

Next Week

From May 24 to May 29

Inclusive. Get this 1-quart

WEAR-EVER STEW PAN

For only 15c

This quart pan which would regularly sell for 45c but has been advertised in several women's magazines at a special introductory price of 20c is offered for the first time at a price of 15c and the coupon which you can cut out of the Kansas City Star, Times, Journal or Post, and when filled out as directed I will honor these coupons at my store and furnish the pan as advertised for 15c. This offer is made so that you can see for yourself—if you do not already know—the difference between WEAR-EVER and flimsy aluminum ware.

Aluminum is NOT all the same. Be sure you get Wear-Ever. Look for the Wear-Ever trade mark on the bottom of every utensil. We cannot sell the pan for less than 20c unless the coupon is presented, because they will cost us more than 15c unless we turn in the coupons. Only one pan sold to a customer.

SCHOOL NOTES.

By A. C. Moreland, County Superintendent of Schools.

In my notes last week I failed to give the hour of the Graduating Exercises. The exercises will begin at 2 o'clock p. m.

The Young Ladies Glee Club of the Butler High School has kindly consented to sing for us. All who have heard them know of their power to please.

The rural examination papers have been examined and mailed. I congratulate those who have been successful in securing the required grades, and sincerely hope that those less fortunate will try again next year.

Most of the teachers graded the papers as I requested. Some of them did not. I had several reasons for asking the teachers to do this. First, I considered it more just for the pupil, as the teachers in charge understood the ability of the pupils better than I. Secondly, it has been my observation that some teachers grade unjustly, and I desired to find who these are. To justify what I have said I am going to present some of the questions and the answers:

One of the questions was: Who was Robert Morris? Tell of his service to his country. One of the answers read: "Robert Morris invented the telegraph. He seen the telegraph in operation all over the United States. His service to his country was inventing the telegraph." Another answer read: "Robert Morris invented the telegraph. He built lines and made telephones to talk long distances over. It was great help to this country a message could go over this in a little while. Before this they had to go on foot or on horseback." One of the questions in physiology was: "Describe the process by which we hear." One of the answers was: "The process by which we hear is called the ear. The process on the side of the head is not the thing from which all the hearing comes from." I could give many more such answers. The above answers were graded correct by several teachers. I do not mean this criticism unkindly, as I found many of the papers justly graded.

The following pupils will be entitled to diplomas May 22; Mary Wheatley, Teresa Howard, Marguerite Young, Elbridge Young, Iva Faubion, James Faubion, Angie Faubion, Harry Brummett, Dwight Wise, Gladys Brown, Leo Stutts, Ruth Wightman, Frances Wightman, Ethel Robinson, Edith Robinson, Eugene Baymiller, Marie Ketrin, Kinley Simpson, Jessie Hart, Lizzie Sims, Winifred Smith, Lillie Erickson, Floyd White, Dora Lewis, Jessie Lewis, Josephine Leonard, Mary Cox, Iva Leonard, Amy Eggleston, Inez Tharpe, Ernest Jarvis, Elmer Hardinger, Paul Bartz, Gladys Summy, Edward Spratt, Verne Potter, Helen Odneal, Goldie Young, Gladys Radford, Raymond Radford, Clara Ferguson, Ruby Snodgrass, Ina Geer, Leo Morilla, Mary Padley, Ernest Deems, Gladys Ghore, Fern Miller, Guy Tucker, Stella Rafferty, Charlotte Kent, Naomi Rider, Belle Swarrens, Ella Query, Edith Bright,

There are several more from Hume but I haven't their names at this time. I have the names of 201 graduates. The number from Hume will make a grand total of about 220.

Adrian, Hume, Rich Hill and Butler give two scholarships each, one to the boy and one to the girl making the highest average. The following scholarships were won: Adrian, Guy Mahan and Gladys Broughton; Rich Hill, Porter Lee and Naomi Rider; Butler, Carl Greer and Marie Ketrin. The Hume scholarships will be awarded later.

In the seventh grade, Opal Davidson and Douglas Baymiller made the highest averages being 94 per cent and 95 per cent respectively. The seventh grade taken as a whole did better work than the eighth.

I have had phones placed in my office and in my residence for the convenience of those desiring to call me. My phone numbers are, office 168, residence 491.

There are about thirty district clerks who have not sent in their estimates and enumeration for their districts. The railroad representative may come at any time after May 15. If the above papers have not been sent in before he arrives, these districts will lose all money derived from the above source. Please attend to this at once.

I am mailing out supplies to the clerks this week. These reports should be made out as soon after June 30th as possible. They should be sent to me before July 15th, or not later than that date. Please be careful and report every item. I am sending applications for state aid along with the above reports. I am making out these applications in part as I have access to last year's reports. The clerks should see that these applications are properly signed, and return them at the same time the reports are sent.

The fee for endorsing a certificate or for reissuing one is \$1.50. All of those who expect to take the June examinations in Warrensburg or elsewhere should get a number before leaving as this would save considerable confusion. This applies to those who did not take the examinations in March. Any one desiring a number may get one by sending in a fee of three dollars.

R. L. Nichols Injured.

R. L. Nichols met with a painful injury this day, but will be able to return to work in a few days.

Have You Got Your

Order in for a New

We have now orders on file for over 2 car loads.

A NEW ONE FOR THE FORD

I'm a little Ford, always the joke
The best I get is hope I choke
I'm kidded by all, both woman and man
And used 'bout same game as an old garbage can
I'm called the road louse and the little flea
Its water and mud don't bother me
Go to the garden and get a gourd
Fill it with gas and you'll have a Ford.
To all other cars I'm an awful pill,
Pass them on hill, like they'er standing still
And I climb the hill and on I go,
While other cars come up in low.
Start me on a trip—I get you there
Roads are bad—I don't care,
57 varieties I guess I'm the pickle
You can run me all day only costs a nickle.
Better buy me before its too late
And don't forget the guaranteed rebate.

Yours,

Norfleet & Ream

The Season's Crops

It is too early now to make any estimate of the crops of the season, says the Wallace Farmer, a season in which the whole world is interested in the crops of America as never before. About all that can be said is the winter wheat crop, grown mainly in the west, covers a large acreage, but the increase in acreage will be about balanced by the loss of condition. There has been a great deal of freezing and thawing in the middle states, and the condition is not up to the average; while in the west the conditions are ideal. We can reasonably look for about the same yield of winter wheat as we had last year, not any more, perhaps a little less. The conditions for sowing spring wheat have been favorable all over the spring wheat country, and we may expect a considerable increase in acreage; but no man can guess at

what the wheat crop will be until it is harvested:

The seed corn is excellent this year, the ground in fine condition, the season favorable for planting. So far, everything is favorable, but it is too early to even guess what the crop yield will be. A failure in the crops of America this year would be a world calamity.

Christian Science Services

Will be held in the court house in the Probate Court room every Sunday morning at 11 o'clock. All are cordially invited. Subject "Soul and Body."

A number of heavy, reinforced steel barrels made of 8 gauge steel. Comply with the I. C. C. ruling. When full will stand a drop of 4 feet on concrete block. \$4.25. H. B. Alley. 20-17

We Need Room and Money

We sold about thirty-two of the fifty patterns of wall paper we advertised last week at close out prices. We are replacing them with new patterns on our bargain counters. We are still offering
