p. m.

Salton Sea

One of the strangest farms in the world is situated in Southern California, 264 feet below the level of the sea. The place is known as Salton. It is a salt farm of about 1,000 acres. Here the salt lies as deposited by nature from six to sixteen inches in depth. The salt farmers are busy harvesting this crop the year round, and although the harvest has continued for over twenty years, during which time more than 40,000 tons of salt have been harvested, only ten of the 1,000 acres of the farm have been worked. The salt is first plowed up in furrows; it is then thrown into conical piles by men with barrows, after which it is taken to the reduction works nearby and put into marketable condition. The work is done by Mexicans and Chinese, the intense heat being more than Americans can endure.—Malden Merit.

Does the Merit know that the present Salton is only 62 feet below the level of the sea, while 170 feet of water covers the Salton Sea, as the result of an overflow and break in the Colorado river about four years ago. The sea was dry, on the style of Death Valley. The deepest place was 276 feet below the level of the sea. As Salton is 62 feet below, and near the waters edge, it might be estimated that the deepest water is about 190 feet. It is said the Southern Pacific Railroad moved its tracks 40 miles. It still runs across much of the water.

At the time the break in the river which flooded the sea occurred, much of the sea was being cultivated in alfalfa, etc., and the soil was about the richest and most productive in the world, the intense heat adding greatly to the growth of vegetation, the heat being so great that much of the labor was performed at night. Many of these farms and houses were covered many fathoms with water. The break occurred through an irrigation ditch, and the government and the Southern Pacific Railroad worked many months before the water could be turned again to its natural course.

Above Consistency. Emerson: With consistency a great soul has simply nothing to do.
