

PRINCE ON REVERES AQUATIC SPORT

For the First Time Since 1886, University Men Will Take Up Rowing—Hanlan Likely to Be Coach.

REPUBLIC SPECIAL. New York, July 8.—Lazio Gracie, nearing completion with his long stretch of smooth water, makes it almost inevitable that Princeton should return to the field of aquatic sport, which was left in limbo. Indeed, there has been more than a little talk among the prominent graduates who contribute to the support of athletics to sit on an enthusiastic rowing team.

Edward Hanlan, former coach of Columbia, in rowing, has been mentioned as a likely man to take charge of the Princeton crew, which is very likely to be a figure in the sport from now on. It is considered at New London that there is a great likelihood that the Tiger crew will be an entry in the regatta between Yale and Harvard there next June.

It seems almost assured that Princeton will have a crew. The excellent facilities now or shortly to be at hand are not excelled by those of any other college. With a stretch of several miles to train over, on an artificial lake, conditions should all ways be favorable. The men could get in longer practice than almost any other college but Georgetown. The mention of the name of Hanlan as coach came about naturally when it was planned first at Princeton to revive rowing. The old Columbia coach, rated as one of the best men in the country at the game, now is living on an island near Toronto, presented to him by the city during the height of his winning career as a single sculler. Hanlan allowed his personal habits to interfere a little with the coaching of the Columbia crew, but at that he carried out the best that he could.

Hanlan had that the 1901 boat, which made a fine second to Cornell, when the latter broke the record for four miles. Hanlan is capable enough to do a great deal with special material that can be found at Princeton.

Princeton was a factor in intercollegiate rowing a long time ago, but not by any means a prominent one. In 1886, at Saratoga, the Princeton crew competed with Columbia, Wesleyan, Harvard, Williams, Cornell, Dartmouth, Yale and Yale in a three-mile race. The crews finished in the order named above. Princeton being last and Yale withdrawing after the start.

The New Jerseyites finished nearly a half mile behind the Columbia crew, which won. The following year Princeton dropped out of the race at Saratoga, which incidentally marked Cornell's first triumph on the water. There were some college rowing then which have no crews now, notably Amherst, Brown, Williams, Dartmouth, Bowdoin, Hamilton, Wesleyan and Union. In 1891 Princeton again was last at Saratoga. Cornell, Harvard, Columbia, Princeton and Yale were the only crews of the orange and black. The final appearance of the Princeton crew was in 1894 at Saratoga, when they finished behind Pennsylvania and Cornell in a race of a mile and a half, beating out Columbia and Bowdoin.

The entry of the Tigers into the rowing game once more would stimulate interest in rowing greatly. The probable result is an invitation to compete at Poughkeepsie would be declined in favor of one to row in New London. Yale is as much Princeton's natural rival as she is that of Harvard. There would be some great objection to crew work at Princeton, and it is thought that it would cripple the baseball team, a thing which has hitherto had full control of the sport. It is thought that a great attraction to call men away from baseball is likely that the latter game would suffer a little, but the men who play generally are a little too heavy for the baseball game.

It was as if the rowing colony at Poughkeepsie, too, would be much larger next year. It has been promised that a couple of years that the University of California would send a crew East to compete at Poughkeepsie. And Princeton's crew, said during his recent stay at Poughkeepsie that he had had long talks with President Wheeler of the University of California about rowing. "The game is still in the infancy at Berkeley," he said, "and they are not rowing there in four or five years. President Wheeler, as an old Cornell man, knows about rowing, and he is not going to let any new game East that is not worthy of representing the university. I think that the rowing club would be sent to the Hudson just as soon as rowing advances far enough."

As at Ohio State, Princeton's Stewart, the old Cornell sculler, football player and track athlete, who had charge of rowing at Saratoga, is now a member of the faculty of Princeton. He has been trying some experiments in rowing, and it is thought that he will be a great help to the Princeton crew. It is understood that as soon as may be possible, this state university will represent the Hudson river in the Columbia regatta, which is to be held at Poughkeepsie, and that the Princeton crew will be invited to compete. It is thought that the Princeton crew will be invited to compete. It is thought that the Princeton crew will be invited to compete.

After-Season Selling Men's Furnishings

- Madras Shirts, pleated or plain bosom, attached or detached cuffs, fancy stripes and figures; cut to... 70c
Imported Madras and Oxford Shirts, coat style, attached or detached cuffs; all colors; cut to... \$1.10

EUROPE AND ASIA SEEK PEACE IN WASHINGTON

Statesmen Who Will Represent Russia and Japan at the Peace Conference to Convene in the Senate Reading-Room of the Congressional Library—Gravity of the Situation Universally Appreciated.

BY STEPHEN BONSAI.

SENATE READING ROOM, CONGRESSIONAL LIBRARY WHERE THE PEACE PLENIPOTENTIARIES WILL MEET.

Washington, July 8.—Our diplomacy is only 19 years old and yet next month the plenipotentiaries of Europe and of Asia will assemble in Washington to settle the destinies of the far East, and the lands that lie across the Pacific.

It was the representative of the American government was a rank outsider in the congress of nations to-day, by common consent of all the great powers, the situation created by the Russo-Japanese struggle is referred to the good offices of our Chief Magistrate and the conference to which he has paved the way is regarded as the only possible, not by no means the only, way of escaping from the world war that has been threatening ever since the midnight attack of the Japanese upon Port Arthur.

For well or for woe we are now right in the midst of a new kind of foreign congress, the only one of its kind in the history of the world. It is a congress of nations which are to live up to the traditions of our diplomacy as we undoubtedly shall, we make a new record in the history of the world. It is a congress of nations which are to live up to the traditions of our diplomacy as we undoubtedly shall, we make a new record in the history of the world.

Government he negotiated treaties of amity and commerce with the kingdoms of Siam and of暹羅. Truly he was the pioneer of our diplomacy in the far East, and the memory of men like him should be recalled, if but for a moment, before we enter upon the conference in Washington, which next month the great nations of Asia will raise the cry of "Asia for the Asiatics" in a conference which will greatly resemble an international tribunal of justice.

The choice of Washington as the place of the conference which may result in peace or in a greater and more extensive war is due to the fact that the principles in the struggle could not agree between themselves upon any other neutral point. It is at the first word of mediation was for the league or the capital of any other of the lesser European states. How could we be motivated, of course, by reasons of convenience?

Truly he was the pioneer of our diplomacy in the far East, and the memory of men like him should be recalled, if but for a moment, before we enter upon the conference in Washington, which next month the great nations of Asia will raise the cry of "Asia for the Asiatics" in a conference which will greatly resemble an international tribunal of justice.

It is a pity that our chance of receiving Yamagata is so slight, for he is a wonderful story of Japanese military development. When he entered the army Japanese soldiers were armed and "killed" the Japanese soldier of the most "infuriated" formations, but in 1860, on the day of the Japanese "great" conquest of the Japanese continent, which was regarded by all the officers of the allied army as the greatest military feat of the world had ever seen.

WOMAN'S BREAST

A lump in woman's breast is a cancer. It does not pain until almost past cure, but if neglected, it will always poison, sleep, glaze in the camp, and kill you. If you wait until it poisons glands in the shoulder, death is certain.

I will give \$1000 if I fail to cure any cancer I treat, but it poisons the deep glands or attaches to bone. No knife or pain. No pay until cured. No "Ray" or other swindle. A Fact! Send \$1.00 for the present. Address: Dr. and Mrs. Chamblee & Co., Offices, 201 & 203 N. 12th St., St. Louis, Mo. PLEASE SEND THIS TO SOMEONE WITH CANCER.

PRESIDENT ROOSEVELT HAS NOTED ATHLETES AS MEMBERS OF CABINET

Everybody knows that President Roosevelt is an all-round athlete, but it is not generally known that he has a cabinet of athletes about himself. A Cabinet of men whose tastes are similar to his own.
